Summary

A Business Analyst and Scrum Master, with over 5 years of experience in Software Development Life Cycle (SDLC) and Scaled Agile-Scrum environments. Adept at bridging the gap between business and technology, collaborating with stakeholders to analyze business needs, define requirements, and optimize workflows. Skilled in user story creation, backlog management, process improvement, and Agile coaching, driving the successful delivery of digital products. Passionate about facilitating Agile ceremonies, enhancing team performance, and implementing data-driven solutions to improve product success. Proficient in tools such as Jira, Confluence, Draw.io, Visio, and Microsoft Suite.

Work Experience

Business Analyst / Scrum Master – (11/2019 – Present)

WellSky

- Analyze business processes and identify inefficiencies, implementing solutions to optimize workflow efficiency and operational effectiveness.
- Collaborate with stakeholders to define business needs, gather requirements, and translate them into detailed user stories, epics, and acceptance criteria in Jira.
- Facilitate workshops and stakeholder meetings to ensure alignment between business needs and technical solutions.
- Act as a liaison between business and technical teams, ensuring clear communication, alignment on project goals, and seamless implementation of solutions.
- Own and manage the product backlog, prioritizing features based on business impact, customer feedback, and technical feasibility.

Ruth Nyonglema

Blaine, MN | [612-806-1701](tel:612-806-1701) | ruthnyonglema@gmail.com | www.linkedin.com/in/nyonglema-ruth

- Participates in scrum ceremonies including sprint retrospectives to help the team identify and address any problems encountered during the sprint.
- Work closely with development teams to clarify business requirements and ensure alignment with product vision.
- Lead backlog grooming sessions, ensuring requirements are well-defined and development teams have clear direction.
- Perform risk assessments and impact analysis, identifying potential challenges and developing mitigation strategies to ensure smooth project execution.
- Develop process flow diagrams, swimlanes, and wireframes using Draw.io and Visio to visualize and optimize business workflows.
- Drive continuous process improvement by recommending and implementing Agile best practices, backlog optimization, and sprint execution strategies.
- Collaborate with QA teams to define and execute test cases, ensuring that deliverables meet quality standards before production release.
- Lead User Acceptance Testing (UAT) efforts by coordinating with business users, documenting feedback, and working with development teams to refine solutions.
- Conduct data analysis and reporting to measure product performance, track KPIs, and support data-driven decision-making.
- Support change management initiatives, including training stakeholders on new system implementations and ensuring a smooth transition to new workflows.

Education

- Associate in Nursing _North Hennepin Community College, Brooklyn Park, MN

Certifications

- SAFe 6.0 Scrum Master (SSM)
- Certified Scrum Product Owner (CSPO)
