SUMMARY

Project Coordinator with 5+ years of experience managing cross-functional projects across logistics, business process management, and digital transformation environments. Skilled in leveraging tools such as Microsoft Project, Smartsheet, Jira, Confluence, and Power BI to streamline workflows, optimize resource utilization, and enhance project visibility. Experienced in coordinating Agile and Waterfall projects, supporting automation initiatives, and driving stakeholder collaboration across global teams. Adept at risk management, reporting, and process improvement, with a proven ability to deliver on-time, high-quality results in dynamic corporate settings. Recognized for strong analytical, organizational, and communication skills that foster team alignment and operational efficiency.

SKILLS

- **Project Management Tools:** Microsoft Project, Asana, Trello, Monday.com, Smartsheet, Jira, Confluence
- **Office & Productivity Software:** Microsoft Office Suite, Google Workspace (Sheets, Docs, Slides), SharePoint, Teams
- **Project Coordination Skills:** Scheduling, Resource Allocation, Budget Monitoring, Risk Management, Documentation, Reporting, Task Tracking
- **Communication & Collaboration:** Stakeholder Management, Meeting Coordination, Cross-Functional Communication, Client Liaison
- **Analytical & Reporting Tools:** Excel (Pivot Tables, Charts), Power BI, Tableau, Data Analysis, Performance Tracking
- **Methodologies & Frameworks:** Agile, Scrum, Kanban, Waterfall, Change Management
- **Soft Skills:** Time Management, Problem Solving, Attention to Detail, Adaptability, Multitasking, Critical Thinking, Organization

WORK EXPERIENCE

PPG Group

February 2025 – Present

Project Coordinator

- Leading the Digital PM Transformation, driving the global implementation of integrated project management platforms such as Smartsheet, Monday.com, and Power BI to improve real-time visibility and collaboration.
- Partnering with cross-regional stakeholders in EMEA, APAC, and North America to unify workflows, automate reporting structures, and establish standardized governance practices.
- Facilitating Agile sprint planning and progress tracking in Jira and Confluence, ensuring seamless execution and alignment with organizational objectives.
- Enabling successful change management by conducting system training, onboarding sessions, and continuous stakeholder engagement to boost tool adoption.
- Realizing a 60% improvement in project transparency and a 40% decrease in manual reporting efforts, optimizing performance across global operations.

Infosys BPM

January 2019 – July 2022

Project Coordinator

- Spearheaded the RTR (Record-to-Report) Automation for a Logistics Client initiative, driving end-to-end automation of financial close and reconciliation processes across four global locations.
- Collaborated with finance, automation, and client stakeholders to define R2R workflows and establish automation scope within an Agile-Scrum framework.
- Coordinated the design, testing, and deployment of 30+ RPA bots, enhancing journal entry, reconciliation, and financial reporting efficiency.
- Oversaw project timelines, dependencies, and milestones using Microsoft Project, while monitoring sprint progress through Asana dashboards.
- Organized and led User Acceptance Testing (UAT) sessions, managed defect resolution, and facilitated stakeholder sign-offs on deliverables.
- Developed comprehensive Standard Operating Procedures (SOPs) and conducted end-user training to ensure successful adoption of automated workflows.
- Partnered with analytics teams to build post-implementation performance dashboards in Excel (Pivot Tables) for KPI tracking and variance analysis.
- Maintained strong governance and compliance documentation, ensuring full alignment with SLA and audit requirements.
- Delivered measurable outcomes, including a 25% reduction in month-end close cycles and a 35% improvement in financial data accuracy across global operations.

Project Coordinator

- Coordinated the Domestic Priority Network Enhancement, supporting nationwide expansion and optimization of delivery routes and regional hubs to improve shipment turnaround times.
- Assisted in project scheduling, milestone tracking, and vendor coordination using Microsoft Project, ensuring 95% on-time task completion across multiple logistics zones.
- Monitored daily operational performance and compiled analytical delivery reports using Excel-based dashboards, driving a 15% improvement in delivery efficiency across metro routes.
- Collaborated with cross-functional teams including logistics, IT, and operations to streamline communication and align project deliverables with service improvement goals.
- Supported budget monitoring, procurement tracking, and compliance documentation to maintain project accuracy and adherence to corporate standards.
- Conducted risk assessments and coordinated contingency planning to mitigate potential schedule delays and operational disruptions.
- Prepared weekly progress presentations and executive summaries for senior management, highlighting project milestones, performance trends, and key improvement outcomes.

PROJECTS**Smart Energy Monitoring & Analysis System**

- Developed an IoT-based smart energy monitoring prototype integrating Arduino, sensors, and Python analytics scripts to collect and analyse real-time power consumption data.
- Applied data visualization and statistical analysis using Power BI and NumPy/Pandas to identify usage trends and potential efficiency improvements.
- Designed an automated alert and scheduling logic to promote sustainable energy management practices through intelligent system feedback.

Automated Student Performance Prediction using Machine Learning

- Designed a predictive model in Python (Scikit-learn, Jupyter Notebook) to analyse academic datasets and forecast student performance based on attendance, assignment, and test data.
- Pre-processed and validated datasets using Excel and SQL, ensuring accuracy and consistency for model training and testing.
- Demonstrated the application of machine learning algorithms for academic performance insights, emphasizing data-driven decision-making and automation concepts.

EDUCATION

- **Master of Science in Engineering**
California State University | **CGPA: 3.2**
- **Bachelor of Engineering in Electrical Engineering**
UKA TARSADIA University | **CGPA: 6.2**

August 2022 – December 2024**July 2014 – May 2018**
