PROFESSIONAL SUMMARY

Tableau expert with 13+ years of experience specializing in enterprise BI solutions, data visualization, and analytics platform administration. Proven track record of reducing report turnaround times by up to 90% through automation and leading Tableau Center of Excellence initiatives that drove adoption from 30% to 80% across 3,000+ users. Deep expertise in Tableau Desktop, Server, and Cloud with extensive experience in dashboard optimization, data modeling, and governance. Adept at rapidly mastering new technologies and platforms, enabling quick adaptation to evolving business intelligence tools and data ecosystems.

KEY ACHIEVEMENTS

- Accelerated business decisions by reducing report turnaround times up to 90% through automated Tableau solutions
- Expanded analytics impact organization-wide, growing Tableau adoption from 30% to 80% while enabling 3,000+ users through Center of Excellence leadership
- Maintained seamless analytics operations through 3 data warehouse migrations while establishing governance standards for long-term platform sustainability
- Enhanced strategic decision-making by optimizing business-critical dashboards using stakeholder feedback and visualization best practices

CORE COMPETENCIES

Tableau Expertise:

- Tableau Desktop, Tableau Server, Tableau Cloud administration and development
- Advanced calculations: LOD Expressions, Table Calculations, Complex Calculations, Dynamic Parameters
- Data connectivity: Multi-Source Data, Custom SQL, Common Table Expressions (CTEs), Data Blending
- Enterprise capabilities: Row-Level Security, Performance Tuning, Dashboard Design, Data Modeling
- Governance: Enterprise Deployment, Best Practices, User Training, Center of Excellence Leadership

Technical Skills:

- Data Visualization: Power BI, Python (bokeh, seaborn, etc)
- Data Analysis: Data Analysis: SQL, Python (data processing, automation), R, Advanced Excel
- Cloud Platforms: AWS Redshift, Google BigQuery, Azure, GCP
- Databases: Oracle, Teradata, PostgreSQL, Salesforce CRM
- Development Tools: Git, Jira, AI/LLMs for workflow automation

Business Skills:

- Technical Training and Mentoring
- Cross-Functional Stakeholder Management
- Change Management and User Adoption
- Technical Documentation
- Quality Assurance and Testing
- Rapid Technology Adoption and Platform Mastery

PROFESSIONAL EXPERIENCE

Architect

Encora | July 2024 - August 2025

- Evaluated analytics landscape across three data warehouses (PostgreSQL, AWS Redshift, Denodo) to identify high-impact optimization opportunities, enhancing Tableau dashboard reliability, and resolving data integrity issues
- Developed new Tableau dashboards replacing legacy reporting, improving speed and simplifying stakeholder access to critical data
- Performed comprehensive QA, root cause analysis, and UAT, identifying and implementing fixes to resolve data integrity issues across complex multi-source data models
- Managed Agile projects using Jira, delivering iterative value through sprint-based development and Git version control

- Leveraged AI/GPT resources to optimize SQL and Python script development, accelerating testing and demonstrating ability to quickly adopt emerging technologies

Planned Career Break

September 2023 - July 2024

- Managed family responsibilities, traveled, and relocated from Southern California to the East Coast
- Rapidly adopted emerging LLM technologies to develop, enhance, and QA locally run apps, scripts, and automations in Python, PowerShell, and Pine Script

Staff Analyst

Rivian Automotive | November 2021 - September 2023

- Established analytics foundation for fast-growing EV startup, building scalable infrastructure and reporting for Marketing, Customer Engagement, and Operations
- Rapidly mastered AWS Redshift and Salesforce integration within first month, developing ad hoc ETL pipelines, data tables, and views using advanced SQL (CTEs, joins, aggregations) for Tableau dashboards
- Developed custom Tableau dashboards with LOD calculations and weighted scoring systems to rank Customer Engagement agents across multiple performance metrics
- Created self-service analytics tools and provided technical training to improve stakeholder autonomy
- Partnered with HR People Ops team to develop/enhance Recruiter Scorecards, Applicant Funnel, Employee Survey Responses, Employee Attrition dashboards
- Delivered key analytics projects including Customer Engagement Agent scorecard, Voice of the Customer analysis (NPS scores), and Demo Drive optimization (+15% improvement in pre-order retention)

Senior Consultant

Slalom Consulting | October 2020 - December 2021

- Served as Lead Consultant and delivered end-to-end analytics projects for clients in Fast Casual and Gaming Entertainment industries using SQL, Tableau, Power BI, and Python
- Automated manual processes and enhanced existing data sources to eliminate pain points, improve data integrity across teams, and accelerate reporting turnaround times
- Delivered Python cohort analysis across seven gaming franchises, processing 100M+ rows from BigQuery, Teradata, and Hadoop to analyze player engagement, in-game activity, and monetization patterns
- Successfully led enterprise Power BI to Tableau migration with minimal ramp-up time, demonstrating ability to quickly master new platforms and deliver results

Senior Technical Consultant

Automobile Club of Southern California | July 2018 - October 2020

- Spearheaded internal Tableau Center of Excellence (CoE) initiatives, mentored 5 analysts, and hosted monthly governance meetings for 15+ analysts across the enterprise
- Drove organizational Tableau adoption from 30% to 80% of business units, supporting 3,000+ users and establishing Tableau as the primary business intelligence platform
- Developed executive dashboards for C-suite leadership and server monitoring solutions to track Tableau usage and performance metrics
- Implemented Tableau governance standards, best practices, and enterprise deployment strategies

Sales & Marketing Analyst

Kavo Kerr Group (subsidiary of Danaher Corporation) | March 2017 - July 2018

- Converted all Excel-based reporting into automated Tableau solutions, significantly reducing turnaround times
- Developed interactive, drill-down Tableau dashboards to surface regional/territorial sales performance insights
- Provided guided training and change management support for non-technical leadership audiences
- Implemented data visualization industry best practices and established quality assurance standards across reporting functions

Senior Marketing Analyst

Western Digital Corporation | March 2012 - March 2017

- Analyzed sales and financial performance across three major subsidiaries (WD, SanDisk, HGST) within Corporate Finance business unit, delivering monthly and quarterly reporting to executive leadership
- Served as primary contact for competitive market intelligence vendor, analyzing industry performance data to inform strategic positioning
- Converted and consolidated 15+ legacy Excel reports into centralized Tableau workbooks, transitioning corporate reporting to automated BI solutions
- Tracked distributor shipments and retail sales performance for WD subsidiary, delivering weekly, monthly, and quarterly performance analyses

EDUCATION

Bachelor of Science, Business Administration | Management Information Systems
University of Nevada, Las Vegas
