Summary

Tech Nerd (9 years) with expertise in *Web* and *Mobile* development and system design excels in creating scalable web applications using **React**, **React Native** with **TypeScript** for frontend and **C#**, **Python**, **Node** for backend. Skilled in writing high quality code, mentoring junior developers and collaborating with team members. Love Cloud tech so much like **AWS**.

Work Experience

Senior Software Engineer • Mar 2023 - Present - Autodesk

- Designed and implemented a microservices architecture using **.NET Core**, **C#**, **T-SQL** that decoupled Fusion 360's rendering engine from the UI layer, resulting in a 40% performance improvement for complex assemblies.
- Engineered a custom **WebGL** rendering pipeline that interfaced between C# computational geometry services and **React** frontend, enabling browser-based 3D model manipulation with near-native performance.
- Architected and delivered Fusion 360's Design Automation API using **Python/Flask**, enabling customers to programmatically create and modify CAD models, resulting in a 140% increase in enterprise client adoption.
- Developed scalable **GraphQL API** services with **Apollo GraphQL**, contributing asynchronous communication between each service using AWS SQS, SNS, AWS Lambda & Step functions.
- Had bi-weekly product demo meetings to showcase the improvement we made and the direction we're gonna take in the next demo through online live sessions, visualized metrics using **Google Analytics**, **MixPanel** and **Datadog**.
- Used Tech: C#, .NET, Entity Framework, Python, Flask, React, JavaScript, TypeScript, MaterialUI, Swagger, WebGL GraphQL, Load-testing, JMeter, Microservices, AWS, Mixpanel, Datadog, CI/CD*

Software Developer (Frontend Focused) • Mar 2021 - Mar 2023 - Spotify

- Closely worked with cross-team members to modernize apps using **Next**, **React**, **React Native**, with **TypeScript**, leveraging its React Server Components, SSR, App Router, file-based routing for adding features like music recommendation features by integrating AI/ML into the platform.
- Leveraged A/B testing, Integration testing using tools like **Apptimize** and **AB Tasty** to assess if the newly implemented UI is actually feeling good to users, and to decide the next way to design UI efficiently.
- Built and maintained a reusable component library with **Storybook** and CDD, ensuring consistent UI/UX, while monitoring production with **Sentry** and **Datadog** to quickly resolve performance issues.
- Optimized frontend workflows by integrating **Jenkins**, **GitLab CI** for CI/CD, automating testing in the frontend, and ensuring that updates were deployed to Prod, Stage and Dev smoothly.
- Used Tech: TypeScript, React, React Native, NextJS, A/B Testing, Google Analytics, Google Charts, Google Analytics, D3.js, MixPanel, Web Workers, TDD, Jest, Storybook, RestAPIs, Swagger, Jenkins, GitLab CI, CI/CD, Agile*

Full Stack Engineer • Mar 2015 – Feb 2021 - MindTech

- Created and maintained 2 HealthCare platforms from ground-up using **Vue 2/3**, **VueX**, Pinia, Composition API with TypeScript for frontend, **Node** and **PHP/Laravel** for backend creating dynamic and responsive user interfaces with Style-Components and Tailwind CSS ensuring responsiveness for devices and browsers.
- Worked closely with UI/UX designers, providing feedback to deliver optimized solutions for end users. Utilized tools such as **Figma**, **Miro**, Excalidraw and Lucidchart throughout the process.
- Integrated Inertia.js for Vue.js and **Laravel** development, enabling efficient server-side rendering and SPA-like navigation, which improved overall development experience and speed.
- Implemented complex GraphQL APIs with Apollo **GraphQL** Server to efficiently manage data fetching and mutations, reducing the need for multiple RESTful endpoints
- Used Tech: JavaScript, Vue2/3, VueX, Pinia, Composition API, Style-Components, TailwindCSS, PHP, Laravel, Inertia.js, SSR, GraphQL, Jest, Cypress, Docker, CI/CD, AWS EC2, ECS, ECR, Amazon S3, RDS*

Core Skills

React(8 yrs), **Next**(5 yrs), **Node**(8 yrs), **C#**(6 years), **Python**(8 years), **TypeScript**(6 yrs), **PHP**(8 yrs), **Data-Visualization**(5 yrs), **REST API**(8 yrs), **GraphQL**(5 yrs), **Analytics Tools**(4 yrs), **TDD**(5 yrs), **PostgreSQL**(6 yrs), **CI/CD**(4 yrs), **AWS**(6 yrs)

Education

Bsc of Computer Science

Baylor University • 2010 – 2014
