

Sai Teja

Sr. .Net Full Stack Developer

Mobile: +1 470-772-9554

E-Mail: Mallempudisaiteja1@gmail.com

PROFESSIONAL SUMMARY

- Senior programmer with **9** years of experience in working as **Full Stack .Net Developer** and extensive experience in cross-platform application development on **.NET** platforms.
- Expertise in all areas of the **Systems Development Life Cycle (SDLC)**, including strategy, analysis, design, coding, testing, and documentation for software products using **Agile, Scrum, and Waterfall** approaches.
- Strong comprehension of **OOPS** concepts such as **encapsulation, inheritance, abstraction, and polymorphism**.
- Proficiency in designing **Single Page Applications (SPA)** with rich UI and responsive features using **JavaScript** and UI frameworks such as **Bootstrap, ASP.NET, AJAX, HTML5, and CSS3**.
- Experience in web development frameworks including **React.js 15/16, Angular 2/8/12/15, Vue, js** and **AngularJS**, as well as **MVC** and **MVVM** designs.
- Experience with **Micro frontend, Microsoft technologies** such as **C#, ASP.NET MVC, ASP.NET WEB API, Entity Framework, SQL Server, Cloud Services, ADO.NET, VB.NET, Postgre SQL** and **IIS**.
- Practical experience with several **Azure Paas, Azure services**, including **Azure Infrastructure, compute, storage, Azure Active Directory, Azure Infrastructure Functions, Active Reports** and **Data Lake store**.
- Expertise in designing **UML** design patterns such as **Adapter, Proxy, Bridge** and **Facade**.
- In-Depth understanding of the entire web related technologies, architectures, frameworks, component technologies and cross-platform **UI/UX** developments.
- Proficient in front-end development with responsibilities including **HTML, CSS, JavaScript, jQuery, and Ajax** implementation to create engaging and responsive web interfaces.
- Integrated **Kubernetes** into CI/CD pipelines to enable automated testing, building, and deploying of applications.
- In-depth knowledge of **AWS** services, including but not limited to **EC2, S3, Lambda, RDS, DynamoDB** and **CloudWatch**.
- Integrated **SonarQube** seamlessly into the CI/CD pipeline, automating code quality checks at every stage of development.
- Proficient in using Git repositories on platforms like **GitHub, GitLab, and Bitbucket** for collaborative development.
- Demonstrated mastery of popular version control systems such as **Git, SVN** and **TFS**.
- Proficient at developing **N-tier** distributed **.NET** Core applications that use **SOAP** and **SOA-based Web services**.
- Database design and development experience includes **SQL Server, PL/SQL, T-SQL, and Oracle**.
- Skilled in version control with systems like **TFS (Team Foundation Server), Sub-Version, GitHub, and Git**.
- Competence in using **NoSQL** databases like **MongoDB, DB2** and **Cassandra**.
- Strong expertise in developing applications using **MVC, Web API, WCF, LINQ, Visual Studio** and **Visual Studio Code**.
- I am proficient at automating build and deployment process with **Jenkins, Apache Maven, and Ant**.
- Experience managing backend data sources using **RDBMS** such as **Micro frontend, DB2, MS SQL Server, Oracle, and Microsoft Access**.
- Extensive experience in automating RESTful and SOAP web services testing using **Cucumber** and **Citrus** frameworks.
- Collaborated with cross-functional teams in debugging and troubleshooting API-related issues using tools like **Postman, SOAP UI, and Swagger UI** ensuring quick resolution and delivery of high-quality software.
- Automated the deployment of **ARM** templates through CI/CD pipelines.
- Expert in **Azure DevOps**, adeptly implementing and managing CI pipelines for **C# .NET** projects. Skilled in designing and maintaining CD pipelines, automating deployments for web apps, microservices, and APIs with a focus on minimizing downtime and optimizing updates.
- Familiarity with unit testing frameworks such as **N Unit, X Unit, MS Unit, Jasmine, Karma, Jest, and Enzyme**.
- Experience with **Web API** services that need explicit **HTTP** methods such as **GET, POST, DELETE, PATCH** and **PUT**.
- Hands-on expertise with **Azure** services such as compute (**Azure Infrastructure, web roles and worker roles**), **Azure websites, caching, SQL, Azure storage, network service, Azure Active Directory, API management, scheduling, auto-scaling, and PowerShell automation**.
- Extensive knowledge **Silverlight** control authoring using **control templates, data binding** and **visual state management**.
- Used **Xamarin IOS** and **Xamarin Android** for creating native user interface.
- Developed **Data Access Layer (DAL), Business Logic Layer (BLL)** also implementing Business Processes.
- Experienced reading and understanding third party code libraries and troubleshooting **UI** issues on browser-based debugging tool.
- Experience using **Team City** and **Octopus** to deploy and publish projects automatically.
- I am skilled in creating simple and concise test cases with **Jest**, covering a variety of scenarios to achieve complete code coverages.
- Having strong knowledge of **Active views PowerBI, Jenkins, AWS, Kubernetes, and Docker**.
- Worked on **SSRS** to Generate the reports in **Excel** and **PDF** Format.

TECHNICAL SKILLS:

Methodologies	
	Agile, Kanban, Scrum, TDD, Waterfall

Web Technologies	Angular 2/8/12/15, Angular CLI, Angular JS, Angular Material, AJAX, Bootstrap, CSS3, HTML5, JavaScript, jQuery, React.js 15/16, Redux, Redux Thunk, TypeScript, Vue.js, XML
Languages	ASP.NET, C#.NET, VB.NET
.NET Technologies	ASP.NET, ASP.NET Core, ASP.NET MVC 4/5, ASP.NET WEB API, ADO.NET, C#, C#.NET, LINQ, MVC, SOAP, SOA, UWP, VB.NET, WCF, Win32, WPF
Databases	Cassandra, Cosmos DB, MongoDB, MS Access, Oracle, PL/SQL, SQL Server
ORM	Entity Framework Code First, Entity Framework Core, LINQ to SQL
Cloud Service	AWS, GCP, MS Azure
Version Control	Git, GitHub, Subversion, Team Foundation Server (TFS)
CI/CD	Docker, Jenkins, Kubernetes
IDE & Other	SQL Server Management Studio, Visual Studio, Visual Studio Code
Reporting Tools	Crystal Reports, SQL Server Reporting Services (SSRS)
Design Patterns	Dependency Injection, Factory, Repository, Singleton
MS Office	MS Excel, MS PowerPoint, MS Word
Server	IIS, Windows Server
Testing Tools	Enzyme, Jest, Jasmine, Karma, MS Test, N Unit, X Unit
Bug Tracking	Asana, Bugzilla, Jira

EDUCATION

- **Masters in Computer Science from Lewis University - 2021**
- **Bachelors in Computer Science and Engineering from India - 2015**

PROFESSIONAL EXPERIENCE:

Client: BMO-BANK OF MONTREAL, Chicago, IL

Oct 2023 – Till date

Role: Senior .Net Full Stack Developer

Responsibilities:

- Worked with **Vue.js** Forms, Validations, Modules, Components, controllers and **HTTP** requests.
- Responsible for designing and implementing application performance monitoring for Confidential production environment.
- Actively participated in **UAT** transition, retested **UAT** defects and updated comments in the **JIRA** tool.
- Successfully completed the **Software Development Life Cycle (SDLC)**, including **business analysis, design, development, testing**, and implementation of **standalone, intranet, client-server, and web-based applications**.
- Developed a responsive hybrid application with **Vue.js, Angular 15, Web UI** for **desktop, tablet, and mobile** users for **Harness Test Application, Q-stats and call-logger**.
- Experienced in **front-end** development using **Angular 15, HTML5, CSS3/SCSS, JavaScript, jQuery, Ajax, Python3 and Bootstrap**.
- Retrieving Wave files from the **Azure Blob Storage** using **Event Grid** and retrieving the **Queue Storage data** from **Azure Infrastructure**.
- Setup development environment using latest **Blazor Net** with **VB .Net, ASP .NET Core 3.0**.
- Use the **Swagger Editor** to create and document **SOAP, GraphQL, RESTful APIs, RPC** for both technical and non-technical audience.
- Utilised **MVC** frameworks like **WinForms, Vue.js, Angular 15** to develop **single-page applications (SPA)** with principles like **dependency injection, promises, services, scope, controllers, and directives**.
- Extensively used **HD insight** to create **PowerShell, Hadoop** powered big data solution and services, Analyse and report statistics on big data availability and utilization.
- I created presentation layer views with **VB .Net, Java, .NET Core MVC, C#.Net, HTML, CSS/SCSS, jQuery, PostgreSQL and JavaScript**.
- Developed **Python3** batch processors to consume and produce various feeds.
- Used **Angular CLI** to optimise and bundle application assets, resulting in **faster load times**.
- Used **dependency Injection** to inject **Angular 15** services into **Angular controllers**, allowing for **AJAX** calls. I also developed custom directives to construct **HTML** elements and add functionality.
- Developed and deployed applications using **Micro frontend, Microsoft services**, including **Azure Data and Azure DevOps**.
- Contributed to **SSMS, XML, WinForms, Vue.js, Angular 15** module and component documentation, ensuring accurate and current project information.
- Developed features and effects using **Java, Angular 15 and Vue.js, JavaScript**, including accordions, infinite scroll bars, sliders, drag and drop, resizable, and progress bars.
- Developed business and data layer components in **Oracle, Postgre SQL, WPF, UWP, Win32, C#.Net, VB.NET and ADO.Net**, as well as controllers to handle razor view events in the **.Net Core MVC**.
- Created **Azure functions, Azure DevOps** to combine incoming and outgoing messages from streaming tools like the **Azure Service Bus, Kafka**.
- Extensively used **Ionic, High Charts, Telerik** as dynamic data visualization tool for Silverlight.
- Used **Telerik** chart Control to display data in graphical format.

- Planned, organised, and maintained the full stack **Kubernetes** environment running on **Google Cloud Platform (GCP)** and setup the alert and monitoring it by using **Stack driver** in **GCP**.
- Implemented **SSMS, JWT token-based authentication** to safeguard **ASP.NET Core** and grant authorization to users.
- Utilised **VB .Net, ASP.NET** for server-side controls and **JavaScript** for validation controls.
- Experienced in working with **Redis, Docker, Visual Studio Code, SQL server**.
- Created data tables, columns, and views in **Docker, SQL Server, Kafka, Event Grid, Redis queues** and **Redis**.
- Implemented **ORM** models such as **Entity Framework** and **SSRS Reports**.
- Developed **database schemas**, including **tables, views, triggers, stored procedures, functions, and indexes**.
- Implemented **LINQ to query, sort, and filter** complicated objects.
- Used **Python3** to extract weekly information from CSV files.
- Testing the **SOAP, GraphQL, RESTFUL Web API, RPC, Google Maps API** with **Swagger** and **POSTMAN**.
- Configured **Docker** Engine with Docker specific commands, Create Custom Docker Images, Containers and Deployed Docker.
- Developed **unit test** cases for the UI with **Karma** and **Jasmine**.
- Used **N-Unit, MS Test, Event Grid** for **unit performance, and functional testing**.
- Used **Rabbit MQ, Tidal** Scheduling tool to schedule **SSIS** packages and **SSRS** reports.
- Moved database to **SQL** using **Migration Wizard**.
- Experience implementing services on the **Windows Azure Platform, PowerShell**.
- Implemented **Scrum** methodology using **JIRA** to build stories, iterations, and sprints.
- Used **Data Grids, Data Set, Data Views** and **Data Adapters** to extract data from **SQL** server.

Environment: Ajax, ADO.Net, Angular 15, ASP.Net Core MVC, Azure Functions, Azure Infrastructure, Blob, Bootstrap, C#.Net, CSS3/SCSS, Entity Framework, HTML5, Jasmine, JavaScript, JIRA, JWT Token, Karma, LINQ, Microsoft Azure, N Unit, Postgre SQL, POSTMAN, Queue Storage, Razor Views, SQL Server, Scrum, Swagger Editor, VB.NET.

Client: Dish Technologies, Englewood, CO
2021 to Sep 2023

Jul

Role: Sr Senior .Net Developer

Responsibilities:

- Utilised **Agile** software development techniques, specifically **SCRUM**.
- Experienced with **HTML5, CSS3**, backgrounds, layouts, positioning, text, borders, margins, and **CSS/SCSS** behaviours.
- Used **Angular, Java, HTML5, CSS3/SCSS, ReactJS, jQuery, Vue.js, WinForms** and **Bootstrap** to create a **single-page** web app with a **GraphQL, RESTful API, SOAP**.
- Developed **WinForms, React.js 16** views using **Redux** architecture to manage states.
- Knowledge sharing sessions involved in **Vue.js, Angular 15** training and requirements gathering, as well as interactions with end users to understand project requirements, task requests, and analysis.
- Manipulated **DOM**, handle events and applied animation effects with **Vue.js**.
- Developed **VB .Net, SOAP, GraphQL, Restful services, RPC** with an **WPF, UWP, Win32, ASP.NET Web API** for mobile devices.
- Experienced with deployments, maintenance and troubleshooting applications on **OpenShift**.
- Developed Integration process using **Boomi** using **MSI** connectors and Listeners through **Message Queues, Kafka** and connect to the **Oauth 2.0** Authenticated web service using the **HTTP** connector.
- Implemented **VB .Net, ASP.NET** features including calendar controls, repeater controls, validation controls, datasets, and form authentication.
- Developed **SPA** using **Blazor** Web Assembly and **Bootstrap CSS/SCSS, Angular**.
- Involved with bug fixing on functionality, performance and designing issues with **Vue.js** Plugin and Chrome Developer Tools.
- Developed scripts using **Python3**.
- Acted as build and release engineer, deployed the services by **Redis, Docker Containers, Azure DevOps** pipeline.
- Used **SSMS, XML, Azure Service bus** for the automatic rendering of the wave files to the production servers.
- Implemented the Drag-and-drop functionality using **React-Draggable**.
- Adding Wave files to the **Azure Blob, Azure DevOps** and adding a notification to the **Azure Table Storage**.
- Used **Docking Container Control** to design docking layout for the application.
- Creation, development, and maintenance of structured and well-documented code in **C#** using **Visual Studio 2019** and **Visual Studio Code**.
- Worked on designing **AWS** Cloud migration strategy from on-perm severs and **Redis, Event Grid** and **Redis queues**.
- Worked with **SSMS, Java, XML, Micro frontend, Microsoft Windows Azure** including a complete set of enterprise-ready data services, including **Windows Azure Storage** and **Oracle, SQL Databases, Kafka, Event Boos** and **Redis, Event Grid** and **Redis queues** using **Java**.
- Developed **Data Access Layer** Using **Entity Framework** using Repositories.
- Implemented **React.js 16** code to handle cross-browser compatibility issues in **Google Chrome, Mozilla, Safari, and Firefox**.
- Actively supported business users for changes in reports as and when required using **SSRS**.
- Proficient developing applications using **MVC, Blazor** server-side and **WebAPI** with **Entity Framework**.
- Migrated several **SQL** server tables to **Cosmos DB** collections.

- Designing, implementing, and supporting fully automated **Continuous Integration** and **Continuous Delivery (CI/CD)** processes using **Azure DevOps** and **SSRS Reports**.
- Involved in **unit testing** and code reviews while developing and fixing the bugs.
- Used **JIRA** as the **bug tracking** tool and integrated with **Source Tree** to use **GIT** for code versioning and repository.
- Ensured **GET**, **POST**, **PUT**, and **DELETE** functionalities worked as expected through Web API using **Postman** services.
- Spearheaded the implementation and integration of **Jest** and **Enzyme** into the development workflow for a **.NET-based React** project.
- Performed **Rabbit MQ**, **Unit**, **Integration testing** using **N-Unit**, **MSTest** framework.
- Used **GIT** extensively to manage source code repositories.
- The **Jenkins**, **Docker Containers** server is used to build and deploy code to staging and production environments.

Environment: ASP.NET Web API, Azure Blob, Azure DevOps, Azure Service Bus, Azure Table Storage, Bootstrap, C#, Cosmos DB, CSS3/SCSS, Entity Framework, Enzyme, GIT, HTML5, Jest, jQuery, JIRA, MS Test, N-Unit, React-Draggable, React.js 16, Redux, RESTful API, Visual Studio, Visual Studio Code, Vue.js, Windows Azure.

Client: Corteva, Bangalore
to Nov 2019

Aug 2018

Role: .Net Developer.

Responsibilities:

- Design **database** structures, including **tables**, **stored procedures**, **views**, **indexes**, and **relationships**.
- Created **SQL** scripts to migrate data from various sources **SQL Integration Services (SSIS)**.
- Developed **SQL** scripts for data sets to generate reports using **SQL Server Reporting Services (SSRS)**.
- Worked with databases such as **PostgreSQL**, **SQL Server**, **DB2**, and **MySQL**.
- Worked on designing single page applications using **Vue.js** Components such as Router and **Vue.js** core components.
- Utilised **AGILE** techniques to deliver high-quality applications.
- Implemented **HTTP** protocol and **SSL** to secure information between **WCF**, Service and Client.
- Experience in using **WinForms**, **Vue.js** to create a simple API to loop through an array of bound data and done two-way binding of data using **Vue.js**.
- Developed tools using **Python3**, Shell scripting, XML to automate some of the menial tasks. Interfacing with supervisors, system administrators and production to ensure production deadlines are met.
- Implemented forms-based security and **Windows** authentication, **OAuth** authentication and **Web Forms**.
- Used the **Route Provider service** to connect views and controllers in **AngularJS**.
- Migrated Application from **Knockouts** and **AngularJS** to **Angular 13**.
- Implemented client-side common libraries by using **Angular 13**, **Vue.js**.
- Implemented business logic, data exchange, **XML** processing and created graphics using **ETL**, **python3**.
- Used **Rabbit MQ**, **jQuery** and **AJAX** to make asynchronous calls to the server that can be processed by **ASP.Net Core MVC controllers**.
- Wrote complex **T-SQL** queries for data extraction.
- Deployed **Micro frontend**, **Microsoft Azure Cloud Service (PaaS, IaaS)** and **Web Apps**.
- Developed **SOAP**, **WinForms**, **GraphQL**, **REST APIs** for **Azure Service Fabric Stateless Micro services** using **ASP.NET Core**.
- Developed a **Single Page Application (SPA)** using **Angular 13** framework to bind data to specific views and synchronise with the server.
- Used **Rabbit MQ**, **MVC5 new Attribute Based Routing functionality** to achieve URL control.
- Developed business logic in **Python3** for planning and tracking functions using **PowerShell**.
- Developed **MVC** and **web forms**.
- Used **Razor** Syntax to create views for various pages.
- Used **event handlers** with **JavaScript**, **Typescript**, **Entity Framework**, and **SQL Server** databases to improve logging on public-facing **Angular 13** pages.
- Created a **JSON-returning SOAP**, **GraphQL**, **RESTful web service** using **Entity Framework** and **ASP.NET Core WebAPI**, **SOAP/Rest**.
- Developed **single-page applications (SPA)** using Web UI, **Angular 13**, **TypeScript**, **Vue.js** and **Bootstrap**.
- Worked on **Mac**, **Windows**, and **Linux (Ubuntu)** responsible for **front-end UI** development with **HTML5**, **SCSS**, **Typescript**, **Vue.js** and **React**.
- Restrict the applications from potential security threats like **XSS**, **CSRF** and fixed all of them like vulnerability and **SQL Injection**.
- Developed a web application with a **Web UI**, **Angular 13** and **Vue.js** front-end and a **SOAP**, **REST**, **Web API** for data transfer to the back end.
- Used **JIRA** frequently to log issues and track development progress.

Environment: .NET Core, Angular 13, Azure, Bootstrap, C#, CSS, Entity Framework Core, Gherkin Automation, GIT, HTML5, IIS, JavaScript, jQuery, MS SQL Server 2014, Python3, Visual Studio 2019, Visual Studio Code, WCF, Web Services, XML.

Client: Centene Corporation, Bangalore
2018

Oct 2016 to Aug

Role: Dot Net Developer

Responsibilities:

- Design **database** structures, including **tables**, **stored procedures**, **views**, **indexes**, and **relationships**.
- Writing **SQL**, **Docker Containers** scripts to migrate data from various sources using **SQL Integration Services (SSIS)**.
- Developed **SQL** scripts for data sets to generate reports using **SQL Server Reporting Services (SSRS)**.
- Developed web-based database-driven intranet applications and components to meet corporate needs utilising **ASP.NET**, **C#.NET**, **ADO.NET**, and **MVC 3.0**.
- Used **Visual Studio 2013** to design and construct an **ASP.NET MVC** Framework application.
- Developed **WCF**-based web services for client communication and data exchange.
- Extensive experience designing backend applications using **ETL**, **Python3** and the **Django** Framework.
- Develop web applications with the **ASP.NET Web API** and **AKS**, **OpenShift**.
- Used **jQuery** for Client-Side Validations, calling the Controller Actions, and making calls to the **WCF** Services.
- Used **ASP.NET** Validation Controls and was involved in Client-side validations using **JavaScript**.
- Used **SOAP**, **REST**, **AJAX** Controls such as **Script Manager** and Update Panel to develop the rich User Interface
- Used **ADO.NET**, **Entity Framework** extensively for retrieving, querying and manipulating data in the **SQL SEREVR 2012**.
- Extensively used **Python3** modules such as requests, urllib and urllib2 for web crawling.
- Used **Cascading Style Sheets (CSS)** classes to maintain the uniformity throughout the application
- Strong skills in **Python3**, **SQL** and **PL/SQL**. Backend programming, creating database objects like Stored Procedures, Functions, Cursors, Triggers, and Packages.
- Worked on **Agile Methodology (Scrum Framework)** to meet timelines with quality deliverables.
- Directly accountable for various aspects of product design including assessment, coding, testing and optimization.
- Involved in code reviews and performance improvement as well as documentation.
- Provided production and end user support as well as involved in bug fixes using user acceptance testing environment.

Environment: ADO.NET, Agile Methodology, AJAX, Angular JS, ASP.NET, ASP.NET WEB API, C#.NET, CSS3, GIS, HTML5, IIS, JavaScript, jQuery, jQuery UI, MVC 3.0, PL/SQL, Python3, SQL SERVER 2008 / 2012, SSRS, T-SQL, Visual Studio 2013, Visual Studio Code, WCF.

Client: Fingent, Bangalore, India
2016

Jun 2015 to Sept

Role: .Net Developer

Responsibilities:

- Developed and implemented **WinForms**, **Web Forms** and in **ASP.NET** and **C#**.
- Developed an **ASP.NET** application using **agile** methodology in an **N-tier** design.
- Worked on **Software Development Life Cycle (SDLC)** analysis, design, and implementation.
- Used **SOAP**, **REST**, **MS Vision** to create class, use case, and sequence diagrams.
- Created custom **HTML**, **DHTML**, and **CSS** templates for a consistent user interface design.
- Developed a **WCF** service for **ASP.NET** apps.
- Design **AWS lambda**, **Redis**, **Event Grid**, **Redis queues** templates to create custom sized VPC, subnets, NAT to ensure successful deployment of web applications and database templates.
- Created **Ajax-driven MVC** partial views and **AKS**, **OpenShift**.
- Developed the application using **User Control** and the **Ajax Toolkit** and **SSRS Reports**.
- Used **JavaScript** and **.NET Validation Controls** for client-side validation.
- Worked with team of developers on **Python3** applications for RISK management.
- Involved in **Implement Forms Authentication Security** and working with **ADO .NET Entity Framework**.
- Developed **Dynamic web applications** with **AJAX** and **WebSocket's**.
- Created a master page with **CSS** to ensure inherited web pages have a consistent look and feel.
- Used **session management** to keep session objects in their correct state.
- Configured security features for the application using **form-based authentication** and **role-based authorization** in **C#** and **ASP.NET**.
- Developed **SOAP-based Web Service classes**, **Docker Containers** to communicate with legacy systems and deploy as needed for business requirements.
- Developed web services to synchronise data across remote and online databases using **C#.Net**, **ASP.Net**, and **Visual Studio**.
- Created **ASP .NET User Controls** and Components to reduce the complexity of user interface design.
- Experience with **Visual Source Safe (VSS)** and **Team Foundation Server (TFS)**.

Environment: ADO.Net, ASP.NET 3.5, HTML, IIS 7.0, MVC, N-Unit, SQL Server 2008, Visual Studio 2010, WCF, Win Forms, Windows Services, .NET Framework 4.0.
