PROFESSIONAL SUMMARY

Thorough SQL Developer with expert grasp of SQL code generation, analytics, reporting and business intelligence. Diverse knowledge of complex T-SQL coding instances. Conversant in up-to-date and legacy programming languages, standards and tools. Adept in leading all stages of software development and troubleshooting.

SKILLS

- SQL2019
- VB.NET
- SSIS
- DevOps
- QlikSense
- SQL analytics
- Database design
- Infor
- SQL2016
- C#
- Azure
- PowerShell
- PaaS
- SQL development
- Advanced SQL queries
- Syteline

WORK HISTORY

SQL DEVELOPER

06/2021 to 09/2024

Millennium Contractors | Remote

- Responsible for configuring pipelines for deploying new Application Release to 13 environments
- Created Stored Procedures to perform pre-deployment tasks, turn off and on backup jobs, verify configuration files had needed updates after deployment, check database rows for updates before and after deployments
- Create jobs with SSMS to perform tasks to archive log shipping databases
- Create T-SQL statements for ad hoc reporting for managers and other customers upon request approval within the ticket system
- Troubleshoot Applications and Infrastructure resources hosted in Azure
- Support all Cloud Resources in Azure
- Started Implementing AI services to deployment processes
- Develop, monitor and receive alerts for errors and performance
- Develop and manage CI/CD process for different types of application and automate as many processes as possible
- Completed ongoing training on Azure Cloud Technological aspects
- Successfully collaborated with 50 peers to achieve the companies' goals
- Mentored all new incoming applicants in configuring and working in the Azure environment, and general daily operations
- Assisted Implementing PaaS and SaaS into the 13 environments

- Researched and Implemented PowerShell in conjunction with stored procedures to streamline deployment processes
- Work in an Agile environment to support individuals on proper DevOps practices
- Manage and support customer environments in Microsoft Azure cloud
- Manage the full release process
- Supported multiple countries with Production issues
- Assisted in Smoke tests of deployed releases
- Worked with vendor to resolve any bugs in the application
- Support development teams in technical questions of continuous integration/continuous delivery
- Consult customers on technical aspects of installation, sizing, scaling
- Develop, implement and maintain CI/CD pipeline to system integration environment
- Configured new servers to be released for production

SQL DEVELOPER/WEB DEVELOPER/DBA

12/2020 to 07/2021

Aureus Consulting | Remote

- Backup, restore databases to production and local SQL server development
- Configured SSRS for reporting and Subscriptions
- Developed stored procedures for reporting
- Created data dictionary, and documentation SSRS2017
- Create complex SQL stored procedures using SQL2019
- Gathered Business requirements from end users for reports; Convert Oracle reports to SSRS
- Analyzed existing SQL queries to identify opportunities for improvements.
- Developed efficient stored procedures for complex business logic, reducing processing time and improving system stability.
- Maintained complex T-SQL queries, views, and stored procedures in multi-database environment with little supervision.
- Developed custom database objects, stored procedures, and delivered application support.

SQL DEVELOPER/SSRS DEVELOPER

06/2020 to 11/2020

The Green Technology Group LLC | Remote

- Backup, restore databases to production and local SQL server development
- Configured SSRS for reporting and Subscriptions
- Developed stored procedures for reporting; Created data dictionary, and documentation SSRS2016
- Create complex SQL stored procedures using SQL2019
- Gathered Business requirements from end users for reports
- Converted Oracle reports to SSRS
- Migrated data from Oracle12C to SQL2019
- Analyzed existing SQL queries to identify opportunities for improvements.

- Developed efficient stored procedures for complex business logic, reducing processing time and improving system stability.
- Developed, implemented and optimized stored procedures and functions using T-SQL.

SQL DEVELOPER/DATABASE ADMINISTRATOR/DATA ANALYST 02/2020 to 06/2020

Marianna Industries Inc/ | Omaha, NE /Remote

- Backup, restore databases to production and Dev SQL server(development)
- Install and configure SQL2019 database
- Configured SSRS for reporting
- Created data dictionary, and documentation of AS400 to SQL2019
- Create Indexes, Triggers, PowerShell; Maintain Database security and integrity, Debug performance issues
- Extract data from acquisitions to conform to AS400 data structure and SQL2019
- Create complex SQL stored procedures triggers using SQL2019
- Worked with 3rd Party vendors to resolve data issues, and create SSIS packages using Visual Studio2016
- Business requirements gathered from end users
- Installed High Availability, Publication, Always On
- Develop Dashboards for all divisions within the company
- Created connection to AS400 to QlikSense for real time reporting
- Analyzed existing SQL queries to identify opportunities for improvements.
- Developed efficient stored procedures for complex business logic, reducing processing time and improving system stability.

SQL DEVELOPER/DATABASE ADMINISTRATOR 12/2018 to 04/2019

F.E.S | Lincoln, NE

- Backup, restore databases to production and Dev SQL server(development)
- Create Indexes, Triggers, PowerShell
- Managed Postgres DBs and created stored procedures, tables, stored procedures
- Maintain Database security and integrity
- Performed ETL functions to bring Postgres databases structures and data to SQL
- Debug performance issues
- Create complex SQL stored procedures, function and SSIS packages using SQL2012,2017
- Obtained vast knowledge of Data Modeling
- Monitored and alleviated bottleneck in data usage, within poorly written stored procedures and indexes
- Worked with 3rd Party vendors to resolve data issues
- Gathered Business requirements from end users

SQL DEVELOPER/DATABASE ADMINISTRATOR/SSRS DEVELOPER

07/2016 to 11/2018

Smart Chicken | Waverly, Ne

- Backup, restore databases to production and development; Create Indexes, Triggers
- Maintained Database security and integrity, Debug performance issues
- Create complex SQL stored procedures, function and SSIS packages using SQL2016,2019
- Developed ETL Project to transform Sales Data into useable information for daily operations for sales team
- Implemented High Availability, Publication, Always On
- Collaborated with Primary DBA while designing and implementing DW for QlikSense
- Develop and test new reports and perform maintenance of existing reports
- Created processes to extract sales data from email attachments and insert them into DW using CTEs and Stored procedures
- Creating reports using SQL SSRS2016
- Worked with 3rd Party vendors to resolve data issues
- Designed PowerShell Script to pull Weather services near grower farms
- Business requirements gathered from end users
- Maintained QLIK SENSE Server

SQL DEVELOPER/SSRS DEVELOPER/ETL DEVELOPER 02/2012 to 06/2016

American Alarm & Communications | Arlington, MA

- Backup and restore production and development databases
- Develop event and triggers in Infor Syteline
- Edited, created new forms for Syteline Infor
- Edited and created new buttons, dropdowns, radio buttons, including the code to edit and create new actions
- Created ETL scripts to insert data into Syteline databases
- DBA duties performance tuning, profiling security
- Create complex SQL stored procedures, function and SSIS packages using SQL2008,2012
- Migrate data from legacy system to new system using ETL and SSIS packages on a time sensitive schedule
- Worked closely with other team members to provide the best IT solutions for the company
- Develop and test new reports and perform maintenance of existing reports
- Used 5PM to track progress of projects
- Advise proper SSRS standards and created documentation on standard set forth for report formatting
- Creating reports using SQL SSRS2008,2012
- Worked with 3rd Party vendors to resolve data issues
- Business requirements gathered from end users
- Mentor Interns with editing SSRS reports and stored procedures

DEVELOPER

02/2011 to 02/2012

Omaha Public School | Omaha, NE

- Created complex SQL stored procedures using SQL2008
- Maintained data integrity of new and existing code
- Gathered requirements from users
- Developed new reports and perform maintenance of existing reports
- Used Team Pulse to track progress of projects
- Advised proper SSRS standards and created documentation on standard set forth for report formatting
- Created reports using SQL SSRS2008
- Coded and documented new utility applications using VB.Net
- Worked with a team of 10 developers to deliver the best solutions

SQL/VB.NET/SSRS DEVELOPER

01/2007 to 01/2011

State of Iowa | Des Moines, IA

- Create complex SQL stored procedures using SQL2005 and 2008; Worked in a team of 26 to meet strict deadlines providing best front end and back-end solutions
- Mentored ITSS3 and ITSS2; Maintain SharePoint Site and Deploying reports
- Granted security to different directories
- Edited and created new buttons, dropdowns, radio buttons, including the code to edit and create new actions in Syteline Infor
- Edited code within the forms of Syteline Infor
- Performed data pulls from DB2 to use in SSRS report by inserting into data warehouse
- Linked SQL to DB2 for direct access to data
- Created reports using SQL SSRS2005
- Performed maintenance to ASP .NET applications and VB.NET applications
- Use web services to send email with Global360
- Maintain C# applications designed by other developers
- Used LINQ within web site to efficiently display and retrieve data for providers to see
- Kept Iowa Medicaid Enterprise website up to date with current and relative information for members and providers
- Code and document new utility applications using VB.NET

EDUCATION

Bachelor of Science | Computer Science

05/2005

Bellevue University, Bellevue, NE

Associate of Science | Computer Science

05/2003

Southwestern Community College, Creston, IA

ACCOMPLISHMENTS

- Achieved peer manual tasks by 30% through effectively helping with creating automated tasks to reduce manual scanning, and data entry.
- First ever to receive profit sharing without 12 months of tenure.
