

Sonia Rai

DevOps Engineer

Texas, USA

+1 (647) 548-9193 | Email: soniamohla06@gmail.com | LinkedIn: www.linkedin.com/in/s-sharma-bb758a324

Professional Summary:

- DevOps Engineer with **10 years** of experience facilitating collaboration between development and operations teams, and **4 years** as a Java Developer and Automation QA Analyst.
 - Successfully increased delivery efficiency by adopting streamlined DevOps processes.
 - Proven expertise in cloud infrastructure management using **AWS** and **Azure**, optimizing system scalability and reducing cloud costs efficiently.
 - Strong focus on automating manual processes, reducing release cycle time by implementing **CI/CD pipelines** and **Agile** methodologies.
 - Expertise in containerization technologies (**Docker, Kubernetes**), **IaC (Infrastructure as Code)** using **Terraform**, and **configuration management** with **Ansible**.
 - Skilled in building and managing Kubernetes clusters with **Argo CD (Git Ops)**, resulting in a **reduction** in deployment time and improving environment consistency.
 - Deep understanding of security best practices with **RBAC, IAM roles, and policies**, and ensuring **compliance** in both the cloud platform **AWS** and **Azure** environments, reduced unauthorized access incidents.
 - Proficiency in Databases, i.e., **MySQL, MongoDB, and Redis**.
-

Technical Skills:

- **Cloud Technologies:** AWS, Azure
 - **AWS Services:** EC2, S3, Lambda, IAM, CloudFront, CloudFormation, VPC, Route 53, SNS, EKS, Fargate
 - **Azure Services:** Azure VM, Azure IAM, Azure Entra ID, AKS, Azure Functions, Azure Storage, Azure CLI, Azure Key Vault.
 - **Operating Systems:** Linux, Ubuntu, Windows
 - **Version Control:** Git, GitHub
 - **CI/CD Tools:** Jenkins, Azure Pipeline, Argo CD
 - **Containerization:** Docker, Kubernetes, Helm
 - **IaC (Infrastructure as Code):** Terraform, Ansible
 - **Scripting:** Python, Shell, Bash, Java, JavaScript, Groovy, ActionScript, HTML, Bootstrap, Selenium
 - **Databases-** MySQL server, MongoDB, Redis
 - **Monitoring & Logging:** Prometheus, Grafana, ELK Stack, CloudWatch, Nagios, Azure Monitor, Log Analytics
 - **Source Code Analysis:** SonarQube
 - **Project Management:** JIRA
-

Professional Experience:

Deloitte – DevOps Engineer

Texas, USA | Sept 2019 – Present

- Designed and implemented **CI/CD pipelines** for multi-tier microservices on **Azure & AWS**, improved release efficiency.
- Automated continuous delivery with **Argo CD (Git Ops)**, reducing deployment time from hours to minutes, and improving developer productivity.
- Orchestrated containerized applications using **Docker** on **AWS EKS**, reduced configuration time with **Helm charts**.
- Deployed **Azure resources** using **ARM templates** and **Terraform**, improving infrastructure provisioning time and ensuring compliance with company standards.
- Reduced **Azure Blob storage** costs by implementing **Azure Functions** to automate storage optimization.
- Executed **Azure Key Vault** for centralized management of secrets, certificates, and keys, improving security compliance and reducing the risk of data breaches by securely storing sensitive information.
- Used **AWS Lambda** for serverless application deployment, reducing infrastructure management overhead, while achieving a **reduction in operational costs** by eliminating the need for provisioned servers.
- Migrated on-premises applications to **AWS**, resulting in a **reduction** in infrastructure costs and **improvement** in application performance.
- Established proactive **monitoring and alerting** using **Prometheus, Grafana, ELK Stack, and Azure Monitor**, decreasing incident detection and resolution time.
- Incorporated **security testing** into **CI/CD pipelines** with **SonarQube**, reducing security vulnerabilities.
- Applied **IAM roles** and **VPC configurations** on **AWS**, enhancing security and reducing unauthorized access incidents.

The AppLabb – AWS DevOps Engineer

Toronto, Canada | Jan 2019 – Aug 2019

- Optimized **CI/CD pipelines** using **Jenkins** and **GitHub**, reducing software delivery lead time and improving deployment reliability.
- Automated deployment and scaling of e-commerce applications using **Docker and Kubernetes**, reducing manual intervention, enhancing resource utilization, and improving management efficiency.
- Utilized **Ansible** and **Terraform** to provision and manage **AWS infrastructure**, achieving a **reduction** in resource deployment time.
- Managed **AWS services** (EC2, S3, RDS, Lambda), optimizing monthly AWS costs and ensuring service availability.
- Systemized server configurations and application deployments using **Ansible**, reducing manual intervention.
- Applied **CloudWatch alerts & Nagios** for **EC2 instances** integrated with **Auto-Scaling**, improving application performance.

Promien Services Ltd. – AWS DevOps Engineer

India | Jan 2018 – Dec 2018

- Merged with **Jenkins, Git, and Maven** to automate build and deployment processes, improving deployment speed.

- Wrote **Ansible Playbooks** to automate system configurations, reducing manual intervention and improving consistency.
- Created **optimized Docker images**, reducing container resource consumption by enhancing application performance and accelerating deployment speed.
- Managed **EC2 instances**, **VPC**, and other AWS resources to ensure **100% uptime** of cloud infrastructure.
- Administered **IAM roles**, **S3 buckets**, and **CloudWatch monitoring**, reducing security incidents.

Fareportal India Pvt. Ltd. (CheapOAir) – Junior DevOps Engineer
India | Nov 2014 – Dec 2017

- Automated CI/CD with **Jenkins** and **Git**, reducing **build failures**.
- Containerized applications using **Docker and Kubernetes**, improving **deployment speed**.
- Deployed Kubernetes clusters with **Prometheus and Grafana**, enhancing **monitoring**.
- Streamlined **Git-Jenkins integration**, cutting huge manual errors.

Rocketalk India Pvt. Ltd. (Mobile-based) - Senior QA Analyst
India | Dec 2009 – Dec 2011

- Led **end-to-end software testing and development**, achieving **100% test coverage**, scaling the user base **7x (1M to 7M)**, and improving mobile site load times.

Hughes Systique India Pvt. Ltd. (Telecom) - Software Engineer
India | Jan 2007 – Dec 2009

- Developed and implemented core features for mobile applications using **ActionScript and Java**, increasing **user engagement**, **faster application performance**, and a **reduction in crash rates**.

Education:

- **Postgraduate: M.C.A (Master of Computer Application)** – G.G.S. Indraprastha University, Delhi, India – 2006
- **Graduate: B.Sc. Statistics (Hons.)** – Sri Venkateswara College, Delhi University, India – 2003

Certifications:

<https://www.credly.com/users/sonia-rai>

- **MS Azure Fundamentals**
- **MS Azure Administrator Associate**
- **MS DevOps Engineer Expert**
