Summary Statement

Motivated Computer Science Graduate with proficiency in C++, Java, MySQL, as well as familiar with multiple other languages, and experienced both Front-End and Back-End development via various academic and personal projects. Very familiar with engineering process and how it relates to the software development process. Proven skills in communication and teamwork. Comfortable with Agile development styles.

Technical Skills

- **Beginner-** Go, Rust, SQLite, Swift
- **Familiar-** Python, Azure, .Net, JavaScript, Git
- **Advanced-** C++, Java, MySQL, C#, Git, HTML

Skills

- **Dedicated to utilizing the problem-solving process with proper documentation**
- **Experienced collaboration in developing software while utilizing various forms of communication and version control software.**

Accomplishments

-
- Created a Java project that properly measured and tested sorting methods, which were then saved in a text file. Another Java Application was then created to read these files and display a variety of performance statistics
- Built a Parser for a basic programming language on UNIX Systems utilizing C++, Bison, and Flex
- Developed a small-scale game solo utilizing Unity and C#, featuring input handling, a Graphical User Interface, and a functioning state machine.
- Created multiple functional web interfaces via HTML and PHP
- Drafted and documented the testing process of an application.

Projects

Raytracer(C++)

- Creates a variety of images by simulating the travel path of rays of light in an environment.
- Built from the ground up in C++ and compiled using Make and g++

2D Game Engine(C++)

- Creates a display window using SDL3, and simulates a 2D environment of a 2D game
- Built in C++ using Make and g++

Recreation of Breakout (Python, SQLite)

- Worked with a team of 5 other developers over a span of 7 weeks to recreate the arcade game Breakout in Python with SQLite for a high score system
- Coordinated with team members schedules, dues dates, and feature growth over period of project
- Planned, formatted, and documented entire Test plans documentation

Education

Bachelor's Degree of Computer Science

July 2024-August 2025

University of Maryland, Global Campus

GPA: 3.7
