SUMMARY

Data Analyst with 5+ years of experience delivering enterprise-level analytics, automation, and business intelligence solutions across **healthcare, technology, and financial services**. Proven ability to design and implement **data pipelines, predictive models, and interactive dashboards** using **SQL, Python, Tableau, Power BI, and Alteryx**, empowering leadership with actionable insights and operational transparency. Hands-on expertise in **cloud data ecosystems (AWS, Azure, Snowflake)**, **ETL automation (Airflow, Glue, Data Factory)**, and **machine learning (scikit-learn, TensorFlow, Azure ML)** to drive forecasting, anomaly detection, and decision optimization. Known for partnering with cross-functional teams including **finance, risk, and operations leaders** to translate complex data into scalable, compliant, and high-impact business solutions.

PROFESSIONAL EXPERIENCE

Molina Healthcare

TX, USA

Data Analyst

Jan 2025 - Present

- Designed and deployed end-to-end data models and dashboards in **SQL, Tableau, and Power BI**, enabling real-time visibility into **50+ KPIs** across financial and operational domains.
- Automated ETL pipelines with **Python, Alteryx, and Azure Data Factory**, reducing manual reporting by **100+ hours monthly** and boosting data accuracy for leadership insights.
- Integrated **10M+ records** from Oracle, MySQL, and Snowflake into **Azure Synapse Analytics**, ensuring **SOX and Basel III** compliance and high-fidelity data integrity.
- Partnered with finance and risk teams to conduct **forecasting and scenario modeling**, driving improved **liquidity planning** across multi-billion-dollar portfolios.
- Migrated **10+ legacy reports** into **Azure-native BI solutions**, increasing scalability and cutting infrastructure costs while standardizing enterprise analytics delivery.
- Applied **predictive analytics in Python and Azure ML** to detect anomalies in trade settlements, strengthening **fraud detection** and regulatory compliance across systems.

Uber

TX, USA

Data Analyst Intern

Jun 2024 - Dec 2024

- Developed **automated data pipelines** using Python, Alteryx, Apache Airflow, and **AWS Glue**, reducing manual preparation by **150+ hours monthly** and accelerating data delivery by **40%**.
- Designed and deployed **real-time analytics dashboards** in **AWS QuickSight, Tableau, and Power BI**, enabling executives to monitor **ride demand, revenue trends, and driver KPIs** across regions.
- Applied **machine-learning models in AWS SageMaker** to forecast market demand and optimize **resource allocation**, increasing prediction accuracy and operational efficiency.
- Migrated **10+ legacy workflows** into **AWS-native infrastructure (S3, Redshift, Lambda, EMR)**, improving scalability, reducing data latency, and enhancing compliance with internal audit standards.

IBM & Kyndryl

India

Sr. Data Analyst

Mar 2019 - Nov 2022

- Engineered **enterprise-grade ETL pipelines** using SQL, Python, and Apache Airflow, automating workflows and saving **over 500 manual reporting hours annually** across global delivery teams.
- Deployed **predictive models** with scikit-learn and Pandas to forecast **multi-million-dollar sales pipelines**, enabling data-driven decisions across **12 international business units**.
- Built **fraud and anomaly detection systems** in AWS SageMaker, preventing **hundreds of high-value transaction errors** and ensuring compliance with financial audit requirements.
- Designed a **data-quality and validation framework** with SQL reconciliation scripts, resolving **5,000+ data inconsistencies** and standardizing enterprise-wide data integrity.
- Migrated **legacy reporting platforms** into AWS Redshift, Azure Synapse, and S3, supporting analytics on **50M+ records** and enabling faster access to enterprise datasets.
- Automated **Tableau and Power BI dashboards**, delivering self-service analytics to **300+ business users** and eliminating repetitive ad-hoc reporting requests each week.
- Conducted **A/B testing and causal inference** on product adoption strategies, influencing **15+ go-to-market initiatives** across telecom and financial client portfolios.
- Integrated **Kafka streaming data** into real-time BI dashboards, providing executives with operational visibility across **10+ live business functions**.
- Developed **time-series forecasting models** for demand and revenue planning, supporting financial decisions on portfolios exceeding **\$200M in annual revenue**.

- Built and optimized **ETL pipelines** using SQL, Python, and Alteryx, automating reporting workflows and saving **over 400 manual data-processing hours annually** across sales and operations teams.
- Developed **interactive dashboards** in Tableau and Power BI covering revenue, churn, and supply chain KPIs, enabling **executive visibility into performance across 10+ global regions**.
- Designed and deployed **churn prediction models** using logistic regression and decision trees, supporting retention strategies for **thousands of enterprise customer accounts**.
- Integrated and validated **multi-source datasets** from Oracle, MySQL, and Excel, reconciling **millions of transaction records** and improving enterprise reporting reliability.
- Supported migration of analytical workloads to **AWS Redshift and Snowflake**, enhancing data accessibility and enabling **real-time insights across business units**.
- Conducted **root-cause analysis and forecasting** for sales pipeline drop-offs, generating insights that contributed to **notable gains in deal conversion and revenue outcomes**.

TECHNICAL SKILLS

Data Analysis & BI Tools: SQL, Tableau, Power BI, AWS QuickSight, Excel (PivotTables, Power Query, VBA), KPI Tracking, Data Storytelling

Programming & Scripting: Python (Pandas, NumPy, scikit-learn, Matplotlib, Seaborn), R (tidyverse, ggplot2), Forecasting, Predictive Analytics, Statistical Modeling

ETL & Data Engineering: Alteryx, Apache Airflow, AWS Glue, Azure Data Factory, Data Preparation & Cleansing

Databases & Data Warehousing: Snowflake, Oracle, MySQL, PostgreSQL, Microsoft SQL Server, AWS Redshift, Azure Synapse Analytics, S3

Cloud Platforms: AWS (S3, Redshift, Glue, SageMaker, Lambda), Azure (Synapse, Data Factory, ML, Databricks)

Machine Learning & Advanced Analytics: Time-Series Forecasting, Anomaly Detection, Fraud Detection, Regression & Classification Models, Model Deployment (SageMaker, Azure ML)

Data Visualization & Reporting: Dashboards, KPI Development, Tableau Calculations, DAX (Power BI), Self-Service BI

Data Quality & Testing: Data Validation, Data Reconciliation, SQL-based QA, Data Integrity Frameworks

Agile & Collaboration: Agile/Scrum, Jira, Confluence, GitHub, MS Teams, Slack

EDUCATION

Northwest Missouri State University
Masters in Computer Science

MO,USA
Jan 2023 - Apr 2024

PROJECTS

Healthcare Claims Analytics Dashboard:
Developed an end-to-end ETL and Tableau dashboard solution integrating 3M+ healthcare claims via Alteryx and Azure Data Factory, enabling anomaly detection and real-time compliance insights across provider networks.

Ride Demand Forecasting & Optimization:
Built AWS-based Airflow and SageMaker pipelines to forecast ride demand using time-series models, powering QuickSight dashboards that optimized regional resource allocation and operational planning.
