

Sai Ganesh Rao

Full Stack Developer

saiganeshraopatike@gmail.com | +1 (314) 574-9801 | Seattle, WA | [LinkedIn](#)

SUMMARY

- Python Full Stack Developer with around 5 years of experience building scalable, high-performance web applications using Python (Django/FastAPI/Flask), React, TypeScript, and GraphQL.
- Strong expertise in designing and optimizing RESTful/GraphQL APIs, improving database performance, and delivering secure, high-traffic user experiences across enterprise and e-commerce domains.
- Proficient in Docker, Kubernetes, AWS, and Azure, with hands-on experience in CI/CD pipelines, Terraform, and cloud-native microservices architecture.
- Committed to secure coding and Agile methodologies, with proven skills in OAuth 2.0, JWT, PyTest, Selenium, and mentoring junior developers through collaborative code reviews and technical guidance.

PROFESSIONAL EXPERIENCE

Full Stack Developer, Shopify

04/2024 – Present | USA

- Leading development of end-to-end web modules using Python (FastAPI/Django) and React, supporting high-traffic e-commerce experiences across global merchants.
- Built and deployed scalable microservices on AWS (ECS, Lambda, S3, RDS), improving system reliability and cutting deployment times by 40%.
- Designed and implemented GraphQL/REST APIs with optimized PostgreSQL queries and Redis caching, reducing data latency by 35%.
- Collaborated with cross-functional teams to deliver three major storefront enhancements that improved checkout speed and increased customer retention by 20%.
- Enhanced user experience through modern React (Hooks, Redux, TypeScript) interfaces with responsive design, improving load times and engagement rates.
- Integrated real-time event streaming using Kafka and WebSockets, enabling live order tracking and real-time inventory updates across multiple regions.
- Deployed automated CI/CD pipelines using GitHub Actions and Docker, ensuring consistent and faster rollouts across staging and production.
- Implemented unit, integration, and API testing with PyTest, Selenium, and Postman, improving code reliability and reducing post-release bugs by 25%.
- Strengthened data and application security through OAuth2.0, JWT authentication, and best practices for PCI-DSS compliance.
- Partnered with DevOps and Data Engineering teams to improve observability using ELK Stack and Datadog, reducing average issue resolution time by 30%.

Full Stack Developer, Accenture

06/2020 – 07/2023 | India

- Developed and maintained enterprise-scale web applications using Python (Django/Flask) and React/TypeScript, serving 50K+ concurrent users across multiple client platforms.
- Designed and optimized REST and GraphQL APIs, tuning PostgreSQL queries and indexes to reduce average response times by 40%.
- Led the migration of key modules from monolithic systems to Docker- and Kubernetes-based microservices, improving deployment frequency by 60% and fault isolation.
- Built reusable React component libraries and standardized UI patterns, boosting development velocity by 30% and ensuring consistent design across projects.
- Implemented caching with Redis and query optimizations that reduced database load and lowered p95 latency by 45% during high-traffic periods.
- Automated CI/CD pipelines using GitLab CI and Azure DevOps, cutting manual release steps and reducing release cycles from weekly to daily.
- Integrated third-party APIs and payment gateways using OAuth2.0 and JWT authentication, ensuring secure transactions and compliance with enterprise standards.
- Introduced automated testing frameworks with PyTest, Selenium, and Postman, reducing post-release defects by 25% and improving code reliability.
- Collaborated with DevOps and QA teams to implement observability dashboards using Prometheus and Grafana, reducing mean time to resolution (MTTR) by 35%.
- Mentored 3 junior developers through pair programming and code reviews, improving onboarding efficiency and overall team productivity.

EDUCATION

M.S. in Information Systems

Missouri, USA

Saint Louis University | GPA: 3.8 / 4.0

SKILLS

Languages & Frameworks: Python (Django, FastAPI, Flask), JavaScript (ES6+), TypeScript, React, Node.js, GraphQL, REST APIs, server-side rendering; experienced in full stack development across frontend and backend layers.

Frontend & UI: HTML5, CSS3 (Flexbox, Grid), React Hooks, Redux, TypeScript, responsive layouts, component-based architecture, code-splitting, lazy loading, and cross-browser compatibility; collaborative UI prototyping with Figma.

Backend & Server-Side: Design and development of RESTful/GraphQL APIs, microservices architecture, WebSockets/Kafka for real-time communication, Redis caching, Celery task queues, API Gateway management, and secure backend workflows.

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis; expertise in query optimization, indexing, schema design, ACID transactions, and database performance tuning for high-traffic and data-driven applications.

Cloud & DevOps: AWS (EC2, EKS, Lambda, RDS, S3), Azure (AKS, Functions, Cosmos DB), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Azure DevOps, CI/CD setup, and cloud monitoring (Prometheus, Grafana, Datadog).

Testing & QA: PyTest, Selenium, Postman, Cypress, unit testing, integration testing, test-driven development (TDD), and automated regression testing for continuous quality assurance.

Security & Best Practices: OAuth 2.0, JWT, PCI-DSS compliance, role-based access control, OWASP secure coding, input validation, and SQL injection/XSS prevention to ensure application security.

Version Control & Collaboration: Git, GitHub, GitLab, Bitbucket, Agile/Scrum, Jira, Confluence; experienced in peer code reviews, sprint planning, and cross-functional collaboration.

Soft Skills & Problem Solving: Analytical thinking, adaptability, project ownership, effective communication, mentorship, and strong time management with a focus on delivering measurable business outcomes.s
