PROFESSIONAL SUMMARY

- 6+ years of experience as a Business Analyst/Scrum Master and PO in all phases of SDLC across Waterfall, RUP, Agile/SCRUM aimed at Scoping, defining objectives and requirements and translating them into functional specifications and thereby analyzing them for further Design and Development.
- Expert at Scrum concepts like Product backlog, Sprint planning, User stories, Daily standup, burn down charts etc.
- Extensive experience in documenting existing process, preparing Business Capability Decomposition (BCD), analyzing Business Requirements, working with Requirements Traceability Matrix, re-engineering business processes and designing.
- Participate in business development efforts with clients to appraise, define and scope GIS.
- Extensive experience in facilitating JRP and JAD Sessions with Business User Community to the needs of both business side and the IT side.
- Comprehensive experience with SDLC requirement gathering, analysis, design, implementation, testing and deployment using Agile Scrum and Waterfall.
- Understanding of project planning and utilization of project management tools such as MS Project. Business Analysis using tools such as MS-Visio for Business Process diagrams, Functional Flow charts.
- Experience in Geographical Information Systems (GIS) domain.
- Have configured and trained end users on Microsoft Project Server 2010 and SharePoint O365/2013/2010/2007.
- Experienced reviewing and documenting system test plans, creating and executing test scripts.
- Proficient in Test Case Management, Requirement Management and Defect Tracking tools.
- Defining and documenting User Acceptance Test plans, scripts and resolving UAT test issues by working with end-users and technical staff.
- Handling spatial data, analyzing data using Arc GIS tools.
- Experience as a Business Analyst with business requirements gathering, building and formulating business requirements analysis, design, testing & implementation of new system functionalities.
- Used Planview to monitor and manage time, budgets, expenses for projects. Also, for enterprise agile planning and project portfolio management.
- Worked as Scrum of Scrum's for cross functional teams, taking the accountability of the project deadlines and deliverables.
- Coordinated with Business Users and Subject Matter Experts (SME's) in gathering and analyzing requirements for overall implementation to build a core (framework) of an application.
- Ability to understand and write SQL queries to extract data from Oracle, Cosmos and SQL databases.
- Well versed in developing project blueprints, scope documents and project charters.
- Experience working on Master Data Management, Risk Analysis, Risk Mitigation, Change Management, Problem Resolution and Data Mapping.
- Scrum as an asset: strong knowledge of all the concepts like Tasks, backlog tracking, velocity and user stories.

- Documented the Use Cases and prepared the Use Case Activity, Sequence diagrams and Logical views using MS Visio, MS Office, and Rational Rose for a clear understanding of the requirements by the development team.
- Used TFS, Azure Devops for organizing work within sprints.
- Conducted JAD sessions and Data modeling using UML & also worked on multiple modules.
- Conducted User Acceptance Testing (UAT) and developed the test (plans/scenarios/cases/data) for testing based on different business requirement.

TECHNICAL SKILLS

Methodologies	Agile, Waterfall, RUP, SAFe,UML, Postman, SDLC, Scrum, Kanban, RUP, ALM, V-shape modeling, BPEL, BPMN
Change Management Tools	Rational Clear Quest, Rational Clear Case
Business Modeling & Versioning Tools	MS VISIO, Visual Paradigm, Power BI, Rational Rose; Rational Requisite Pro, Rational Clear Case
MS Office	MS Project, MS Word, MS Excel, MS PowerPoint, MS Access
Programming Languages	C, Structured Query Language (SQL), COBOL, DB2
Operating System	Windows NT/98/2000/XP/7, Linux
Databases	Access, Oracle 8i/9i/10g, , DB2, DBU, Customer Portal, MS SQL Server 7.0/2000, DAX, DDM
Other known tools	Informatica, Load Runner, Win Runner, CYME, SSIS, SWIFT, SSRS, SAS and SSAS
OLAP Tools	Business Objects XI
Testing tools	TFS, Azure Devops, Rational Clear Quest Test Manager, HP Quality Center, Quick Test Test Professional, LoadRunner, WinRunner
Apps & Webservers	Apache web server, Tomcat, Web logic 8.1,REST API, Salesforce

PROFESSIONAL EXPERIENCE

Client: Techrobots

Nov 2023 - Current

Role: Senior Business analyst

Roles & Responsibilities:

- Liaison between stakeholder's system users, clients and managers, software development team and the QA team to gather requirements.
- Incorporated Agile Methodology and SCRUM techniques to manage requirements.
- Facilitated (JAD) Joint Application Development sessions to identify the business rules and requirements and then documented them in a format that can be reviewed and understood by both business and technical people.
- Studied and analyzed competitor's applications and brainstormed to gather effective requirements for a quality product.
- Engaged in project initiation activities such as developing the Project Charter, Project Scope and assisting the management in resource and budget estimation.

- Implemented business modeling, data modeling, and object modeling using MS Visio to develop the business architecture for the application.
- Analyzed Requirements and created Use Cases, Use Case Diagrams, Activity Diagrams using Enterprise Architect.
- Perform RTM (Requirement Traceability Matrix) at the end of each sprint to ensure the requirement is met.
- Created Test Strategy, developed UAT Test Cases and execution of Test Cases.

Environment: Agile/SCRUM, Windows 8, IE, JIRA, Master Data Management, Microsoft SQL Server 2008, SQL Queries, MS Access, My SQL, SSRS, MS Office.

Client: Verizon - Charlotte,Nc

Dec 2022 - Nov 2023

Role: Business analyst

Roles & Responsibilities:

- Designed, developed, deployed, and enhanced custom software healthcare application capabilities.
- Participated in Agile Scrum sprint planning, artifact creation, in-sprint testing, automated regression testing, demonstrations, retrospectives, and solution releases.
- Generated relevant metrics that helped the team members check their work progress.
- Used MS Visio for Process modelling and Business Process flow diagrams.
- Provided Maintenance and upgrade support for applications under Life Insurance Domain.
- Strong working knowledge of the 820, 835 & 834 EDI Healthcare files and Transactions.
- Exposed to Medicare and Medicaid domains of the healthcare systems and industry for inpatients, outpatients,
- Reimbursement Methodology.
- Extensive Knowledge in the Member Enrollment and Billing information.
- Knowledge and Experience on Membership, Billing, Claims Payment Processing in relation to HIPAA, EDI 4010, 5010 X12, CD-9 CD-10, codes 834, 837,835, and 270, 271.
- Supported release planning with conceptual design and development and the refinement of software engineering practices.
- Assisted internal and external communication, improving transparency, and radiating information.
- Resolved a complex infrastructure issue by creating and utilizing a professional network of Scrum.
- Masters, Product Owners and Technical Leads within the project.
- Decomposed backlog items into the software tasks based on the desired software architecture. Designed, developed, deployed, and enhanced custom software application capabilities.
- Lead efforts to identify and interview key stakeholders, SMEs, impacted parties.
- Review initiative overview, available documents, artifacts to quickly gain a high-level scope to gain an understanding of the underlying business need and timeline for the project.
- Proactively define scope for new initiatives, creating associated epics, technical user stories and tasks.
- Participated in Agile Scrum sprint planning, artifact creation, in-sprint testing, automated regression testing, demonstrations, retrospectives, and solution releases.
- Generated relevant metrics that helped the team members check their work progress.

- Supported release planning with conceptual design and development and the refinement of software engineering practices.
- Support QA, UAT efforts: creating, reviewing test plans, cases, and scripts as needed.
- Decomposed backlog items into the software tasks based on the desired software architecture

Environment: MS Office Tools, Windows XP, MS Project, Rational Rose, MS PowerPoint, MS-SharePoint, MS-Word, MS-Excel, Business Objects, XML, Oracle, SQL Server

Client: MAPFRE - Webster, MA

Nov 2021 – Dec 2022

Role: Business analyst

Roles & Responsibilities:

- Responsible for analyzing and gathering requirements along with Business Users to develop appropriate documents (Product Backlogs, user-stories) under Agile/SCRUM Framework.
- Create stories, sub tasks on JIRA and assign it to the team members.
- Performed data mapping from source to target systems to ensure the data is consistent and accurate in the target system.
- Worked with downstream teams to consume their services for CRV.
- Validate services by constructing requests and reading responses in Postman using the APIs.
- Validate the Schemas using AltovaXML Spy for the services.
- Perform a smoke test once the development is completed and work with QA to test the functionality of the service.
- Create samples using Postman for the services which are developed and turn over those stories to capability squads.
- As part of Master Data Management project, I used to extract and analyze the data using SQL queries from both SQL and Oracle Databases.
- Used to be a part of daily stand ups, backlog review, sprint planning, sprint retros, demo and risk analysis.

Environment: MS Word, MS Excel, MS PowerPoint, SQL, MS Visio, AltovaXML Spy, Oracle, Postman tool.

Client: IBM, India

Nov 2017 – July 2021

Role: Business analyst

Roles & Responsibilities:

- Involved in gathering business requirements from the end users and management
- Analyzed Requirements and created Use Cases, Use Case Diagrams, Sequence Diagrams using Rose.
- Used Rational Requisite Pro for Managing and Configuring the Requirement Analysis effort.
- Extracted the business requirements for E-commerce from various sessions with business leads and maintained them using Requisite Pro, tracing them all the way to the system artifacts.
- Planned, coordinated, and monitored project levels of performance and activities to ensure project completion in time.
- troubleshooting and resolving issues related to mainframe and SAP systems

- Created REST API services for ingesting daily incremental data in to MarkLogic
- Prioritized requirements to be developed according to Agile methodology.
- Performed extensive requirement analysis and gap analysis.
- Designed and generate comprehensive reports using SSRS, providing timely and accurate financial analysis, budgeting, and forecasting information to support executive decision-making and compliance requirements.
- Staying up to date with Salesforce releases, new features, and industry trends to identify opportunities for system enhancements or process improvements that could benefit the organization.
- Identify opportunities for process improvements, system enhancements, and cost reduction. Proactively review and assess the performance of mainframe systems and recommend optimization strategies.
- Facilitated (JAD) Joint Application Development sessions to identify business rules and requirements and then documented them in a format that can be reviewed and understood by both business people and technical people.
- Utilized SSIS to extract, transform, and load (ETL) financial data from various sources, ensuring data integrity and consistency for financial analysis and reporting purposes.
- Leverage Python for data manipulation and analysis tasks, utilizing libraries such as Pandas and NumPy to process and analyze complex financial datasets, perform statistical analysis, and develop financial models.
- Implement the KNN algorithm for financial data classification tasks, such as identifying fraudulent transactions, customer segmentation, and market trend analysis, enhancing risk management and investment strategies.
- Keep abreast of emerging technologies, advancements, and best practices in mainframe systems, and suggest innovative solutions to improve business processes and efficiency.
- Developed web pages using JSPs and JSTL to help end user make online submission of rebates. Also used XMLBeans for data mapping of XML into Java Objects.
- Implemented JavaScript and Swing based functionality in front end designing and rich user interface.
- Developed Profiling and performance tuning and loading content into Mark logic repository.
- Maintain records of web usage and traffic to site and prepare reports in user usability trends using the Adobe Analytics Report Builder.
- Create and customize reports using the Adobe Analytics Report Builder.
- Was involved in UAT testing.
- Testing the mainframe systems to ensure that they meet the defined requirements and perform as expected. This may involve creating test cases,
- Collaborating with stakeholders to design Salesforce workflows, custom objects, fields, validation rules, and page layouts based on business needs.
- Prepared user training manuals and successfully conducted user training sessions.
- Led an agile team of 15 as a Scrum Master in a critical project of data migration from Mongo DB to Azure of budget 3 million dollars by successfully facilitating scrum ceremonies and meetings.
- Conducted Sprint Planning, Sprint Review, Sprint Retrospective and daily standups for the teams to ensure smooth flow of the project.
- Evaluated and worked upon removing impediments either related to resource alignment or project execution.
- Extensively used JIRA and wiki pages to update related to project

Environment: Windows XP, Rational Rose, Python, SSRS, Power BI, Tableau, KNN, NumPy, MS Visio, Rational Requisite Pro, MarkLogic, UML, MS Project, Oracle 9i, MS Office, Java, Adobe analytics, UML, MS Word, SQL, Clear Quest, Test Director.

EDUCATION:

- Bachelors: Electronics And Communication Engineer - Vignana Bharathi Institute of Technology
Aushapur, Ghatkesar, Hyderabad, Telangana, India
- Masters: Wilmington University Masters In Information Assurance
