

Muqtadar Hussain

Senior Salesforce Developer

 muqtadarsyed1@gmail.com  +13128961960  Illinois, United States 61615  US Citizen

PROFESSIONAL SUMMARY

- Over 9+ years of experience as a Salesforce Developer and CRM Specialist, excelling in Administration, Development, Integration, Communities, and Lightning solutions. Expertise in **Sales Cloud, Service Cloud, Marketing Cloud, Commerce Cloud, Community Cloud, and Financial Services Cloud**. Skilled in advanced tools and technologies, including **Apex, Visualforce, Lightning Web Components (LWC), Aura, Copado, Mulesoft, Boomi, Workato, SOQL, SOSL, REST APIs, SOAP, Salesforce DX, Jenkins, GitLab CI, Data Loader, Tableau, and Power BI**. Proven ability to lead teams and deliver complex Salesforce projects to successful completion with a focus on innovation and efficiency.
- Extensive expertise in **Apex, Visualforce, and Lightning Components** to customize and extend Salesforce functionality.
- Proficient in creating scalable solutions with **Aura and Lightning Web Components (LWC)**.
- Advanced knowledge in **JavaScript, HTML, CSS, ReactJS, AngularJS, and jQuery** for dynamic web development.
- Strong experience in **Salesforce Service Cloud, Sales Cloud, and Commerce Cloud**, delivering end-to-end CRM solutions.
- Skilled in data visualization using **Microsoft Power BI, Tableau, and Sigma**.
- Expertise in integrating Salesforce with external systems using **Boomi, Mulesoft, Workato, and REST APIs**.
- Proficient in querying Salesforce data using **SOQL** and working with relational databases like **MySQL, PostgreSQL, and MongoDB**.
- I have worked with **Copado** to manage CI/CD pipelines, release automation, and version control.
- Knowledgeable in Agile project methodologies, collaborating effectively with Scrum teams for project delivery.
- Proficient in using **Process Builder, Workflows, and Validation Rules** for automating complex business processes.
- Expertise in backend integration using **C#/VB.Net, Microsoft .Net Framework, and Java or C#**.
- Developed and deployed **Apex Classes, Triggers**, and asynchronous processes like **Batch, Queueable, and Future classes**.
- Designed and implemented automation workflows with **Process Builder and Approval Processes**.
- Experienced in migrating legacy systems into Salesforce using **Apex Data Loader, Import Wizard**, and custom templates.
- Designed and deployed custom applications integrating Salesforce with **AWS, Azure, GCP**, and other external platforms.
- Skilled in creating interactive dashboards and reports with **Power BI, Tableau, and Sigma**.
- Developed Salesforce Mobile Apps using **Lightning Component Framework** for responsive layouts.
- Expertise in Salesforce integrations with external tools like **SAP, Dropbox, Gmail, and Outlook**.
- Proficient in creating data-driven insights using Salesforce **Reports and Dashboards**.
- Expertise in building complex data models, including custom objects, junction objects, and relationships.
- Designed Salesforce solutions for **Sales Cloud, Service Cloud, and Commerce Cloud** with tailored configurations.
- Skilled in developing and maintaining scalable CI/CD pipelines for Salesforce applications.
- Developed custom workflows using **Process Builder and Validation Rules** to automate manual tasks.
- Proficient in creating and maintaining Lightning applications using **Aura Framework and LWC**.
- Configured Salesforce with advanced fields like **Picklists, Field Dependencies, and Custom Formula Fields**.
- Designed and executed unit and integration tests for Salesforce solutions.
- Skilled in creating custom Salesforce APIs and integrating external systems via **REST APIs**.
- Built and deployed complex Salesforce solutions using **Copado** for streamlined development and deployments.
- Hands-on expertise in database management with **MySQL, PostgreSQL, and MongoDB**.
- Developed Salesforce customizations using tools like **Force.com IDE, Developer Console, and Eclipse IDE**.

- Proficient in creating and maintaining reusable **Lightning Web Components (LWC)** for scalable applications.
- Configured robust authentication systems using **OAuth 2.0** for secure data access.
- Integrated Salesforce with third-party applications, ensuring seamless CRM functionality.
- Designed Salesforce solutions for **Lead Management, Opportunity Management, and Case Management**.
- Configured Salesforce security models to ensure compliance with enterprise standards.
- Designed custom dashboards and reports for business leaders using **Tableau** and **Power BI**.
- Created and deployed advanced workflows for business automation with **Approval Processes**.
- Developed Salesforce integrations with external APIs using **JavaScript, C#, and REST APIs**.
- Experienced in Salesforce code optimization to meet business and performance requirements.
- Integrated Salesforce solutions with enterprise cloud platforms like **AWS, Azure, and GCP**.
- Deployed Salesforce applications across environments using **Copado** and CI/CD tools.
- Configured Salesforce data models to improve data quality and analytics.
- Proficient in troubleshooting and debugging Salesforce issues for seamless operations.
- Built Salesforce apps with interactive user interfaces using **ReactJS** and **AngularJS**.
- Delivered Salesforce solutions combining **Service Cloud, Sales Cloud, and Commerce Cloud** capabilities.
- Automated Salesforce deployments with Copado, reducing errors and improving efficiency.
- Migrated Salesforce systems to Lightning, enabling advanced UI/UX features.
- Designed Salesforce data pipelines using **SQL, SOQL**, and external database integrations.
- Built and maintained integrations with tools like **Boomi, Mulesoft, and Workato**.
- Delivered Salesforce solutions that aligned seamlessly with enterprise objectives and compliance standards.
- **Salesforce Administration** Extensive experience in configuring and customizing Salesforce, including **objects, fields, workflows, validation rules, and process automation**, ensuring data integrity, security, and compliance.
- **Development Expertise** Skilled in developing **Apex code** and **Visualforce pages** to extend Salesforce functionality, aligned with business processes and operational needs.
- **Integration Proficiency:** Proven experience integrating Salesforce with third-party tools such as **CPQ, JIRA, ServiceNow**, and marketing automation platforms to streamline workflows.
- Extensive experience as a **Lead Salesforce Developer**, serving as the primary point of contact for all Salesforce-related activities, including **administration, customization, and integration**.
- Strong knowledge in configuring and customizing **Salesforce objects, fields, workflows, validation rules, process automation**, and managing **third-party integrations** like **CPQ, JIRA, and ServiceNow**.
- Proficient in **Apex programming**, developing custom logic, and creating **Visualforce pages** to extend Salesforce functionality and improve user experience.
- Expertise in implementing complex Salesforce configurations, including **Workflows, Page Layouts, Record Types, Custom Settings, Dashboards, and Reports** to meet organizational requirements.
- Proven ability to design and develop **analytical reports, dashboards**, and deliver **data-driven insights** to stakeholders, enhancing decision-making processes.
- Hands-on experience with **Salesforce integrations** for marketing automation tools, ensuring seamless data flow across platforms while maintaining data integrity and compliance.
- Up-to-date knowledge of **Salesforce releases**, industry trends, and best practices, with certifications such as **Salesforce Application Architect** and expertise in driving **system automation and innovation**.

EDUCATION

Bachelor's in computer science
Jawaharlal Nehru Technological University.

CERTIFICATES

- Certified Salesforce Platform Developer-1
- Certified Salesforce Service Cloud Consultant
- Certified Salesforce Omni Studio Developer
- Certified Salesforce Administrator

TECHNICAL SKILLS

- **Cloud Expertise:** Sales Cloud, Service Cloud, Marketing Cloud, Commerce Cloud, Community Cloud, Financial Services Cloud.
- **Analytics and Reporting:** Reporting and dashboards for Sales, Service, and Custom Cloud.
- **Development:** Lightning Web Components (LWC), Aura Components, Visualforce Pages, Apex Triggers, and Controllers.
- **Data Management:** ETL processes, Data Loader, Workbench, Import Wizard.
- **Integration:** SOAP, REST APIs, Bulk APIs, and Outbound Messaging
- **Configuration Skills.**
- **Objects and Security:** SFDC Standard/Custom Objects, Record Types, Page Layout Configuration, Field and Object Level Security, Role Hierarchies, and Sharing Models.
- **Workflow and Automation:** Workflow Rules, Approval Processes, Time-Dependent Actions, Field Updates, Email Alerts, and Task Creation.
- **Customization:** Formula Fields, Cross-Object Formula Fields, Validation Rules, and Custom Applications.
- **Analytics:** Reports, Dashboards, Campaign Analytics.
- **Operating Systems:** Windows 7/8, Windows Server 2008/2012, Linux, Mac OS.
- **Programming Languages:** Java, Apex, JavaScript, HTML, CSS, JSP/ASP, C, C++, PL/SQL.
- **Project Methodology:** Agile, Waterfall.
- **Databases:** MS Access, SQLite, MySQL, SQL Server 2000/2012, Oracle 10g/9i, MongoDB.
- **Other Tools:** SOAP, REST, MVC, Salesforce CLI, Partner Community, Struts, Ant, Workbench, GitHub, Bitbucket, Visual Studio Code, Eclipse, Force.com IDE Plug-in, Excel Connector, nCino, Tableau, MS Visio.
- **Languages:** Apex, C, C++, Java.
- **Web Technologies:** HTML, DHTML, XHTML, CSS, JavaScript, AngularJS, NodeJS, PrimeFaces, JSP, AJAX, JSON.

- **Web Services:** Java EE, Servlets, JDBC, SOAP, RESTful Web Services, WSDL, XML, AWS.
- **Scripting:** JavaScript, JSON, AJAX,
- **Version Control:** GitHub, Bitbucket, Tortoise SVN.
- **Data Modeling:** MS Visio, Tableau, Infogram.
- **Salesforce Tools:** Force.com Eclipse IDE Plug-in, Force.com Explorer, Data Loader, Excel Connector, Force.com Platform (Sandbox and Production), Migration Tool.
- **Lightning Development:** Salesforce Lightning Design System (SLDS), Lightning Components, Aura Framework, JavaScript Controllers, Server-Side Controllers.
- **Salesforce Technologies:** Lightning Applications, Apex Classes, Triggers, SOQL, SOSL, Visualforce (Pages, Components, and Controllers), S-Controls, AJAX, Custom Objects, Dashboards, Analytic Snapshots.
- **Methodologies:** Agile, Waterfall.
- **Salesforce API Tools:** Eclipse, Apex Explorer, Offline Edition, AppExchange, Data Loader.

PROFESSIONAL EXPERIENCE

Role : Senior Salesforce Developer

12/2020 – present | Texas, United States

Client : Caterpillar Inc.

Responsibilities

- Developed and customized **Lightning Components** using **Salesforce Lightning Design System (SLDS)** for seamless UI and enhanced user experience.
- Built and migrated **Lightning Web Components (LWC)**, leveraging attributes, properties, and event-driven interactions.
- Designed and implemented **Aura Components** and integrated them with **Lightning Quick Actions**.
- Migrated **Visualforce Pages** to **LWC components**, ensuring compatibility and optimized record pages.
- **Consultant for Salesforce Sales Cloud, Service Cloud, Community Cloud, and Marketing Cloud**, providing tailored solutions to meet business needs.
- Performed real-time integration between **Salesforce** and **NetSuite** using **Dell Boomi**, ensuring seamless data flow and synchronization.
- Conducted **data modeling**, implemented advanced **security configurations**, and generated comprehensive reporting while adhering to **GDPR compliance** policies.
- Built **Lightning Web Components (LWC)**, **Flows**, **Visualforce Pages**, **Apex Classes**, **Triggers**, and process automation workflows to streamline business operations.
- Designed and implemented **Apex** and **Lightning Frameworks**, including **Lightning Patterns** and an **Error Logging Framework**, to enhance system scalability and error management.
- Led a team of 15 developers, driving **Lightning development projects** and establishing best practices for **Dell Boomi integrations**.
- Developed Apex Controllers, Batch Apex, Schedulable classes, and Queueable for **Service Cloud objects** like Case and Work Order.
- Created custom Apex Web Services that handled integration between a custom Account Planning application and Force.com
- Automated workflows using **Process Builder**, **Case Teams**, **Queues**, **Assignment Rules**, and Macros for business process optimization.
- Implemented **Salesforce Service Cloud** features, including **Case Management**, SLA adherence, **Escalation Rules**, and **Omnichannel routing** for improved customer service efficiency.
- Proficient in **Apex programming**, building custom Apex Classes, Triggers, and web services for business logic and integrations.
- Designed and deployed Salesforce solutions for **Sales Cloud**, **Service Cloud**, and **Commerce Cloud**.
- Integrated Salesforce with external systems using tools like **Boomi**, **Mulesoft**, **Workato**, and **REST APIs**.
- Expertise in **Copado** for version control, deployment, and automation across Salesforce environments.
- Built interactive interfaces using **HTML**, **CSS**, **JavaScript**, **ReactJS**, **AngularJS**, and **jQuery**.
- Worked extensively on **SOQL/SQL** for Salesforce data retrieval and database management with **MySQL**, **PostgreSQL**, and **MongoDB**.
- Designed scalable workflows and approval processes using **Process Builder** and **Validation Rules**.
- Migrated and transformed legacy data to Salesforce using **Apex Data Loader** and **Jitterbit Data Loader**.
- Implemented **CI/CD pipelines** to automate testing and deployment for Salesforce projects.
- Designed and deployed **Salesforce Sales Cloud** solutions, focusing on **Lead Management**, **Opportunity Management**, and sales pipeline optimization to drive revenue growth.
- Built custom reports, dashboards, and visualizations using **Microsoft Power BI**, **Tableau**, **Sigma**, and Salesforce-native tools.
- Performed real-time integrations between Salesforce and NetSuite using **Dell Boomi** for seamless data exchange.
- Configured advanced authentication mechanisms using **Security Assertion Markup Language (SAML)** and OAuth.
- Developed and deployed Salesforce applications adhering to GDPR compliance and security standards.
- Led a team of 15 developers for **Lightning Development** and **Dell Boomi Practice** to deliver high-quality solutions.

- Expertise in integrating Salesforce with **Payment Gateways**, Google Maps, and DocuSign for enhanced functionality.
- Developed and implemented **Error Logging Frameworks** and reusable **Lightning Patterns** for scalable solutions.
- Created highly responsive Salesforce mobile apps using **Lightning Component Framework** and SLDS.
- Designed and executed integration projects using **SOAP, REST APIs**, and **Metadata APIs** for real-time data exchange.
- Optimized Salesforce environments by integrating advanced **LWC, Apex**, and **Visualforce**.
- Experience in using **UML** to design and document Salesforce system architectures.
- Customized and configured **Commerce Cloud** for seamless e-commerce experiences, integrating payment gateways, product catalogs, and customer engagement tools.
- Configured **Salesforce Service Cloud** features like **Case Management**, SLA adherence, and automated escalations.
- Implemented CPQ solutions with **Apttus CPQ** for contract lifecycle management.
- Built scalable Lightning applications with dynamic rendering using **Lightning Data Service**.
- Designed and implemented **custom objects, fields**, and **junction objects** to support complex business processes.
- Automated lead processing and customer engagement using Salesforce **Marketing Cloud** and Social Studio integrations.
- Migrated Salesforce environments from **Classic to Lightning**, enhancing UI/UX and system performance.
- Customized Salesforce workflows to handle Omni-Channel routing, agent performance tools, and macros.
- Used **Process Automation** to eliminate manual tasks and enhance operational efficiency.
- Developed automation workflows using **Process Builder, Approval Processes**, and **Macros** to enhance Service and Sales Cloud functionalities.
- Created and integrated RESTful APIs for external applications, ensuring secure and efficient data exchange.
- Built dashboards and performance tracking tools to monitor sales, service, and marketing metrics.
- Hands-on experience with Salesforce API testing tools like **SOAP UI, Postman**, and **Workbench**.
- Configured Salesforce for **Lead Management, Opportunity Management**, and Case escalations.
- Developed Salesforce applications with frontend validation using **JavaScript, HTML**, and **CSS**.
- Experience in **Salesforce Service Cloud** for automated case resolution and SLA tracking.
- Built Salesforce-integrated apps for device compatibility using the **Lightning Component Framework**.
- Designed solutions with advanced features like conditional rendering and dynamic layouts in Salesforce Lightning.
- Implemented **financial services integrations** to support customer billing and payments.
- Proficient in **Agile methodologies**, collaborating with stakeholders and Scrum teams for iterative deliveries.
- Designed, developed, and maintained Salesforce integration with **CRM tools** like Dropbox, Gmail, and Outlook.
- Developed data-driven solutions for Salesforce dashboards, integrating third-party tools like **Power BI** and **Tableau**.
- Experience in building Salesforce applications with compliance to GDPR and security standards.
- Built comprehensive dashboards and reports in **Sales Cloud** and **Service Cloud** to provide actionable insights for sales and service teams.
- Customized workflows and automation for high-performance Salesforce operations across regions.
- Configured Salesforce applications with complex **validation rules** and process automations.
- Built custom solutions for account deduplication using **Lightning Web Components (LWC)**.
- Developed robust Salesforce integrations using **REST APIs** and Apex Web Services.
- Led the rollout of Salesforce upgrades, ensuring minimal downtime and seamless adoption.
- Designed and implemented dynamic Salesforce solutions aligned with business goals and KPIs.
- Delivered Salesforce solutions that streamline processes, improve efficiency, and enhance user experience.
- Integrated external systems with **Service Cloud, Sales Cloud**, and **Commerce Cloud** using tools like **Boomi, Mulesoft**, and **REST APIs** for real-time data synchronization.

Environment: Salesforce.com platform, Custom labels, Custom Metadata, salesforce.com Data Loader, Service Cloud, Workflow & Approvals, Lightning Components Email Services, Security Controls, HTML, JavaScript, WSDL, Sandbox, XML, Soap UI, Eclipse, Oracle 10g, Lightning Application, Apex Language, Classes, Triggers, SOQL, SOSL, Visual Force (Pages, Components and Controllers), Apex Data Loader, S-Controls, Apex Web Services, AJAX, Dashboards, Analytic Snapshots, Custom Objects.

Responsibilities

- Designed and implemented **Salesforce Sales Cloud, Service Cloud, Marketing Cloud, Community Cloud, and Commerce Cloud** solutions for complex business needs.
- Developed and customized **Lightning Web Components (LWC), Visualforce Pages, and Apex Classes** to enhance Sales Cloud and Service Cloud functionalities.
- Configured **Salesforce Marketing Cloud**, including **Journey Builder**, segmentation, and **Social Studio** for personalized customer engagement.
- Built and deployed **Salesforce Commerce Cloud** solutions for **B2B** and **B2C** initiatives, including product catalog integration and customer-centric shopping experiences.
- Performed **real-time integration** between **Salesforce, SAP, and Oracle EBS** using **Informatica** for seamless data synchronization.
- Developed custom workflows and automation for **Case Management** in Service Cloud, including SLA tracking and escalation rules.
- Designed and implemented **Partner Community Cloud** for external collaboration and enhanced knowledge sharing.
- Implemented Salesforce **Chatter** and integrated with **Facebook** and **Twitter** for social collaboration.
- Migrated workflows to **Process Builder** for enhanced automation, reducing redundancy in rule management.
- Configured Salesforce **Customer Communities**, including custom dashboards and login pages for client-facing portals.
- Developed integrations with **Salesforce Marketing Cloud** for email campaigns, lead management, and engagement tracking.
- Designed Salesforce solutions integrating **CPQ** for automated sales order creation and quote generation in Sales Cloud.
- Built automation for syncing contacts, email alerts, events, and tasks between Salesforce and Outlook.
- Customized Salesforce **Knowledge Articles** and enabled them for Service Cloud case resolution.
- Integrated Salesforce Commerce Cloud with **external payment gateways**, enabling secure online transactions.
- Implemented custom reporting and dashboards in **Sales Cloud** for sales pipeline visibility and forecasting.
- Facilitated data imports/exports, cleansing, categorization, and migration to Salesforce using **Apex Data Loader**.
- Managed release cycles for Salesforce solutions using **GitLab CI/CD, Jenkins, and Salesforce DX**.
- Integrated Salesforce **Commerce Cloud Order Management** with external systems to streamline order processing.
- Supported **B2B Commerce Cloud** initiatives by enabling personalized shopping and customer data segmentation.
- Created and customized Salesforce applications, including page layouts, record types, custom tabs, and validation rules.
- Designed and implemented Salesforce **Marketing Cloud** customer journeys for targeted email campaigns.
- Performed **real-time integration** between Salesforce and **NetSuite** using **Dell Boomi**.
- Implemented Salesforce Service Cloud features like **Omni-Channel Routing** and bulk macros for case resolution.
- Developed Salesforce **Commerce Cloud B2C Storefronts** to enhance customer shopping experiences.
- Customized **Salesforce Reports and Dashboards** for insights into sales, service, and marketing performance.
- Designed Salesforce applications integrating external systems via **REST APIs, SOAP, and Metadata APIs**.
- Provided training to stakeholders on Salesforce capabilities across clouds, including customization and reporting.
- Optimized Salesforce Commerce Cloud to support mobile-first, responsive shopping experiences.
- Developed ad-hoc reports for stakeholders using **Salesforce Report Builder** and external tools like **Power BI**.
- Implemented **Case Automation** in Service Cloud with time-based triggers and auto-response rules.
- Configured Marketing Cloud **Data Extensions** for efficient email segmentation and personalization.
- Integrated Salesforce **Service Cloud** with third-party ticketing systems for enhanced customer service workflows.
- Developed **custom community portals** with Visualforce and LWC, embedded within client websites.
- Migrated legacy CRM data to Salesforce Commerce Cloud using **Informatica** and **Apex Data Loader**.

- Customized Salesforce dashboards for Commerce Cloud to monitor order fulfillment and inventory status.
- Worked extensively with **GitHub** and version control tools for Salesforce code management and deployment.
- Developed and maintained integrations with **B2C Commerce Cloud**, including customer data migration and reporting.
- Designed Salesforce **Service Cloud Case Management** workflows for improved customer support efficiency.
- Created and maintained documentation for Salesforce solutions spanning Sales, Service, and Commerce Clouds.
- Configured Salesforce **Marketing Cloud Advertising Studio** for targeted audience campaigns.
- Performed **data modeling** and implemented Salesforce Commerce Cloud data synchronization workflows.
- Implemented advanced security configurations for **Service Cloud**, including field-level security and role-based permissions.
- Designed Salesforce **Commerce Cloud Product Listings**, integrating with payment systems for seamless transactions.
- Built Salesforce **Community Portals** for partner engagement and lead management.
- Enhanced Salesforce **Sales Cloud** for CPQ implementations and sales cycle optimizations.
- Supported integration of Salesforce Marketing Cloud with external email automation tools for campaign execution.
- Customized Commerce Cloud to enable omnichannel shopping experiences for retail clients.
- Performed continuous improvement for Salesforce applications using agile methodologies and stakeholder feedback.
- Delivered Salesforce solutions integrating Sales, Service, Marketing, and Commerce Clouds, aligning with business goals and driving operational efficiency.
- Delivered comprehensive solutions for **Salesforce Commerce Cloud** to support both **B2B** and **B2C** initiatives, ensuring a seamless customer experience.
- Led **SDLC processes** in an **Agile methodology**, managing implementation and rollout of **Sales Cloud, Service Cloud, Marketing Cloud, Field Service Lightning (FSL), Communities**, and the **Force.com platform**.
- Designed and managed **Salesforce Commerce Cloud Order Management**, optimizing order workflows and integrations with external systems.
- Implemented **CPQ functionality** in **Sales Cloud**, automating the creation of sales orders and improving the quote-to-cash process.
- Developed a deep understanding of **Sales Cloud, Service Cloud, Chatter**, and **Force.com** product offerings, customizing solutions to meet client requirements.
- Utilized **GitLab CI** and **Jenkins** for continuous integration (CI) and automation of end-to-end build and deployment pipelines.
- Leveraged **Salesforce DX** for efficient development and management of Salesforce apps across the platform.
- Designed and implemented custom **Salesforce applications** for **Sales Cloud, Service Cloud, Marketing Cloud, Community Cloud**, and **Commerce Cloud**, integrating with external systems for enhanced functionality.
- Customized Salesforce CRM pages and developed **Visualforce Pages** and **Apex Classes** using Salesforce design patterns and advanced data collections like **List, Set**, and **Map**.
- Created and maintained integrations between Salesforce clouds and external platforms, ensuring data integrity and optimal system performance.

Environment: Salesforce.com platform, Custom labels, Custom Metadata, salesforce.com Data Loader, Service Cloud, Workflow & Approvals, Lightning Components Email Services, Security Controls, HTML, JavaScript, WSDL, Sandbox, XML, Soap UI, Eclipse, Service Cloud, Marketing Cloud, Commerce Cloud, Visual Studio, GITHUB, Jira, Windows.

Role : Salesforce Developer
Client : Shutterfly

07/2017 – 08/2019 | California, United States

Responsibilities

- Gathered and analyzed requirements from business user groups for **Salesforce implementation** across **Sales Cloud, Service Cloud**, and **Marketing Cloud**.
- Configured **Salesforce Sales Cloud** for managing **Campaigns, Opportunities, Lead Management**, and **Opportunity Management** workflows.
- Developed and customized **Lightning Web Components (LWC)** and **Visualforce Pages** for streamlined user experiences.

- Implemented **Service Cloud** features like **Case Management**, **CTI integration**, and **Field Service Management** for enhanced customer service.
- Configured and supported **Salesforce Financial Services Cloud**, adding advanced notifications and improving workflows.
- Performed **real-time integration** with external systems using **RESTful APIs**, **SOAP**, and tools like **Apttus** and **nCino**.
- Built **Marketing Cloud** campaigns with **ExactTarget** and **Pardot**, enabling contextual and personalized customer engagement.
- Created **custom objects**, workflows, and validation rules to meet specific business requirements.
- Led the enhancement of **Salesforce CRM**, ensuring accurate data reporting and linking rules for better insights.
- Delivered advanced campaign creation workflows and integrations with **Marketing Cloud solutions**.
- Worked with **Community Cloud**, building custom portals for better customer and partner engagement.
- Developed RESTful services using **Dropwizard Framework** for Salesforce integrations with external platforms.
- Designed and managed database integrations using **SQL Azure**, **SQL Server**, and **Microsoft Access**.
- Integrated **CTI systems**, including **Avaya open CTI**, for seamless call center operations within Salesforce.
- Performed bulk **data migration** using **Data Loader**, **Workbench**, and **ETL tools** like **Cast Iron** and **Autosys**.
- Designed custom reports and dashboards for **Sales Cloud** and **Service Cloud**, leveraging **Conga Composer** for detailed reports.
- Implemented advanced **Service Cloud automation** with macros, workflow rules, and approval processes.
- Worked on complex Salesforce CRM implementations, including **Partner Portal**, orders, discounts, and integration with legacy systems.
- Used **OAuth** to integrate Salesforce with third-party applications and sites.
- Configured Salesforce **Marketing Cloud Journey Builder** for personalized customer journeys and enhanced user experience.
- Migrated workflows into **Process Builder**, enabling advanced actions like invoking approval processes and updating child records.
- Created custom LWC components for **Opportunity Pipeline Reports** and trend analysis in **Sales Cloud**.
- Worked on **Veeva CRM**, integrating with **Sales Cloud** and **Service Cloud** to meet pharmaceutical business needs.
- Implemented Salesforce **Chatter**, enabling collaborative communication across teams.
- Supported **Salesforce Community Portals**, enabling seamless interaction between customers and partners.
- Configured and maintained **Salesforce Marketing Cloud ExactTarget**, streamlining campaign workflows.
- Reviewed and streamlined CRM processes for better adoption metrics and business insights.
- Built **Salesforce integrations** with **Microsoft Dynamics CRM** for efficient customer relationship management.
- Developed custom workflows and lead routing mechanisms for automated **lead escalation** and email alerts.
- Configured Salesforce **Data Warehouse** solutions, ensuring accurate reporting for advisor and firm-level metrics.
- Built advanced validation rules for data integrity and compliance with organizational policies.
- Implemented **Salesforce Commerce Cloud** solutions for B2B and B2C customers, enhancing the shopping experience.
- Enhanced campaign automation with robust integration of **Salesforce Marketing Cloud solutions**.
- Supported customer interaction workflows with **Service Cloud** and **Salesforce Connect** integrations.
- Configured **Salesforce Communities** for engaging partner and customer collaboration portals.
- Designed and developed web applications using **SQL**, **JSP**, **HTML**, and **JavaScript** for CRM integrations.
- Created dashboards and reports in **Sales Cloud** and **Service Cloud**, providing actionable insights for stakeholders.
- Used Salesforce **DX** to manage Salesforce apps throughout the development lifecycle.
- Integrated Salesforce with external platforms like **Demandware** and **nCino**, ensuring real-time updates.
- Optimized sales workflows with **CPQ** solutions, automating quote-to-cash processes in **Sales Cloud**.
- Supported large Salesforce implementations, focusing on **Sales Process Improvements** and legacy integrations.
- Monitored and administrated **Salesforce CRM**, ensuring smooth operation and uptime.
- Customized Salesforce pages and applications using **Apex**, **Visualforce**, and **Lightning Components**.
- Enhanced system security with advanced roles, profiles, and permissions configurations across clouds.
- Delivered integrated Salesforce solutions for **Sales Cloud**, **Service Cloud**, and **Marketing Cloud**, driving efficiency and user satisfaction.

Environment: Java, Apex, Workbench, Testing, JavaScript, CSS, ETL, MVC, Oracle, Junit, Eclipse, Salesforce.com Enterprise Edition, Profiles, Role hierarchy, Workflow & Approval processes, Data Loader, Reports, Custom Objects, Sales Cloud, Service Cloud, Marketing Cloud, Commerce Cloud, Community Cloud, Financial Services Cloud.

Role : Salesforce Administrator/Developer
Client : Cotiviti

04/2015 – 06/2017
South Jordan, United States

Responsibilities

- Designed and implemented custom solutions for **Sales Cloud, Service Cloud, Marketing Cloud, Commerce Cloud, Community Cloud**, and **Financial Services Cloud** to meet complex business needs.
- Developed responsive application frameworks supporting tablet and mobile devices, optimizing UI for different screen sizes and seamless user experience.
- Built **Apex Classes, Controllers, Extension Controllers**, and **Apex Triggers** to meet business and functional requirements.
- Designed and developed **Lightning Web Components (LWC)**, **Aura Components**, and **Visualforce Pages** using **HTML5, CSS, JavaScript**, and the **Ajax toolkit**.
- Integrated IoT services like NFC, security systems, and smart devices with Salesforce via **REST APIs**.
- Implemented **Sales Cloud** functionalities, including **Campaign Management, Lead Management, Opportunity Management**, and **Account/Contact Management**.
- Developed **Assignment, Escalation**, and **Workflow Rules** for automated task routing and case resolution.
- Configured and maintained user **Roles, Profiles, Permissions, Public Groups**, and **Sharing Settings** for role-based access control.
- Built and maintained custom **Objects, Record Types, Report Types**, and **Formula Fields** to address dynamic business processes.
- Utilized **Copado, GitLab CI, Jenkins**, and **Salesforce DX** for CI/CD pipelines and release automation.
- Developed and managed dynamic reports and dashboards to provide actionable insights into business performance.
- Involved in **Salesforce DX** development, managing apps throughout the entire development lifecycle.
- Set up **Marketing Campaigns, Campaign Hierarchies**, and **Web-to-Lead** functionalities to automate lead generation.
- Built RESTful services using **Dropwizard Framework** to handle web service integrations with JSON and XML.
- Configured Salesforce **Community Cloud** portals for external user collaboration and streamlined interactions.
- Integrated Salesforce applications with external systems using **SOAP, Bulk**, and **REST APIs**.
- Developed and monitored **Salesforce Automation (SFA)** processes to improve Sales and Service workflows.
- Built complex workflow rules, approval processes, and field updates to automate business logic.
- Delivered contextual marketing automation using **ExactTarget, Pardot**, and **Marketing Cloud** solutions.
- Configured role hierarchies, security controls, and sharing rules to enhance system security and compliance.
- Created and maintained campaign reporting and analytics using **Salesforce Reports, Dashboards**, and third-party tools.
- Developed Salesforce integration with **external devices and services**, including Philips Healthy Sleep devices for IoT functionality.
- Designed database structures and integration points using **SQL, Azure**, and **MS SQL Server**.
- Maintained nCino-specific Salesforce objects and coordinated with the project management team for configuration readiness.
- Built dynamic validation rules for specific user profiles and record types to ensure process integrity.
- Worked on **Salesforce Marketing Cloud Automation**, including journey builder and campaign optimization.
- Designed REST API callouts for data synchronization between Salesforce and external systems like **Apttus**.
- Used **Data Loader** and **Workbench** for bulk data migrations and imports across Salesforce environments.
- Customized Salesforce **Chatter** to facilitate collaboration and social interaction among users.

Environment: Salesforce.com platform, Workflow and Approvals, Reports, Custom Objects, Tabs, Email Services, Apex Language, Visual Force Pages,
