WORK HISTORY

Business Analyst, 12/2022 - Current

Signify Health- Dallas, TX

Worked on the claim adjudication process, and I have worked on the integrations with document management system, central database. Scope of my project is to improvise the automatic reviews, which included the removal of the irrelevant appeal process, incorrect information, duplicate records

- Worked on EDI transactions: 270, 271, 834, 835, and 837 (P.I.D) to identify key data set elements for designated record set.
- Involved in testing Member, provider, Claims Processing and Utilization Management, Contracts and Benefits modules.
- Coordinated the upgrade of EDI Transaction Sets 837, 835 and 834 to HIPAA compliance.
- Worked on EDI 834-file load in Facets through MMS (Membership maintenance sub-system).
- Performed smoke testing, process testing and logged defects in Jira
- Experienced in software development life cycle such as Waterfall, Agile-SCRUM methodologies, Business Analysis and Modelling.
- Updated Current internal systems to integrate new data and functionalities of the payment arrangement system.
- Worked on securing all patient data that was exchanged within systems and made sure the exchanges fell within HIPAA guidelines and mandates.
- Created User Stories, UML Diagrams and Data Flow Diagrams to determine the data flow via various Systems.
- Actively participated in Product Backlog/Refinement meeting, Sprint planning, Daily Scrum, Sprint review and Sprint retrospective meetings.
- Elicited requirements, created As-Is and To-Be process, Cost Benefit analysis, Risk assessment and SWOT analysis for the project.
- Worked on adding functionalities for payment processing system which allowed users to process payments to selected payees.

- Worked with Utilization Management, Care Management work stream to help Development, and Quality Assurance team to produce business efficient product by providing Product design and business understanding.
- Facilitated Joint Application Development (JAD) sessions to focus on defining Care Management and Utilization Management Requirements of the portal.
- Worked with configuring the Business rules to automate many tasks associated with the care management, Utilization Management including auto referrals and auto generating education materials.
- Identified actors and use cases for Care management and utilization management from the requirements and prepared Use Cases Diagrams, Business Process Flow, Activity Diagrams and Workflow Diagrams to understand the interaction between actor and the system using MS Visio.

Business Analyst , 07/2019 - 11/2022

Munson Healthcare – Remote TX

As a BA worked with a team on a web application to serve bundle payment processing and make it compliant with the EDI standards. Integration of this web application with the third-party administrator's applications (TPA) was achieved. The developed application is complaint with the HIPAA standards.

- Interacted with business heads to finalize the Business Requirements for the application.
- Performed the requirement analysis and documented the requirements using Rational Requisite Pro.
- Involved in the design, development, implementation, and production activities associated with claims processing module involved Receipt and Verification of Claim Forms (837) and Claims Attachments (275), Claims Enquiry and Response (276/277), Adjudication, Healthcare Claim Payment/Advice (835) as per HIPAA guidelines.
- Analyzed transactions 837 (Claim for Institutional, Professional and Dental Claims), 835 (Claim Payment), 276-277 (Claim status), 834 (Enrolment), 270/271 (Member eligibility).
- Worked for Dental, Professional and Institutional Claims (UBO4, 837P & 837I).
- Worked on EDI transactions: 270, 271, 834, 835, and 837 (Institutional, Professional and Dental Claims) to identify key data set elements for designated record set. Interacted with Claims, Payments and Enrolment hence analyzing and documenting related business processes.
- Worked with Claims, enrolment, eligibility verification for members and providers, benefits setup, and backend payment cycle in facets.
- Understand the As Is system and develop the To Be system concept and prepare the System Process Maps.
- Created and managed project templates, Use Case project templates, requirement types and traceability relationships in Requisite Pro

Associate Business Analyst, 04/2018 – 06/2019

Zelis – Boston, MA

The project was to develop and enhance the UI to give internal users the ability to view data processes, carry out data transmission and view the progress of the data transmission process status.

- Led design sessions with external vendors and internal resources that allowed the team to come to an agreement on a new overall design for the Investment Choice experience.
- Finalized and documented the business requirements based on the requirements of the clients, documenting the need of the alerts and processes built in the User Interface.
- Collaborated with development team in creating MS Visio diagrams describing the architecture and design of the system. Also created and reviewed the wireframes and screen mock-ups with the users.
- Assisted in creation of test deliverables like the test plans and test cases and assisted the Quality Assurance team in testing of the product.
- Involved in the User Acceptance Testing phase and communicated the user's suggestions/concerns to the development team.
- Performed Data mapping between source systems to target systems, logical data modelling, created class diagrams and ER diagrams and used SQL queries to filter data.
- Worked extensively on training and SOP documents prior to the rollout of completed projects.
