Experience:

Quality Control Lead |06/2021-08/2025

Yethi Consulting PVT LTD- Navi Mumbai, India

- **Client:SBI Bank (Foreign Office)**
- **Projects:** YONO Mobile Banking (Foreign Operations), Payment Processing (ISO 20022 - Pac008, Camt 056, MSPDS).
- **Project Overview:** Worked on YONO Mobile Banking's Foreign Operations, focusing on ISO 20022 payment processing (Pacs.008, Camt.056, MSPDS). Validated international fund transfers, message formatting, and compliance with SWIFT standards.
- **Responsibility:**
 - ❖ Lead the QA tester team for YONO Mobile Banking on iOS, Android, and web portals, ensuring functional, regression, and UAT coverage.
 - ❖ Designed test plans, cases, and scripts for payment processing workflows.
 - ❖ Validated message formatting, fund transfers, and integration with SWIFT and ISO 20022 standards.
 - ❖ Collaborated with development teams for timely defect resolution and improved QA processes.
 - ❖ Conducted performance, regression, and production sanity testing, reporting results to stakeholders.

Senior Test Engineer | 04/2020 - 05/2021

XtendValue Pvt. Ltd - Thane, India

- **Client:** Aditya Birla Finance
- **Project:** Loan Origination & Management | BFSI (Banking & Financial Services)
- **Project Overview:**

Worked on end-to-end QA testing of the FinnOne Neo-based Loan Origination and Loan Management Systems (LOS/LMS), ensuring accuracy, compliance, and seamless functionality across the complete loan lifecycle.
- **Responsibility:**
 - ❖ Designed and documented detailed test plans, test cases, and test scripts based on FinnOne Neo LOS and LMS workflows, including Origination, Processing, Underwriting, Credit Scoring, Closing, and Post-Closing.

- ❖ Conducted comprehensive functional, integration, system, and regression testing for end-to-end loan lifecycle processes across retail and corporate lending products.
- ❖ Validated loan origination workflows covering application creation, document verification, KYC processing, credit evaluation, and approval matrix.
- ❖ Tested loan servicing and repayment modules, ensuring accurate processing of Repayment Schedules, Restructure Schedules, DPD Calculations, Cross Knock-Off, Auto Knock-Off, and Foreclosure activities.
- ❖ Verified payment transactions through multiple payment modes, including ECS, NACH, Cheque, Cash, NEFT/RTGS, and Online Payments, ensuring accuracy in posting and reconciliation.
- ❖ Performed UAT and functional testing to ensure compliance with business and regulatory requirements throughout the mortgage and loan life cycle.
- ❖ Validated interest, fee, and penalty calculations, as well as amortization schedules, across various loan products to ensure business rule alignment.
- ❖ Conducted data validation and backend testing using SQL queries, ensuring accuracy and consistency across LOS, LMS, and core banking databases.
- ❖ Tested integration points with external systems such as payment gateways, credit bureaus (CIBIL), accounting systems, and document management systems.
- ❖ Executed migration and regression testing during version upgrades to ensure smooth transition without data or process loss.
- ❖ Used JIRA for test management, defect tracking, and sprint progress monitoring; collaborated closely with developers and business analysts for timely defect resolution.
- ❖ Delivered detailed QA reports on test execution, defect trends, and risk analysis to stakeholders for informed decision-making.
- ❖ Contributed to process improvements by optimizing test coverage, reusing test assets.

Test Engineer | 12/2018 - 04/2020

Quality Kiosk Technologies Pvt. Ltd.- CBD Belapur, India

- **Client:** SBI Bank – GITC
- **Projects:** SME Loan System and AGRI Loan System
- **Project Overview:**
Worked on Loan Origination System (LOS) testing for SBI's SME and Agriculture Loan Systems, ensuring smooth end-to-end loan processing from application initiation to approval and disbursement, fully aligned with business and regulatory requirements.
- **Responsibilities:**
 - ❖ Designed and executed functional, integration, regression, and UAT test cases for LOS modules in SME and Agri loan products.
 - ❖ Performed end-to-end LOS workflow validation covering Origination, Processing, Underwriting, Credit Scoring, and Approval stages.
 - ❖ Validated loan application initiation, customer on-boarding, document verification, KYC, and credit assessment processes.
 - ❖ Tested risk scoring, loan approval hierarchy, and exception handling functionalities within LOS.
 - ❖ Verified loan disbursement readiness, sanction letter generation, and system-triggered notifications.
 - ❖ Conducted data validation and back-end checks using SQL queries to ensure accuracy between LOS and core banking systems.
 - ❖ Collaborated with business analysts, developers to ensure proper test coverage and timely defect resolution.
 - ❖ Used JIRA for test management, defect logging, and test cycle tracking during multiple release iterations.
 - ❖ Delivered detailed QA reports summarizing test execution results, defect metrics, and functional coverage for stakeholder review.

Executive | 10/2016 - 02/2018
