Visa Status: Green Card Holder

KEY SKILLS

- **Platform Skills:**
 - SharePoint Online and SharePoint On-Premises, Dataverse.
 - Power Apps, Power Automate, Power BI, Power Pages, Power Virtual Agents, Copilot Studio
 - Dynamics 365, Salesforce,
 - Azure Functions, logic apps, Service bus, Event Grid, API Management
- **Language:** HTML, CSS, JavaScript, TypeScript, C#, .Net, Java, SQL.
- **Data Exchange:** Json, XML,CSV,YAML,EDI
- **CI/CD Tools:** Azure DevOps
- **Web:** REST API and Graph API

EDUCATION | CERTIFICATE

SUMMARY

- **10+ years of IT experience in application development**, designing and developing multi-tiered client-server applications, leading to a 40% increase in system efficiency.
- **6 years of hands-on experience with Microsoft Power Platform**, delivering over 25 successful projects, spanning Power Apps, Power Automate, and Power BI.
- **Proficient in designing, developing, and maintaining Office 365 and Power Platform solutions** (SharePoint Online, SharePoint On-Premises, InfoPath, Nintex, Power Apps, Power Automate, and Power BI), achieving a 30% reduction in operational costs.
- **Successfully migrated 100+ sites across SharePoint** versions (2010, 2013, 2016) to Online and On-Premises using tools like ShareGate, ensuring zero data loss and seamless transitions.
- **Skilled in customizing SharePoint solutions** (Site Collections, Sites, Lists, Libraries, Content Types, Web Parts, Workflows, and Forms), improving the UI/UX engagement by 25% and ensuring consistent branding.
- **Experienced in workflow automation**, external data integration, and performance optimization in Power Platform, saving over 200 hours of manual work annually and enhancing scalability for large datasets.
- **Created canvas and model-driven apps** using SharePoint and Dataverse as data source, leveraging Power FX for complex logic, reducing development time by 20% while maintaining optimal performance.

School: Addis Ababa University

Degree: Bachelor's degree in
information Technology

Year: 2010 – 2014

- Power Platform
Developer Associate
(**PL-400**)
- Azure (**AZ-900**)

- **Adept in SharePoint performance optimization**, utilizing indexed columns, metadata navigation, filtered views, and PnP PowerShell to improve efficiency for large lists and prevent throttling.
- **Skilled in data security governance**, implementing role-based security, custom connectors, and compliance measures to ensure 100% adherence to governance policies and enhance system security by 30%.
- **Experience in data modeling**, defining database schemas and creating ERD documents.
- **Developed SPFx-based customizations** using HTML, CSS, Bootstrap, React.JS, jQuery, and JavaScript, enhancing the user interface and experience by 35%.
- **Good understanding building** AI solutions using Copilot Studio
- **Proficient in Power BI integration**, creating dashboards with real-time insights, driving data-driven decision-making with minimal latency.
- **Experienced troubleshooting, post-migration support, and end-user training**, reducing post-migration issues by 40% and ensuring seamless adoption.
- **Proficient in security**, and application lifecycle management (ALM) practices for the Power Platform

EXPERIENCE

New York Life Insurance, REMOTE — Power Platform Developer

July 2023 - PRESENT

- Built PowerApps, Power Pages integrated with WorkDay, Dataverse, and SharePoint, improving data accessibility and reducing data entry time by 25%.
- Developed and deployed over 15 SharePoint Online solutions, covering design, development, testing, and deployment, resulting in a 30% increase in team productivity.
- Designed and implemented Power Automate workflows to automate complex business processes, Data migration from legacy systems.
- Created Power BI reports and dashboards, providing real-time insights and performance metrics that improved decision-making speed by 40%.
- Integrated third-party solutions and RESTful APIs with Power Platform, utilizing modern authentication protocols like OAuth 2.0 and OpenID Connect to implement secure access and manage tokens.
- Performed administrative tasks using PowerShell scripts, ensuring consistency and reducing manual errors by 35%.
- Provided production support, troubleshooting, and regular maintenance, ensuring consistent performance and achieving a 99.9% uptime.

- Authored user manuals, training materials, and technical documentation, facilitating effective solution adoption and reducing training time by 50%.
- Implemented security measures to ensure compliance and safeguard SharePoint environments, resulting in zero security breaches.
- Conducted data backups and established disaster recovery protocols, minimizing data loss and ensuring business continuity.
- Performed testing, debugging, and troubleshooting to maintain high-quality standards, reducing system downtime by 15%.

At & T, REMOTE — Power Platform Developer

July 2019 - May 2023

- Designed and deployed over 20 end-to-end SharePoint Online solutions, including customization of sites, lists, libraries, workflows, and forms, leading to a 35% increase in team productivity.
- Built intuitive PowerApps forms integrated with SharePoint, enhancing user experience and reducing data entry errors by 25%.
- Automated complex business processes with Power Automate workflows, improving operational efficiency and saving approximately 150 hours of manual work annually.
- Developed Power BI reports and dashboards, providing real-time insights and performance tracking, which improved decision-making speed by 40%.
- Integrated third-party solutions with SharePoint, enhancing functionality and compatibility, leading to a 20% increase in system efficiency.
- Provided ongoing support, troubleshooting, and maintenance for SharePoint environments, ensuring consistent performance and achieving a 99.9% uptime.
- Authored user manuals, training materials, and technical documentation, facilitating seamless adoption and reducing training time by 50%.
- Ensured data security, compliance, and disaster recovery through backups and robust protocols, resulting in zero data breaches.
- Automated administrative tasks using PowerShell scripts, maintaining consistency and reducing manual errors by 30%.
- Tracked and maintained all work items, work progress, work tasks, and bugs in Azure DevOps.

HILMAN, HYBRID — Integration (MuleSoft) Developer

Dec 2016 - July 2019

- Design, develop, test maintain and implement application integration system enhancement work within established processes.
- Design and implement the application in Agile – methodologies.
- Created Mule application that uses connectors SFDC, Message Transformer, Choice Exception Strategies, Batch processing.
- Developed RAML based APIs with JSON Based RESTful APIs Services.
- Used MMC (mule management console to monitor the request and response payload).

- Implemented Salesforce Streaming API integration to provide real-time data synchronization to help businesses for on demand decisions.
- Responsible for Coding, Unit Testing and Functional Testing.
- Deployed applications using Azure DevOps CI/CD pipelines.
- Created, configure and secure the API endpoints using Anypoint runtime manager.
- Configure Mule ESB projects for the services with synchronous and asynchronous Mule flows.
- Configured Mule ESB projects for synchronous and asynchronous flows.

First Midwest Bank, ONSITE — FullStack / JavaScript Developer

Oct 2015 - Nov 2016

- Worked as Full Stack Engineer spending 60% of time working on front end and 40% on backend development.
- Developed new user - facing features using HTML, CSS, React.js, Redux.
- Implemented RESTful API design and development using Node and Express
- Setup Mocha and Jest for unit testing.
- Implemented data modeling for NoSQL / JSON database MongoDB.
- Built SPAs using modern web technologies including React, Redux, Node, Express, and RESTful APIs.
- Migrated Vue.js based application to the React/TypeScript, Styled-components web application.
- Deployed cloud functions (written in Node/Typescript) to handle events triggered by changes in mongodb database.
- Decreased user bugs by 85% by migrating the user management system to the current universal login approach.
- Provided quick support, feature additions, bug fixes and general updates.

Baggies Web Solutions, ONSITE — FullStack/Java

Sept 2014 – Oct 2015

- Involved in Analysis, design, and coding in the J2EE Environment.
- Prepared Technical Specifications based on the functional requirements.
- Participated in designing and developing the presentation web-based client using HTML5, CSS3, JavaScript, AJAX, Query, JSP and JSFs, Tag Libraries, MVC and XML.
- Designed the front-end for using JSP, AJAX, HTML Java Script, CSS and customized JSP Tag Libraries. Also did server-side logic development. Developed Action classes, Action Forms and Servlets.
- Involved in development of Web services (SOAP) using CXF, JAX-WS, WSDL, to send fusion data to different upstream systems.
