PROFESSIONAL SUMMARY

- 9+ Years of experience in Data Analyst/BI Developer with BI Developer with **Tableau** and Microsoft **SQL** Server, Oracle with strong background in Databases and Data warehousing concepts.
- Expertise in **Tableau** 2021.2/2021.1/2020.3/2020.2/2020.1/2019.2/2019.1/10.5/10.4/10.3/10.2/ 10.1, **Tableau** Server, **Tableau** cloud, **Tableau** Reader, **Tableau** Online, **Tableau** Mobile, **Tableau** Public.
- Deep conceptual knowledge of **Tableau** architecture including VizQL server, Application Server, Data Engine and Data server.
- Designed several business dashboards using **Tableau** Desktop, **Tableau** Server, **Tableau** reader and **Tableau** Cloud.
- Responsible for developing, unit testing and supporting various testing phases for the ETL (Extract, Transform and Load) processes using Talend/SSIS.
- Armed with project, product, operations, and inventory management skills in handling various projects and performing data analysis and design from various industries across multiple locations.
- Process, clean and verify the integrity of **data using Python and develop visualization to communicate data-driven insights using Tableau.**
- Participated in all phases of data mining; data collection, data cleaning, developing models, validation, visualization and performed Gap analysis.
- Developed and automated reports using Alteryx, Business Objects, **Power BI**, **SQL** server.
- Extensive usage of AWS for connecting to data sources on cloud using Amazon Redshift services.
- Defined data requirements, modeled and designed the new data structures, source to target mapping for AWS Redshift/**Tableau** based projects.
- Assist Business Objects & **Tableau** Report Developers to develop reports based on the requirements.
- Build a dashboard to monitor the **SQL** server and alert if any process is impacting the performance using **Tableau.**
- Expertise in building visualization using **Tableau.**
- Strong knowledge with **Power BI** Desktop and maintaining BOBJ dashboards.
- Used AWS Glue for creating several ETL jobs and loading data sets into tables and connecting to **Tableau.**
- **Power BI** developers with analysis on Desktop installation, and development, publish the report to **Power BI** Service, Dashboard with ties, Share Dashboards, and reports to stationery and mobile devices
- Creating visuals in **Power BI** Service, building dashboards, and customizing them to meet the needs of the clients /end-users Installed and set up cluster environment for **Tableau** server.
- Performance tuning for the **Tableau** Visualizations and **Tableau** server for more than 250 concurrent users.
- Extensive experience in developing Stored Procedures, Functions, Views and Triggers, Complex **SQL** queries using **SQL Server.**
- Integrated **Python dataset with Tableau** to build visual analytics solutions.
- Deep experience in designing and development of **Tableau** data visualizations solutions.
- Experienced with reporting tools, software, and other applications, including **SQL** Database, Looker, **Tableau** and Data warehouse.
- Setup trusted authentication in **Tableau** server and pass requests from Web server.

- Mastered the ability to design, develop and deploy effective dashboards and also rich Graphic visualizations with Drill Down and Drop-down menu option and Parameters, actions using **Tableau**.
- Integrated **Python dataset with Tableau** to build visual analytics solutions.
- Performed Data Wrangling.
- Utilized **Python and R** in a broad variety of machine learning methods including classifications, regressions, and dimensionality reduction based on domain knowledge and customer business objectives.
- Designed data profiles for processing, including running **SQL, and using Python** for Data Acquisition and Data Integrity which consists of Datasets Comparing and Dataset schema checks.
- Generated **Tableau** dashboards with combination charts for clear understanding.
- Created **Power BI** dashboards for business expansion on Sales growth, Claims Info and Customer services data from MS **SQL** Server Source.
- Created **Tableau** scorecards, dashboards using bar graphs, scattered plots, stack bars geographical maps, Gantt charts using show me functionality.
- Created an application using **Python**, Django, MySQL and Linux.

TECHNICAL SKILLS	
Languages:	SQL, Python , Java, R Programming, UNIX Shell Scripting, Scala, C, C++
Databases:	MySQL
Packages:	Pandas, NumPy, SciPy, TensorFlow, Scikit-Learn, Matplotlib
Data Analytics Techniques:	Data Visualization, Data Cleaning, Data Mining.
ML Techniques:	Supervised & Unsupervised Learning, KNN, Regression, Classification, Decision Tree, Clustering
Data visualization Tools:	Tableau and PowerBI
Other Tools:	Jupyter, Seaborn, MATLAB, Jira, Excel
Methodologies:	Agile, Waterfall and SDLC
Operating Systems:	Windows and Mac OS

WORK EXPERIENCE

Client: Fannie Mae, Reston VA

Oct 2021- Till Present

Role: BI Developer/ Data Analyst

Responsibilities:

- Worked on migration of **Tableau** to **Power BI**. Developed dashboards and ad-hoc reports using MS **Power BI** and developed custom calculated measures using DAX in **Power BI** to satisfy business requirements.
- Involved in scorecard and KPI Reporting and Created VISUALIZATIONS to a **Power BI** report.
- Implements tools and frameworks for automating report generation, identification of data-quality issues, and data governance.
- Developed Complex database objects like Stored Procedures, Functions, Packages and Triggers using **SQL** and PL/SQL
- Performs data conversions, imports, and exports of data within and between internal and external software systems.
- Used embedded predictive analytics tools and **Alteryx** Analytics to make sophisticated statistical techniques accessible to everyone.
- Worked on **AWS Redshift** and **RDS** for implementing models and data on **RDS** and **Redshift**.
- Experience with integration between **Alteryx** Analytics and **Tableau** to visualize the answers generated in **Alteryx**.

- Explores the data and discovers patterns, meaningful relationships, anomalies, and trends.
- Worked with Business Analyst to understand the user requirements, layout, and look and feel of the application to be developed.
- Python libraries are used for data cleansing and manipulation.
- Performs other duties as assigned.
- Designed and developed ETL workflows and datasets in **Alteryx**.
- Design, development, and deployment of **Tableau** reports on **Tableau** Desktop
- Experience in publishing reports to **Power BI** Services, embedded **Power BI** reports into SharePoint Sites and configured **Power BI** Workspaces.
- Provided continued maintenance and development of bug fixes for the existing and new **Power BI** Reports.
- Involved in designing and publishing visually rich and intuitive **Power BI** dashboards.
- Strong knowledge in **Power BI** on how to import, shape, and transform data for business intelligence (BI), Visualize data, author reports, schedule automated refresh of reports and create and share dashboards based on reports in **Power BI** desktop.
- Developed complex **SQL** queries using stored procedures, common table expressions (CTEs), temporary table to support **Power BI** and SSRS reports.
- Gathered user requirements, analyzed, and designed software solution based on the requirements.
- Performed high detail of oriented views using multiple measures, Individual Axes, Dual Axes and Customer Geo-coding.
- Developed clinical data testing systems, including design, documentation, implementation, and reporting
- Used **Alteryx** for Data Preparation and then **Tableau** for Visualization and Reporting.
- Modeled User filters to enable the row level security in **Tableau** within client's premises.
- Assembled Advanced Analysis actions and Interactive Dashboards using **Tableau**
- Mastered the ability to design and deploy rich Graphic visualizations with Drill Down and Drop-down menu option and Parameters using **Tableau**.
- Generated server-side PL/**SQL** scripts for data manipulation and validation and materialized views for remote instances.
- Fabricated User filters to enable the security of **Tableau** dashboards within client's premises.
- Experience in creating Schedules for dashboards to refresh automatically.
- Processed data in **Alteryx** to create TDE for **Tableau** reporting
- Improve Reports performance in **Tableau** using extracts and context filters.
- Created report schedules, data connections, projects, groups in **Tableau** server.
- Installed and Configured **Tableau** Server on Windows Server 2012 R2.
- Created Sites, Projects, Users Groups, Users and assigned permissions as required.
- Preparing dashboards using calculated fields, parameters, calculations, groups and hierarchies in **Tableau**.
- Imported and transformed data between databases and external data sources using **SQL** Server Integration Services (**SSIS**).
- Created customized reports using various chart types like text tables, bar, pie, tree maps, heat maps, line charts, pivot tables and combination charts in **Tableau**.
- Used R, **Python** and **Tableau** to develop variety of models and algorithms for analytic purposes.
- Involved in embedding the **Tableau** views into web application and displaying user's custom views as new reports within the application.

Client: T-Mobile, Seattle WA
Role: BI Developer/ Data Analyst
Responsibilities:

Apr 2018- Sep 2021

- Gathered initial requirements from the users of various departments and corresponded with them throughout the process.
- Wrote **SQL** to identify and correct data anomalies at request of SME's.
- Involved in gathering and analyzing the requirements, translating them into technical specification documents.
- Created ad-hoc reports to users in **Tableau** and Excel by connecting various data sources.
- Develop ETL applications based on business rules, scheduled workflows and data transfers by analyzing the traffic between data centers.
- Worked on data that was a combination of unstructured and structured data from multiple sources and automate the cleaning using **Python scripts**.
- Developed shell scripts to validate the flat files.
- Deployed **Tableau** Server in a clustered environment by mapping server nodes to primary machine.
- Used Ensemble model to integrate various algorithms using **Python**.
- Involved in creating database objects like tables, views, procedures, triggers, functions using **T-SQL** to provide definition, structure and to maintain data efficiently.
- Prepared **Power BI** Dashboards by utilizing Dashboard Best Practice to better convey the data to business users.
- Developed **Tableau** visualizations and dashboards using **Tableau** Desktop and developed **Tableau** workbooks from multiple data sources using Data Blending.
- Created **Power BI** dashboards for business expansion on Sales growth, Claims Info and Customer services data from MS **SQL** Server Source.
- Performed data integrity checks, **data cleaning, exploratory analysis** and **feature engineering** using R and **Python**.
- Connected **Tableau** server with SharePoint portal and setup auto refresh.
- Implemented several DAX functions for various fact calculations for efficient data visualization in **Power BI**.
- Expertise in creating schema objects, Performance Tuning of **SQL** coding.
- Redesigned the data source having data from various sources into one **SQL Server and to Tableau**.
- **Designed, developed and tested** various **Tableau** visualizations for dashboard and ad-hoc reporting solutions.
- Used PyCharm IDE and installed various libraries to connect with **SQL** and other tools through **Python**.
- Provided Just-In-Time training for various end users on using **Tableau** and exploring various functionalities of the dashboard.
- Functioned as dashboard developer, Architect and SM with **Tableau** Software.
- Involved in developing a Restful service using **Python** Flask framework.
- Implemented action filters, parameters, calculated filed and set for preparing dashboards and worksheets in **Tableau**.
- Provided subject matter expertise on sensitive data monitoring, scenario development, **SQL** best practices and current transaction monitoring processes to peers and senior management.
- Prepared and published customized reports/dashboards.

- Developed dashboards in **Tableau** Desktop and published to **Tableau** Server that allowed end users to understand the data on the fly with the usage of quick filters for on demand needed information.
- Created an application using **Python**, Django, MySQL and Linux.
- Designed expressions to calculate, group, filter, parameterize, and format report contents.
- Scheduled the Dashboard's at regular intervals to make sure data refresh is up to date.
- Used **Python** and R for programming for improvement of model to optimize services.
- Created organized, customized analysis and visualized projects and dashboards to present to Senior Level Executives.

Client: Verizon, Atlanta GA

Feb 2016- Mar 2018

Role: BI Developer/ Data Analyst

Responsibilities:

- Create, maintain and design database diagrams, develop and deploy **BI solutions using SQL Server, Power BI and excel.**
- Used pandas, NumPy, seaborn, SciPy, matplotlib, scikit-learn, NLTK in **Python** for developing various machine learning algorithms.
- Published the developed dashboard reports on the **Tableau Server** so that the end users having access to the server can view the data.
- **Used Python and R** scripting to visualize the data and implemented machine learning algorithms.
- Extensively used analytical features in **Tableau** like Statistical functions and calculations, trend lines, forecasting etc. in many **Tableau** reports.
- Proficient with **Microsoft Excel**, Microsoft Access and understanding of **Structured Query Language (SQL).**
- Integrated R and **Python** scripts to set up Data visualization in **Tableau**. Used Databricks to connect the data in **Tableau**.
- Wrote **SQL** to identify and correct data anomalies at request of SME's.
- Created **Tableau** scorecards, dashboards using stack bars, bar graphs, scattered plots, geographical maps, Gantt charts using show me functionality.
- Good experience on dashboards designing with large data volumes from various data sources (**SQL** server, tera data, etc.)
- Expertise Configuring Repository, Create/Manage Dashboards, Reports/Answers and Building Physical, Business Model and Presentation Layer.
- Experienced in Analyzing the BI Needs, interpreting business user requirements, and translating them into reports.
- Involved in converting Hive/**SQL** queries into Spark transformations using Spark data frames, Scala and **Python**.
- Maintenance of large data sets, combining data from various sources by Excel, Access and **SQL** queries.
- Use **SQL** to access, read, and analyze the data stored in databases (extract data, join tables together, and perform aggregation).
- Designed, developed, tested, and maintained **Tableau** functional reports based on user requirements.
- Worked on different data formats such as **JSON, XML** and performed machine learning algorithms in **Python**.
- Mastered the ability to design and deploy rich Graphic visualizations with Drill Down and Drop-down menu option and Parameters using **Tableau**.

- Developed **Tableau** data visualization using Cross tabs, Heat maps, Box and Whisker charts, Scatter Plots, Geographic Map, Pie Charts and Bar Charts and Density Chart.
- Define access controls and implement security measures whenever required
- Drill-down data and prepare reports with utmost accuracy.
- Technical knowledge of **Tableau** Products and versions including **Tableau** Server, **Tableau** Public, **Tableau** Online, **Tableau** Desktop, and so on.
- Performed Exploratory Data Analysis using **Python**. Also involved in generating various graphs and charts for analyzing the data using **Python** Libraries.
- Able to build visually stunning and interactive dashboards.

Client: Wipro, India

Dec 2014 – Dec 2015

Role: Jr. Data Analyst

Responsibilities:

- Hands-on development in assisting the users in creating the worksheets and modifying them and **data visualization** dashboards.
- Designed, developed, and tested various **Tableau/Tableau visualization** for the dashboard and **ad-hoc reporting solutions**.
- Preparing Dashboards using the **calculations, and parameters** in **Tableau** and creating **SQL** datasets for **Tableau** and Ad-hoc reports.
- Designed, developed, and maintained **Tableau functional** reports based on the requirements of the user.
- Experience in the **design and development of Tableau visualization solutions**.
- Involved in reviewing business requirements and analyzing data sources from **Excel/Oracle SQL Server for design, development, testing, and production rollover** of reporting and analysis projects within **Tableau Desktop** (10.5, 10.4/10.3/10.2/10.1/9.3/9.2).
- Extracted data from the database using Excel/Access, **SQL** procedures and created **Python** data frames for statistical analysis, validation, visualization, and documentation.
- Designed data profiles for processing, including running **SQL, and using Python** for Data Acquisition and Data Integrity which consists of Datasets Comparing and Dataset schema checks.
- Write **SQL** queries that store the result in JSON format and used the files to build a dashboard using **Tableau**.
- Integrated R and **Python** scripts to set up Data visualization in **Tableau**. Used Databricks to connect the data in **Tableau**.
- Designed data profiles for processing, including running **SQL, and using Python** for Data Acquisition and Data Integrity which consists of Datasets Comparing and Dataset schema checks.
- Extracted data from the database using Excel/Access, **SQL** procedures and created **Python** data frames for statistical analysis, validation, visualization, and documentation.

Education:

- Bachelors of technology , Computer Science from JNTUH(2011-2015)
