

SANDEEP REDDY

Phone: 682-651-5565

Email: sandeepreddywork@gmail.com

CAREER OBJECTIVE

- Highly motivated **Sr. NET Developer** with **7+ years of experience** in designing, developing, and deploying enterprise-grade software solutions across finance, agriculture, and technology domains.
- Proven expertise in **C# .NET 6/7, ASP.NET Core Web API, LINQ, ADO.NET, Web Services, Entity Framework**, and service-oriented architectures.
- Strong database background with **MS SQL Server, PostgreSQL, and MongoDB**, including stored procedures, triggers, functions, and advanced query optimization for large datasets.
- Skilled in **REST API design and development**, integrating with enterprise systems, and applying best practices in authentication, authorization, and exception handling.
- Hands-on experience with **Angular 16+, TypeScript, RxJS, and NgRx**, building interactive, responsive, and scalable web applications with reactive programming and state management.
- Solid foundation in **Scrum/Agile methodology**, including sprint planning, backlog grooming, daily standups, and CI/CD pipeline deployments for faster, reliable delivery.
- Strong background in **writing unit tests** using xUnit, Moq, and Jasmine/Karma for Angular, following **Test Driven Development (TDD)** to ensure quality and maintainability.
- Experienced in **batch job automation and scheduling** using **Control-M** and event-driven architectures with **RabbitMQ** and **Apache Kafka** for reliable messaging and data streaming.
- Extensive cloud experience with **Microsoft Azure services** such as App Services, Key Vault, Redis Cache, Blob Storage, Azure SQL, Kubernetes, and Application Insights.
- Expertise in **CI/CD pipelines using Azure DevOps**, with version control via **Git, TFS**, and project tracking using **Jira and Azure Boards**.
- Skilled in performance optimization with **lazy loading, caching, code splitting, and scalable microservices orchestration**.
- Excellent problem-solving and communication skills, with a proven track record of mentoring team members and collaborating effectively in cross-functional Agile teams.
- A continuous learner and self-starter, committed to delivering **clean, maintainable, and high-performing software** aligned with business goals.
- A good team player with strong ability to learn and adapt new skills and makes efforts to do the work at hand and manage time effectively.

EXPERIENCE

SENIOR SOFTWARE ENGINEER — Fidelity

Dallas, TX, June 2023 – present

- Designed and developed enterprise-grade applications from scratch using **.NET 7, C#, Entity Framework Core, and REST APIs**, ensuring scalability, security, and high performance.
- Developed **service-oriented and microservices-based applications**, enabling modular deployments and reusability across multiple domains.
- Developed and deployed **ASP.NET Core Web API services to Azure App Services**, ensuring high availability and seamless scalability.
- Implemented **file handling APIs** (upload, retrieval, deletion) with **Azure Blob Storage**, supporting large files and parallel access.
- Configured **Application Insights and custom logging** for proactive monitoring, exception tracking, and performance optimization.
- Built modern, responsive web applications using **Angular 16+, TypeScript, RxJS, and NgRx** for predictable state management and reactive programming.

- Implemented a centralized **NgRx Store architecture** for predictable state management, leveraging **RxJS Observables**.
- Built and optimized complex **database solutions with MS SQL Server and MongoDB**, including stored procedures, triggers, and advanced query performance tuning.
- Ensured cleaner separation of concerns by combining **NgRx Actions, Reducers, and Effects** with RxJS for complex business logic.
- Configured **Azure Redis Cache** to store frequently accessed API responses, reducing SQL load and improving response times by up to 70%.
- Integrated **Azure Key Vault** with Web APIs to securely access secrets, API keys, and certificates at runtime.
- Deployed and orchestrated workloads on **Azure Kubernetes Service (AKS)** for enterprise-grade networking, scalability, and identity management.
- Designed and scheduled **batch processing workflows using Control-M**, automating nightly jobs and critical data processing tasks.
- Integrated **RabbitMQ** and **Apache Kafka** into microservices for reliable message queuing, asynchronous communication, and high-throughput event streaming.
- Set up **CI/CD pipelines in Azure DevOps**, automating build, test, and deployment processes for rapid and reliable delivery.
- Configured **Kubernetes liveness/readiness probes** to ensure uptime for critical services like authentication, loan calculators, and reporting engines.
- Applied **Scrum/Agile methodologies**, participating in sprint planning, daily standups, retrospectives, and backlog grooming.

SOFTWARE ENGINEER— Mcquaire

Houston, TX, *June 2022 - May 2023*

- Built a full-featured enterprise web portal using **ASP.NET Core Web API**, supporting role-based access and modular workflows
- Implemented **Entity Framework Core (code-first)** with complex joins, LINQ queries, and performance-tuned stored procedures.
- Developed **custom middleware** in .NET Core for centralized error handling, correlation ID tracking, and request logging.
- Applied **In-Memory Caching** in ASP.NET Core to reduce database round-trips for static configuration data.
- Built **modular and reusable Angular components** with lazy loading and route guards to enhance security and performance.
- Implemented complex reactive forms, two-way data binding, and custom validators to enforce business rules in workflows.
- Developed UI features like debounced search inputs and auto-refresh dashboards using RxJS for optimized performance.
- Integrated Angular applications with secured REST APIs using JWT authentication, including token refresh and interceptor patterns.
- Designed and optimized stored procedures, lookup tables, and configuration data retrieval in Azure SQL Database for high availability and performance.
- Leveraged Azure Key Vault to securely manage secrets, database connections, and API credentials.
- Built Azure Functions for background jobs such as automated notifications, token cleanups, and nightly data synchronization.
- Maintained clean and well-documented codebases in Git repositories, following branching strategies for collaboration.
- Practiced Scrum methodologies — participated in sprint planning, daily standups, backlog refinement, and sprint demos.
- Used Jira and Azure Boards for backlog management, sprint tracking, and defect logging.
- Conducted code reviews and enforced SOLID principles, improving maintainability and reliability across the development team.

APPLICATION DEVELOPMENT ANALYST— AQA Nexus

Maharashtra, India *May 2019 - July 2021*

- Participated in **requirement analysis, effort estimation**, and preparation of **low-level design documents** to ensure alignment with client expectations.
- Designed and developed dynamic user interfaces using **HTML5, CSS3, JavaScript, jQuery, AngularJS, and Angular**.
- Migrated legacy applications from **ASP.NET MVC and AngularJS to ASP.NET Core and Angular**, improving performance and maintainability.
- Created **reusable UI components and partial views**, ensuring consistency and modularity.

- Developed **Controller actions in ASP.NET MVC/Core** to encapsulate business rules and act as intermediaries between UI and data layers.
- Built **ASP.NET Core Microservices** using RESTful principles and clean architecture.
- Implemented **secure authentication and authorization** mechanisms using JWT and OAuth2 (complementing newer projects).
- Designed and optimized **SQL Server database objects** including tables, views, and stored procedures.
- Performed **data modeling, query optimization, and performance tuning** for improved execution time.
- Generated **Excel reports with 100k+ records** and **dynamic PDF certificates** for business-critical reporting.
- Developed Azure components such as **Web Apps, API Apps, Logic Apps, Function Apps, WebJobs, Azure Queues, and Service Bus**.
- Managed product backlogs, user stories, and releases using **Azure Boards** and DevOps work items.

APPLICATION DEVELOPMENT ASSOCIATE— Oil Tanking

Hyderabad, Telangana, India May 2017 - April 2019

- Assisted in developing web applications using **ASP.NET MVC** and **C#** under the guidance of senior developers.
- Contributed to designing user interfaces using **HTML5, CSS3, JavaScript, jQuery, and AngularJS**.
- Helped in creating and maintaining reusable UI components and views for consistent layout and styling.
- Implemented basic client-side validation using JavaScript and AngularJS form handling.
- Supported development of business logic using **C#** by working on models, controllers, and helper methods.
- Participated in writing and debugging controller actions to handle user requests and return appropriate views or JSON data.
- Learned to manage data flow between views and controllers using ViewModels and strongly typed models.
- Assisted in integrating front-end code with server-side logic using MVC Razor views and partial views.
- Worked with Entity Framework to perform basic database operations such as insert, update, and fetch.
- Helped write stored procedures and SQL queries in SQL Server for data retrieval and reporting needs.
- Participated in unit testing and manual testing activities to verify functionality and ensure quality.
- Gained familiarity with version control using Team Foundation Server (TFS) for source code management.
- Involved in maintaining documentation for developed features and code walkthroughs for better understanding.

EDUCATION

MASTERS IN COMPUTER SCIENCE — TEXAS TECH UNIVERSITY

Lubbock, Texas, Aug 2021 - May 2023

BACHELOR OF TECHNOLOGY IN INFORMATION TECHNOLOGY — JAWAHARLAL NEHRU TECHNICAL UNIVERSITY

Hyderabad, Telangana, Aug 2013 - May 2017
