

Sanjeevani Talapelliwar

Sr. SFDC Developer/Admin

Email: sanjeevanito407@gmail.com Ph #: 408-520-0448

PROFESSIONAL SUMMARY:

- **10+ years** of experience as a Salesforce professional, committed to maintain cutting edge technical skills and up-to-date industry knowledge experience as a Salesforce CRM and Force.com platform Developer.
- Hands on experience in SFDC development using the APEX classes, Triggers, Components, Reports, Force.com IDE, Eclipse with SOQL, SOSL and Force.com plug-in.
- Extensive experience on working on Cloud CRM, Automation, Salesforce.com, and Configured, Implemented, administrated and maintained the salesforce.com platform.
- Pervasive experience in performing the administrative and development related tasks like consigning Roles, creating Profiles, Visual Force pages, Validation Rules, Users, Custom Reports, Workflows, Email Alerts, Entity Relationship Diagrams and Page Layouts.
- Proficient in dealing with the functionalities related to the Service Cloud, Sales Cloud.
- Experience working with Salesforce Marketing Cloud in support of an email marketing program using features like email studio, automation studio, mobile studio and journey builder.
- Good knowledge in Einstein Analytics, including Datasets, Dataflows, Lenses, Dashboards, Apps and Security Predicates.
- Thorough knowledge in the security and sharing model which is used to finely control the user's access to different data.
- Performed Validation Rules, workflows, e-mail services and approval processes using customization & Apex.
- Good experience in working on Eclipse IDE with Force.com Plug-in for writing business logic in Apex programming language.
- Hands-on experience in using New Lightning UI to bring Salesforce into the responsive UI era of web-based applications.
- Assisted in migration an application from Salesforce classic to lightning experience.
- Hands on experience in building custom lightning components and lightning applications.
- Enabled Aura Framework, by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in Lightning Applications.
- Experience in using LWC (Lightning web components) framework for configuring and developing lightweight and responsive applications.
- Strong familiarity in Understanding and writing user stories for the implementation of SOSL, SOQL and WSDL.
- Experience in SFDC Integration using Web Service and Apex Programming, Salesforce.com Service Cloud expertise.
- Strong leadership abilities and a quick learner to new concepts, Applications while managing and coordinating all phases of project-based effort
- Effective employment of Apex Data Loader, Import Wizard and Data Manipulation Language for data migration and management in bulk.
- Worked on migrating components using Force.com Ant migration tool, Copado, Flosum and Workbench from DEV to QA, SIT, UAT and production instances.
- Managed and configured the Git Hub to maintain the different versions in common development environment and worked on pull requests.
- Developed and worked on different Salesforce.com environments such as sandbox and production environments.
- Experience with Workflow Issues, restart workflows, reset data fields, test and fix the validation rules.
- Experience in web technologies like HTML, XML and JavaScript.
- Ability to develop and effectively leverage relationships across an organization at all levels.
- Work well alone and as part of a team with excellent troubleshooting mechanisms and highly adaptable to different work environments.

TECHNICAL SKILLS:

CRM

Salesforce Technologies

Salesforce.com

Salesforce CRM, Lightning Components, Standard/Custom Objects, Roles and Profiles, Workflows, Assignments, Triggers, Record Types, VisualForce, Apex, Validation Rules and Approvals, SOQL, SOSL, Web services, Data Loader.

SFDC Tools	Force.com Eclipse IDE, Plug-in, Force.com Explorer, Force.com Excel Connector, Force.com Platform (Sandbox and Production) Exact target, Sales cloud, Service Cloud, Marketing Cloud.
Data Migration Tools	Data Analysis, Data Cleansing, Data Normalization, Data Migration, Data Loader, Copado
Web Technologies	HTML5, Angular JS, AJAX, JavaScript, XML, CSS3
Database	PL/SQL, SQL Server, Oracle, My SQL.
Other Tools	MS Office Suite, MS Excel, MS Visio, MS TFS.
Project Management	Agile/Scrum, Waterfall, Agile
Operating Systems	Windows, Linux, Unix

PROFESSIONAL EXPERIENCE:

Bank of the West | Tempe, AZ

Jan 2024 – Till Date

Sr. SFDC Developer

- Created modern Lightning Apps combining Lightning Design System, Lightning App Builder and Lightning Component features.
- Upgraded some Apps from Salesforce Classic to Lightning Experience to develop rich user interface and better interaction of pages.
- Worked on Salesforce Lightning Components for building customized components replacing the existing ones.
- Maintenance of installed Managed Packages in Lightning using Apex.
- Involved in using Lightning, Process Builder and Workflows. Worked on customization of Visualforce to have Lightning Experience for desktop and mobile applications.
- Performed SFDC integration using web service and apex programming, service entitlements Salesforce.com service cloud functionalities.
- Strong Knowledge about Sales cloud, Service cloud Customization and good understanding with Client/Server architecture, Object oriented design techniques and web application design.
- Performed troubleshooting and analysis to assess root cause of application issues.
- Implemented Pick lists, Dependent Pick lists, Lookups, Master detail relationships, validation and formula fields to the custom objects.
- Created Field Level Security along with Page Layout to manage the visibility and accessibility of fields for different Profiles.
- Integrated the Web Services for extracting the data from external systems to display in the pages of Salesforce.com.
- Worked with SOQL & SOSL queries with Governor Limitations to store and download the data from Salesforce.com platform database.
- Imported data from excel sheets in to Leads, Accounts, Contacts and Opportunities using Data Loader and Import Wizard.
- Implemented Web to Case, Email to Case functionalities to provide a better customer support to the customers.
- Created Lightning Apps combining Lightning Design System, Lightning App Builder and Lightning Component features.
- Developed Assignment rules, Escalation rules to enable proper routing of cases to the case team members.
- Developed Workflow Rules, Tasks, Emails and Alerts to track customer related tasks and activities.
- Designed several types of Email templates for auto response to customers.
- Develop complex functionality using Apex – Triggers, Classes, Controllers Web Services.
- Experience in managing repositories using Jenkins and Git Hub.
- Managed and configured the Git Hub to maintain the different versions in common development environment and worked on pull requests.
- Worked on migrating components using salesforce native change sets, GitHub, Workbench from DEV to QA, SIT, UAT and production instances.
- Worked on Jira to track daily progress and followed agile methodology for best practices.
- Implemented agile methodologies with continuous build and controlling iterative and incremental projects.
- Application framework design with respect to convenience of the end user.
- Experience in working with Agile Software Development methodology. Participated in Sprint Grooming sessions, Daily Standups, User story Estimation, Sprint Demos, Sprint Review, Retrospective sessions.

Environment: Salesforce.com, LWC, Data Loader, Apex Language, Visual Studio, Microsoft Office, Sales Cloud, Service Cloud, Windows.

Pacific Specialty Insurance | Anaheim, CA

Nov 2022 – Dec 2023

SFDC Developer

- Developed Lightning apps using lightning Components and made them compatible with Salesforce1 mobile app.

- Implemented Salesforce Lightning Components for small set of users for customizing reports and dashboards.
- Created many Email Templates and Mail Merge Templates and was involved in doing the mail merge for different standard and custom objects in Lightning Experience.
- Worked with External objects in Salesforce which is another feature introduced with Lightning components.
- Used field level security along with page layout to manage the visibility and accessibility of fields for different profiles.
- Worked on designing and developing Lightning Community Builder and developed Lightning Components using Aura framework.
- Wrote triggers to process incoming service e-mail requests from customers to automatically create new case records.
- Integrated the Web Services for extracting the data from external systems to display in the pages of Salesforce.com.
- Created multiple Lightning Components, added CSS and Design Parameters that makes the Lightning component look and feel better.
- Involved on creating Lightning Pages inside Lightning community Builder.
- Worked on customization of Visualforce to have lightning experience for desktop and mobile applications.
- Developed Workflow rules, tasks, emails and alerts to track customer related tasks and activities.
- Involved in data mapping and migration of data from legacy systems to Salesforce.com Objects and fields.
- Wrote SOQL and SOSL statements within custom controllers, extensions and triggers by following the Governor limits in Salesforce.com.
- Used Salesforce Lightning combines the new Lightning Design System, Lightning App Builder and Lightning Components to enable anyone to quickly and easily create modern enterprise apps build on Salesforce1 Platform.
- Implemented SFDC Service Cloud, Web Services, Created Group, Deal Rooms provisioning and marketing teams.
- Used Visual Studio to develop custom application on developer console using Apex.
- Designed various types Email templates for auto response to customers.

Environment: Salesforce.com, Visual Studio, Apex Classes, Lightning, Triggers, Controllers, Custom Objects, Records, Page Layouts, Roles, Work flows, SOSL, SOQL, Aura, Service Cloud, Change Sets, Dash Boards, Data Loader, Data Migration and Windows.

Columbia Sportswear | Portland, OR

Aug 2021 – Oct 2022

SFDC Developer

- Implemented Agile Methodologies, Test-Driven Development (TDD) and managed incremental and iterative processes.
- Used Lightning to generate various reports and dashboards to track sales performance.
- Designed, developed, and implemented a Lightning Application to replace a legacy payment system.
- Developed Lightning components for a single interactive payment calculator to generate a payment plan.
- Implemented Lightning application using SLDS and Lightning components.
- Configured components for Lightning app pages and Lightning app builder.
- Designed ready-to-use picklist pages, record pages, and Outlook pages with Lightning components.
- Worked on the Sales Cloud to process business logic within the organization.
- Implemented advanced fields like Pick list, Formula Fields, Field Dependencies, Validation Rules, and Workflows, sharing rules, and Approval Processes based on application requirements for automated alerts, field updates, and email generation.
- Created page layouts, record types, profiles, permission sets, security and sharing, cases, report types, reports, dashboards, and master-detail relationships.
- Implemented business logic using workflow rules, related tasks, time-triggered tasks, email alerts, and field updates.
- Used Apex Data Loader to Insert, Update and Import data from Microsoft Excel into Salesforce.com.
- Worked on mapping and migration of data from legacy systems to Salesforce.com objects and fields.
- Created customized Dashboards to track productivity and performance of business centers and their sales teams.
- Utilized Force.com Explorer for data manipulation using SOQL & SOSL within Governor Limits.
- Utilized Salesforce migration tools with Change Sets to deploy Salesforce components from Sandboxes to Production instances.

Environment: Salesforce.com, Apex Language, Lightning, Sales Cloud, REST API, SOQL, SOSL, Apex Data Loader, Force.com Explorer, Force.com Migration Tools, Oracle, Agile.

California Department of Public Health (CDPH)

Jan 2021 – Jul 2021

Salesforce Developer

- Designed and developed Lightning Community website for marketing using Lightning community builder, Lightning components, SLDS, Lightning events, HTML5, CSS, Lightning controllers.
- Enabled Aura Framework, by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in Lightning Applications.
- Used Visual Studio to develop custom business logic including Apex Classes, Apex Triggers and Lightning pages.

- Developed re-usable UI components with the Salesforce Lightning Component Framework for the Document API Integration on opportunity.
- Created lightning actions, lightning apps and more than 30 components using Salesforce lightning framework.
- Used the Aura framework and Salesforce lightning Design System (SLDS).
- Worked on creating Lightning Pages inside Lightning Community Builder.
- Developed Web Service Callouts from Salesforce to External Applications.
- Created workflow rules and defined related tasks, time triggered tasks, email alerts, filed updates to implement business logic.
- Used SOQL & SOSL with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
- SFDC integration using web service and apex programming, service entitlements Salesforce.com service cloud functionalities.
- Developed Apex Classes, Controller Classes and Apex Triggers for various functional needs in the application.
- Created various Batch jobs and time-based workflows to update the data regularly.
- Supported the data migration activities for migration of the data from various business sources with the support of Salesforce CRM.
- Created Automatic Password for New Community users in the Community and Email Alerts for new Users.
- Created various Profiles, Roles, and Page Layouts and configured the permissions based on the organization hierarchy requirements.
- Worked on creating Lightning Pages inside Lightning Community Builder.
- Used a tool named Copado, Force.com IDE migration tool for deploying the Force.com components (Apex Classes, Objects, Triggers, Visualforce page components, Visual Force pages) from sandbox to sandbox and sandbox to production environment.
- Developed Apex REST Webservices and HTTP Callouts for calling the API provided by downstream applications.
- Integrated the Web Services (REST) for extracting the data from external systems to display in the pages of Salesforce.com.
- Used Data Loader to bulk load data into Salesforce.com from other databases and CSV files.
- Worked on migrating components using Force.com Ant migration tool, GitHub, Workbench from DEV to QA, SIT, UAT and production instances.
- Used JIRA tool for tracking the stories and creating tasks. Worked in Agile environment with Scrum Methodology.

Environment: Salesforce.com, Lightning Web Components, Sales Cloud, Apex Language, Controllers, Web Services, REST, Workflows, Approval Process, Data Loader, SOQL, SOSL, Visual Studio, Change Sets, Windows.

Leslie's Poolmart, Phoenix, AZ
Salesforce Developer

August 2019 – Dec 2020

-
- Worked with end users and business analysts for requirements gathering, analysis and provided design inputs, performing roles and responsibilities.
 - Have experience in working with development teams and system administrators for development, evaluation, test and launch phases of software development life cycle in release management.
 - Also, have worked on Configuring and release software application updates to QA along with Production environments.
 - Collecting and providing ongoing project feedback to change management organization. Recommend process improvements alternative to roll out tools and processes.
 - Have worked in Identifying new tools and technologies to develop release streams and builds, like Using Flosum as a complete Enterprise Continuous Integration Delivery (CI/CD) and Release Management Solution for Salesforce.
 - Develop Apex triggers, apex classes, batch apex and schedule apex to automate the business processes.
 - Enabled Aura Framework, by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in Lightning Applications.
 - Knowledge in using LWC (Lightning web components) framework for configuring and developing lightweight and responsive applications.
 - Re-structured custom objects, Master-detail relationships between objects to better suit the organization's business needs. Worked on various SFDC standard objects like Campaigns, Leads, Accounts, Contacts, Opportunities, Cases, and Activities.
 - Used Force.com IDE for development for Visualforce Pages, Apex classes, Triggers and debugging and analyzing logs.
 - Used SOQL queries with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
 - Created many Lightning Components and server-side controllers to meet the business requirements.
 - Worked on grid form record information in an object with features of inline editing for multiple record saved at once using lightning components.

- Used a tool named Snapshot, Force.com IDE migration tool for deploying the Force.com components (Apex Classes, Objects, Triggers, Visualforce page components, Visual Force pages) from sandbox to sandbox and sandbox to production environment.
- Worked on the JQuery, JavaScript Library that simplifies HTML document traversing, and event handling
- Worked on ETL tools like Mulesoft and Webservices API to integrate Salesforce with other applications within the organization.
- Building Complex Apps and Heavy Customization Components in Salesforce Lightning.
- Grid buddy AppExchange Product -Created some complex grids using grid buddy and customized grid buddy style to use JavaScript and CSS.
- Experience working with Salesforce Marketing Cloud in support of an email marketing program using features like email studio, automation studio, mobile studio and journey builder.
- Worked on various activities like transferring data, extracting data, sending an email, import file, SQL query, Amp script and filter activity for performing specific action.
- Worked on Email Marketing strategy for the organization and drive entire email marketing campaigns that include Copywriting, design, coding, and deployment through ExactTarget program.
- Implemented testing and segmentation strategies into email marketing campaigns to drive optimized open rates and increased leads.
- Worked on the development of email communications leveraging Content Builders tool, HTML and CSS where necessary in partnership with our CRM team.
- Proficiency with SFMC Content Builder tools, responsive/adaptive email experience.
- Develop new data-driven campaigns, and personalization initiatives leveraging SFMC.
- Created many Email Templates and Mail Merge Templates and was involved in doing the mail merge for different standard and custom objects in Lightning experience.
- Worked on additional duties include campaign reporting, creative support, quoting and scoping custom development requests, facilitating client creative reviews, resolving client system issues and troubleshooting email rendering problems.
- Migrated data using Apex Data loader to centralize data and processes across different divisions that were previously using decentralized systems / databases.
- Also have experience in Releasing and migrating packages between environment, by using the Import Wizard.
- Developed Web Service Callouts from Salesforce to External Applications using SOAP and REST API.
- Support Enterprise software platform such as Microsoft azure.
- Enabled SAML based Single Sign-On in the Production and Sandbox for authentication.
- Defined lookup and master-detail relationships on the objects and created junction objects to establish connectivity among objects.
- Worked extensively with lightning process builder flows, Connect API, Chatter and quick Action.
- Write test classes for the class that you develop and ensure more than 80% code coverage.
- Deploy changes between different environments and work on sandbox refresh process.
- Worked within a Scrum team comprised of onshore and offshore developers, testers and business analysts to implement user stories in an agile fashion.

Environment: Salesforce.com Platform, Force.com, Force.com Eclipse IDE, Lightning Experience, Lightning Components, Apex classes and Controllers, HTML, CSS, Data Loader, WSDL, SOAP, REST, SOQL, SOSL, Scrum, Custom objects, Custom fields, sandbox, Web Services, Oracle.

Freeway Insurance, Huntington Beach, CA

January 2018 – July 2019

Salesforce Developer

-
- Performed the role of Salesforce.com Developer in the organization.
 - Interacted with various business team members to gather and documented the requirements. Implemented the requirements on Salesforce.com platform and Force.com IDE Plug-in using Eclipse.
 - Implemented Service Cloud including: Service Console, Customer Portal & Communities, Case Feed, Omni Channel, Knowledge Base and Entitlements.
 - Experience in using functionalities related to service cloud like case and knowledge management as well as in solution management also having experience in CTI integration for integrating third party computer-telephony integration (CTI) systems with Salesforce Call Center using a browser-based JavaScript API.
 - Worked on end to end implementation of CTI Integrations, Supported the team with the workflow of the integrations
 - Experience with Avaya systems including Avaya S8700 series, Avaya Definity/Communications Manager, voice provisioning and Vector Directory Number (VDN), Computer Telephony Integration (CTI), and Interactive Voice Response (IVR)
 - Exposer with IVR and intelligent call routing technologies, CTI integrations, CRM, and voice application integration protocols such as VXML and speech recognition.

- Developed several Triggers, Apex classes and Visual force pages as part of the application development.
- Customized the Dashboards to track usage for productivity and performance of business centers and their sales teams.
- Worked with Salesforce Lightning connects a new feature of integrating with 3rd party applications.
- Developed Lightning apps using Lightning Components and made them with compatible with Salesforce1 mobile app.
- Enabled Aura Framework, by adding Aura Attributes and Aura Handlers for Events to focus on Logic and Interactions in Lightning Applications.
- Designed, Implemented and deployed the Custom objects, Page layouts, Custom tabs, Components to suit to the needs of the application.
- Created Custom Objects and defined lookup and master-detail relationships on the objects and created junction objects to establish many-to-many relationship among objects.
- Involved in Salesforce.com Application Setup activities and customized the applications to match the functional needs of the organization.
- Assisted in migration an application from Salesforce classic to lightning experience.
- Perform various development activities for DevOps practices for the project, including continuous integration, continuous delivery, continuous testing, and continuous monitoring.
- Built and deployed Docker containers to break up monolithic app into microservices, improving developer workflow, increasing scalability, and optimizing speed.
- Wrote Puppet manifests and modules to deploy, configure, and manage servers.
- Created various profiles and configured the permissions based on the organizational hierarchy requirements.
- Customized tabs for different business user groups and business centers.
- Created the workflows for automated lead routing, lead escalation, alerts and custom coaching plans.
- Implemented escalation rules, automatic case generation and their escalation to call center representative, and generated email alerts for quick issue resolution.
- Performed the role of support engineer for the internal users and helped them in getting used to the application, generated reports and saved them for further access to the users.
- Customized the entire Salesforce.com applications to incorporate the business requirements which involved creating Web Forms and processing the data in SFDC with the extensive usage of Web services API.
- Used the sandbox for testing and migrated the code to the deployment instance after testing.
- Involved with Salesforce.com Premier Support and handled the support cases with the help of salesforce.com support.
- Provided the training to the internal business users to use the application and develop their own custom reports.

Environment: Salesforce.com platform, Apex, Visual Force, Data Loader, Lightning, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls, Sandbox data loading, Data Loader, SF Explorer, Eclipse IDE Plug-in, AppExchange apps, Flows, SOAP, REST API.

CirroLogix, India

September 2015 – August 2017

Salesforce Developer

-
- Implemented the Salesforce.com applications using Agile SCRUM Methodology that involves the iterative development methodology
 - Created Objects and fields, Relationships and Record Types, Page Layouts, Profiles and Assignments Rules
 - Performed the roles of Salesforce.com Developer / Implementer in the organization.
 - Experience in Salesforce Service Cloud i.e. customer relationship management (CRM) platform for customer service and support.
 - Involved in Design and development of Workflow Rules, Triggers, Validation Rules, and other customizations with Salesforce.com
 - Developed Salesforce.com APEX and Web Services API on Force.com IDE
 - Created workflow rules and defined related tasks, time triggered tasks, email alerts, filed updates to implement business logic.
 - Extensively used Data Loader for insert, updates, and bulk import for Accounts, Contacts, Leads and Opportunities.
 - Developed data migration scripts and also implementing data cleansing tools.
 - Customized the Dashboards to the track usage for productivity and performance of business centers and their sales teams.
 - Designed, Implemented and deployed the Custom objects, Page layouts, Custom tabs, Components, and S Control to suit to the needs of the application.
 - Created Custom Objects and defined lookup and master-detail relationships on the objects and created junction objects to establish many-to-many relationship among objects.
 - Created various profiles and configured the permissions based on the organizational hierarchy requirements.
 - Customized tabs for among different business user groups and business centers.
 - Performed Unit Integration, Regression and User Acceptance Testing.

- Created the workflows for automated lead routing, lead escalation, alerts and custom coaching plans.
- Developed various Visual Force pages to manage sales plan call sheets within Salesforce, capturing prep data and call activity.
- Implemented various Custom Reports and deployed them for different business user levels.
- Implemented escalation rules, automatic case generation and their escalation to call center representative, and generated email alerts for quick issue resolution.

Environment: Salesforce.com platform, Apex Language, Visual Force (Pages, Component & Controllers), Pages, Data Loader, HTML, Java Script, Apex Triggers, Web Services, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls, Sandbox data loading, Eclipse IDE Plug-in.

Dhruvsoft Services, India
Salesforce Developer/Admin

December 2013 – August 2015

-
- Involved in Salesforce.com Application Setup activities and customized the apps to match the functional need i.e. Sweep & Match, Custom Member Search, and Data Synchronization by web services integration.
 - Created various Standard and Custom Reports/Dashboards (summary reports, matrix reports, pie charts, dashboards and graphics) and Report Folders to assist managers to better utilize Salesforce.com as a sales tool and configured various Reports and for different user profiles.
 - Good business knowledge of Sales Force.com in the areas of Salesforce service cloud.
 - Provided post-implementation support to assist end users in creating reports, dashboards and certain Administration tasks including creating and maintaining user profiles and privileges.
 - Implemented Web to Case, Email to Case functionalities to provide a better customer support to the customers.
 - Single-Sign On (SSO) integration Implemented for browser-based logins to Salesforce.
 - Created users, roles, public groups and implemented role hierarchies, sharing rules and record level permissions to provide shared access among different users.
 - Involved in the Data Transformation and Data Cleansing activities while transferring the data from the external system into salesforce.com using Apex Data Loader.
 - Created test scenarios on Sandbox environment, created packages and moved it between Sandboxes and Production environments to place final implementations.
 - Experienced in Unit Testing, for the customizations and developments done during the project.
 - Worked on Force.com Performance testing and Load testing that includes Force.com Load Simulation testing and Force.com Performance testing to test the performance issues and stability of the product at high load
 - Worked on minor enhancements to SFDC application required by business users from time to time.

Environment: Salesforce.com platform, Apex, Visual Force, Data Loader, Workflow & Approvals, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls, Sandbox data loading, Data Loader, AppExchange apps.

Education: Bachelors in EEE (Electrical and Electronics Engineering), Rajiv Gandhi Technical University, Bhopal in 2014.
