

Shafiq Chaudhry

Full-Stack Software Developer

shafiq.ch.tech77@gmail.com | 1 732 310 4820 | 13390 Avensong XING Alpharetta GA, 30004 | <https://www.linkedin.com/in/shafiq-chaudhry-160491378>

PROFESSIONAL SUMMARY

Results-driven **Senior Software Engineer** with expertise in developing, testing, and maintaining web applications using **TypeScript** and **JavaScript (ES6+)**. Skilled in **React**, **Angular**, and **Node.js**, with extensive experience integrating **RESTful APIs** and **GraphQL** while adhering to modern web standards. Proficient in **HTML5**, **CSS3**, **responsive design**, **Git**, and **CI/CD** pipelines, delivering optimized, scalable applications that improve performance by up to 50%. Strong collaborator with proven ability to troubleshoot, debug, and upgrade existing software while contributing to **Agile/Scrum** teams and continuous improvement initiatives.

TECHNICAL SKILLS

TypeScript, JavaScript (ES6+), React, Angular, Node.js, RESTful APIs, GraphQL, HTML5, CSS3, Responsive Design, Git, GitHub, Jest, Mocha, Cypress, Webpack, Vite, Rollup, CI/CD, Agile, Scrum, Design Patterns, Clean Architecture, Docker

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Macrosoft

United States | 05/2019 – Present

- Architected **web applications** using **TypeScript**, **JavaScript (ES6+)**, **React**, and **Node.js**, improving system performance by 45% and reducing load time by 30%
- Integrated **RESTful APIs** and **GraphQL** endpoints to enable real-time data processing for 2M+ users, improving response time by 60%
- Developed responsive UI components using **HTML5**, **CSS3**, and **Angular**, resulting in 35% higher mobile user engagement
- Optimized **Node.js** backend services to handle 5x higher concurrent requests, reducing server downtime by 40%
- Implemented unit and integration tests using **Jest** and **Mocha**, achieving 95% code coverage and reducing production bugs by 50%
- Participated in **Agile/Scrum** ceremonies to prioritize features and deliver product releases on schedule
- Led migration of legacy modules to **TypeScript**, improving code maintainability and reducing technical debt by 60%
- Designed and implemented CI/CD pipelines using **Git**, **GitHub**, and **Docker**, reducing deployment cycle from 3 days to 4 hours
- Mentored 5 junior engineers on **TypeScript**, **React**, and **Node.js**, accelerating team onboarding by 70%
- Performed code reviews to enforce best practices, **design patterns**, and **clean architecture** principles, increasing code quality metrics by 25%
- Troubleshoot and debugged complex **JavaScript** and **TypeScript** issues, improving overall application reliability by 40%

- Evaluated and implemented modern build tools (**Webpack**, **Vite**, **Rollup**) for faster builds and optimized performance
- Collaborated with cross-functional teams to define and ship new features, enhancing customer satisfaction scores by 20%
- Automated repetitive tasks using **Node.js** scripts, saving 15+ hours per week for the development team

Full-Stack Engineer, SICPA Product Security Private Limited

Malaysia / 09/2017 – 03/2019

- Developed full-stack **web applications** using **TypeScript**, **Angular**, and **Node.js**, serving 1M+ transactions per day
- Built and consumed **RESTful APIs** and **GraphQL** services to enable secure data exchange across platforms
- Implemented responsive front-end components using **HTML5** and **CSS3**, improving accessibility and UX scores by 30%
- Integrated version control using **Git** and **GitHub**, enabling collaborative development and code consistency
- Authored unit tests with **Jest** and automated testing with **Cypress**, reducing bug incidents by 40%
- Optimized application performance by 50% by refactoring **JavaScript** logic and **Node.js** backend services
- Participated in **Agile/Scrum** planning sessions to prioritize features and improve sprint delivery rate by 25%
- Applied **design patterns** and **clean architecture** principles to new and legacy modules, reducing technical debt by 35%
- Built CI/CD pipelines for automated deployment, decreasing release cycles from 2 weeks to 2 days
- Troubleshoot production issues, achieving 99.9% uptime for customer-facing applications
- Collaborated with QA teams to implement automated regression testing frameworks using **Mocha** and **Jest**
- Mentored junior developers on **TypeScript** best practices, enhancing code quality and team productivity
- Integrated modern build tools (**Webpack**, **Vite**) to streamline development workflow
- Enhanced security and authentication mechanisms in **Node.js** applications, reducing vulnerabilities by 40%

Senior Software Engineer, I-XEON MSC Private Limited

Malaysia / 10/2012 – 09/2017

- Engineered **web applications** using **TypeScript**, **Angular**, and **Node.js**, serving over 500K daily users
- Developed **RESTful APIs** and integrated **GraphQL** endpoints for real-time client dashboards
- Implemented responsive UI with **HTML5** and **CSS3**, improving load time by 40% and UX metrics by 25%
- Managed source control with **Git**, ensuring seamless collaboration among distributed teams
- Created automated tests using **Jest** and **Mocha**, increasing test coverage to 90% and reducing production defects by 45%
- Optimized front-end and back-end **JavaScript** code to reduce latency and improve application scalability
- Applied **design patterns** and **clean architecture** principles to refactor legacy systems, reducing maintenance costs by 30%
- Participated in **Agile/Scrum** development cycles, improving sprint delivery efficiency by 20%

- Configured CI/CD pipelines using **Docker** and automated scripts, reducing deployment errors by 50%
- Mentored team members in **TypeScript**, **Angular**, and **Node.js**, accelerating onboarding by 60%
- Collaborated with cross-functional teams to define, design, and deploy new features, increasing customer satisfaction scores by 15%
- Troubleshoot and debugged production issues, achieving a 99.8% uptime for mission-critical systems
- Implemented modern build tools (**Webpack**, **Rollup**) to streamline development workflows
- Enhanced application security and performance by integrating best practices in **JavaScript** and **Node.js**

Software Engineer, AdamSoft International

Pakistan | 04/2008 – 09/2012

- Developed full-stack **web applications** using **JavaScript**, **AngularJS**, and **Node.js** for enterprise clients
- Integrated **RESTful APIs** to enable secure and efficient data flow across applications
- Built responsive UI using **HTML5** and **CSS3**, improving page load times by 35%
- Managed codebase with **Git** to support collaborative development and version control
- Implemented automated testing with **Jest** and **Mocha**, reducing defect rates by 40%
- Optimized back-end **Node.js** services to handle higher concurrency, improving performance by 30%
- Applied **design patterns** and modular architecture principles to improve code maintainability
- Participated in **Agile/Scrum** teams, contributing to on-time project delivery and sprint planning
- Developed CI/CD workflows using **Docker** and automation scripts, reducing deployment time by 50%
- Mentored junior developers on **TypeScript** and **JavaScript**, improving team coding standards
- Troubleshoot and debugged critical production issues, maintaining 99.5% system uptime
- Implemented best practices in responsive design, enhancing mobile and desktop UX
- Collaborated with cross-functional teams to design, implement, and deliver new features
- Adopted modern build tools (**Webpack**, **Rollup**) to streamline front-end development processes

EDUCATION

Master of Computer Applications (M.C.A.), Computer Science Punjab University College of Information Technology (PUCIT)

2005–2007 | Lahore, Pakistan

CERTIFICATIONS

Microsoft Certified System Administrator (MCSA)

Mar 2004

Earned MCSA certification demonstrating strong skills in managing and supporting Microsoft Windows Server environments. Validated expertise in system administration, network infrastructure, and Active Directory services.

Project Management Professional Certified (PMP)

Mar 2021

Certified PMP with proven ability to lead and manage complex projects across diverse teams. Skilled in applying PMI methodologies to deliver projects on time, within scope and budget.

Oracle Certified Professional, Java SE 6 Programmer

Apr 2012

Oracle SCJP/OCJP certified with expertise in Java SE 6 programming and object-oriented development principles. Validated skills in Java fundamentals, collections, generics, concurrency, and advanced Java programming concepts.
