SUMMARY

I have over 8 years of professional working experience as an Electrical Engineer, while working at Aspentech as a Power Systems Engineer I came to the realization that I had a prominent & extraordinary interest in Web Development, software development & Data Visualisation. I did several coding bootcamps in my free time & ended up loving coding immensely. I continued learning newer technologies & improve my skills to keep building web applications and software systems & have decided this what I want to do for the rest of my life. I have strong communication skills, great team player, excel in unpredictable and hectic environment & exceptional in completing multiple projects with competing deadlines. Strong team member, able to motivate others to achieve optimal performance while maintaining quality and safety. Strong interpersonal skills, interface effectively with coworkers, management and clients. For in depth details of my skills & over 100 projects that I have built please visit my portfolio website. <https://shahzadalatif.onrender.com>

PROJECTS

Secrets Web Application

I made this project using HTML5 & CSS3 frontend using EJS templates with a node JS backend. The project demonstrates use of authentication for users of websites, the password & emails are stored in a PostgreSQL data & data is processed using CRUD. I secured the password with encryption but hashing the password & then using 10 salt rounds to solidify the password encryption. I also implemented "Sign in with google" using NPM passport GoogleStrategy for an easier / secure login option for users. Once logged in, users can share their deepest & darkest secrets.

Keeper Web Application

I created this Keeper App project using various features React.JS like mapping data, integrating JSX components, map/filter/reduce, conditional rendering, React Hooks, Array destructuring, Event handling, changing complex states, managing component trees for a great UI experience as well as efficient functionality.

Top 10 Movies List

Top 10 movies website using Flask module in Python. I used WTForms to get the input from the user and then use "The Movie Database" API to search the movie name and gather the title, the image URL, year and description of the movie. I used relational SQLite database (PostgreSQL afterwards) to add, view, edit and delete the top 10 movies list.

EXPERIENCE

Electrical Engineer

📅 05/2016 - Present 📍 Canada

- **ARTELIA Canada Inc. (Mississauga, ON):** Worked on HYDRO ONE projects for designing SCADA, RTU, HMI design and programming. Creating and interfacing Network Monitoring System (NMS) databases for SCADA applications. Designing and interpreting electrical, controls drawings, schematics and specs for compliance. Visiting client's sites for configuration support & testing.
- **Aspen Technology Inc. (Montreal, QC):** Worked extensively SCADA platform comprising building, testing, configuration & delivery of AspenTech systems to Hydro-Quebec & New Brunswick Power in the project delivery team in ADMS (Advanced Distribution Management System). Excelling in giving system demonstrations, troubleshooting & customer care to Hydro-Quebec counterparts.
- **Top Modern For Elevators Est. (Jeddah, Saudi Arabia):** Making feasibility reports, technical specifications, datasheets preparation & ensuring progress is in line with the project deadlines & dealing with clients as well as ensuring client satisfaction. Leading a team of supervisors, project engineers & management staff.
- **Maryam Aziz Allah Al-Salmi Est. (Jeddah, Saudi Arabia):** Worked as a lead engineer on multiple projects in several districts of Jeddah, Saudi Arabia. My job duties included making the designs for the streetlights, creating AutoCAD designs for high voltage transmission lines. Supervision of a team of 10 to 15 electricians & installation workers to ensure projects were progressing to the government guidelines and specifications are being accurately followed.
- **Qasim Ul Hassan Al Amri General Contracting Est. (Jeddah, Saudi Arabia):** Designing streetlights automation circuits using microprocessors, photo diodes and performing simulations in CircuitLab to ensure functionality and safety.
- **Saudi Electro-Mechanical and Air Conditioning Corp. Ltd. (Jeddah, Saudi Arabia):** Design power electronic circuits with solar integration (DC / DC, DC / AC, designing transformers, HV LV cables, electrical panels, switching circuit, programming and integration of microprocessors for automation).

SKILLS

Python	JavaScript	HTML5	CSS3	Web3
Node.js	React.js	Express.js	JQuery	
JavaScript ES6	Testing	AXIOS	Jira Jama	
API Development	Jira Jama	Bootstrap 5		
Frontend Development	RESTful APIs	POSTman		
Backend Development	Git/Github/Version Control			
Web Scrapping/ Beautiful Soup	Selenium WebDriver			
SQL SQLite PostgreSQL	NoSQL	Python Flask		
AWS	JSON data	Python Scripting Automation		
Pandas	NumPy	Plotly	Scikit-Learn	
Seaborn	Bash Command Line	Jupyter Notebook		
JSON Data / CSV Files	Agile	UI/UX Design		
Object Oriented Programming	CI/CD	Debugging		

COURSES

100 Days of Code: The Complete Python Pro Bootcamp

Udemy.com | Adv Python, Web Development & Data Science.

The Complete Full-Stack Web Development Bootcamp

Udemy.com | Full-Stack Web Developer. HTML, CSS, Javascript, Node, React, PostgreSQL, Web3 & DApps

Complete Data Science Training: Math, Advanced Statistics in Python, Machine and Deep Learning

Udemy.com | Python, Statistics, Machine & Deep Learning

Scrum Master + Agile Scrum Master Certification

Scrum Master + Agile Scrum Master Certification

The Project Management Course: Beginner to PROject Manager

Udemy.com | Knowledge, skills to manage complex projects.

Cloud Computing on AWS 2024

Udemy.com | Cloud Computing Concepts and AWS

EDUCATION

Bachelors in Electrical Engineering

Mirpur University of Science and Technology (MUST) Mirpur Azad Kashmir, Pakistan

📅 03/2011 - 03/2015 📍 Mirpur AJK, Pakistan

Post Graduate Diploma in Business Administration

Virtual University of Pakistan Islamabad, Pakistan

📅 01/2019 - 02/2020 📍 Islamabad, Pakistan
