

SHILPASHREE GANGADHARA

Chicago, IL · (773) 858-4254 · shilpashreegangadhara844@gmail.com · <https://www.linkedin.com/in/shilpashreeg/>

SUMMARY

- Data Analyst with 7+ years of experience transforming raw data into actionable insights to drive business growth and operational efficiency. Skilled in SQL, Python (Pandas, Scikit-learn, TensorFlow), and ETL automation using Snowflake, AWS, and Azure to optimize workflows and reduce latency by over 12 hours per cycle. Proficient in data visualization tools like Power BI, Tableau, and Excel Pivot Tables/VBA, leveraging machine learning to develop predictive models that cut equipment downtime by 15% and improve marketing ROI by 12%. Adept at cross-functional collaboration, streamlining compliance with GDPR and SOX regulations, and automating processes to enhance productivity, saving 200+ hours annually for Fortune 500 clients and startups.

EXPERIENCE

CROWD DOING

USA

Data Analyst

Aug 2024– Present

- Developed strategic insights for seven medium-large companies (\$5M+/year) to improve SEO, web traffic and conversions. Revamped and implemented new websites for four companies.
- Engineered ETL pipelines using Python and Snowflake to process 500+ datasets, optimizing data ingestion workflows and reducing latency by 12 hours per project cycle
- Streamlined reporting workflows by designing VBA macros to automate data cleaning and dashboard refreshes, reducing manual effort by 4 hours weekly.
- Designed A/B testing frameworks to evaluate volunteer engagement strategies, leveraging SQL and SaaS platforms like Optimizely to identify high-performing tactics adopted across 8 initiatives
- Integrated SAP ERP data with Snowflake warehouses to unify financial and operational metrics, enabling cross-departmental reporting accuracy and aligning 15+ KPIs with CrowdDoing's mission
- Optimized enterprise data integration by designing ETL packages (SSIS, AWS Glue, Informatica), improving processing efficiency, and enhanced reporting accuracy using SSAS & DAX in Power Pivot.
- Integrate Power BI with cloud services, APIs, and other enterprise data sources, maintain custom SSRS reports and dashboards.
- Automated A/B test analysis using Python and Scikit-learn, collaborating with engineering teams to identify optimal volunteer engagement strategies (85% accuracy) and reduce evaluation time by 6 hours/test

TESLA

USA

Data Analyst

Aug 2023 – Dec 2023

- Analyzed large datasets using Python and SQL to identify inefficiencies, enhancing accuracy and prioritization of high-impact initiatives.
- Built Excel dashboards with Pivot Tables and VBA macros to track operational KPIs, enabling stakeholders to drill down into real-time metrics without IT dependency.
- Developed TensorFlow models to predict equipment failure risks, reducing unplanned downtime by 15%.
- Collaborated with engineering and product teams via JIRA to document and translate business requirements into technical specifications, reducing project delays by 15 hours through effective communication and stakeholder alignment.
- Designed AWS cloud-based ETL pipelines to automate data ingestion and transformation, leveraging technical expertise to reduce processing time by 10 hours weekly and scale analytics capabilities.
- Evaluated data access controls and compliance frameworks using SailPoint and AuditBoard, ensuring 100% adherence to security policies through meticulous attention to detail.
- Streamlined change management workflows by applying Lean Six Sigma Yellow Belt methodologies, cutting report generation time by 10 hours and boosting team productivity.
- Automated data validation processes using Python scripts, reducing manual errors and saving 5 hours weekly, while maintaining rigorous quality assurance standards.
- Presented actionable insights to non-technical audiences through visual storytelling, fostering cross-departmental collaboration and aligning teams on strategic goals.

ACCENTURE

India

Senior Data Analyst

Nov 2016 – Aug 2022

- Analyzed complex datasets using SQL and Excel to identify trends, demonstrating attention to detail, which improved data accuracy and informed 5+ client strategy decisions monthly.
- Created Excel macros to auto-generate supply chain forecasts, improving report consistency and saving 6 hours weekly.
- Designed and optimized ETL workflows using SSIS, automating data integration across enterprise systems and improving reporting efficiency with SSRS, enabling leadership to make data-driven decisions 30% faster.
- Designed interactive dashboards in Workday and ServiceNow to visualize KPIs, leveraging collaboration with cross-functional teams to enhance stakeholder understanding of operational metrics
- Built Scikit-learn pipelines for clustering customer data, segmenting 10K+ accounts to improve targeted marketing ROI by 12%.
- Developed predictive models using Python (NumPy, Pandas, Scikit-learn) and problem-solving, improving forecasting accuracy by 150 basis points for supply chain optimization projects.
- Collaborated with Agile teams via JIRA to prioritize tasks, applying time management to deliver 3+ project milestones ahead of deadlines.
- Evaluated process inefficiencies using Lean Six Sigma White Belt methodologies, demonstrating critical thinking to streamline workflows and reduce cycle time by 2 days .
- Integrated AWS with R for scalable data storage solutions, showcasing adaptability to manage 500+ GB of client data securely.

VEDANTA GROUP

India

Technical Data Analyst

May 2016 – Oct 2016

- Identified operational inefficiencies using SQL & Python, streamlining supply chain processes and cutting data processing time by 15 hours/month.
- Developed Power BI dashboards integrated with Azure Synapse, enabling real-time production insights and improving decision-making speed for leadership.
- Developed predictive models using Azure Machine Learning and Python to forecast equipment maintenance needs, solving critical operational challenges and reducing equipment downtime by 20%.
- Automated routine data workflows using Azure Data Factory (ETL), enhancing team productivity by freeing up 200+ hours annually for strategic analysis.
- Used Pivot Tables to analyze 10K+ rows, identifying bottlenecks that cut processing delays by 18%.
- Evaluated market trends and competitor data through advanced Excel and statistical analysis, proposing actionable strategies that contributed to \$2M+ in new revenue streams.

EDUCATION

Illinois Institute of Technology

Chicago, IL

Master of Applied Science in Data Science

Aug 2022 - May 2024

Visvesvaraya Technological University

Karnataka, India

Bachelor of Engineering (B.E.)

Aug 2012 – Jul 2016

SKILLS

Programming & Data Processing: SQL, Python (Pandas, NumPy, Scikit-learn), R, VBA Macros , PySpark,DAX

Data Engineering & ETL: ETL Pipelines, SAP Data Archiving, Workday Reporting, Apache Airflow, dbt, SSIS

Data Visualization & Reporting: Tableau, Power BI, SSRS, Workday Reports, JIRA, Microsoft Forms, Looker, Google Data Studio, Matplotlib, Seaborn

Database Management: MySQL, NoSQL, Big Data, SAP ECC, Workday HCM

Business Intelligence (BI): Power BI, Tableau, SAP NetWeaver, AuditBoard, Workday

Statistical & Analytical Tools: A/B Testing, Regression Analysis, Hypothesis Testing, Time Series Analysis

Process Automation & Management: Lean Six Sigma (Green Belt), Power Automate, JIRA API, Business Process Automation, Change Management, UAT Coordination

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services (AWS)
- Workday Advanced Data Conversion Consulting Core – Workday
- Lean Six Sigma Green Belt – Six Sigma Council
