SUMMARY

Results-driven **Data Engineer** with **4+ years of experience** designing and implementing **cloud-native data pipelines** across **consulting and financial domains**. Skilled in **Python, SQL, PySpark, Snowflake, AWS, dbt, and Apache Airflow**, with proven expertise in **ETL/ELT workflows, real-time streaming, and data warehouse solutions**. Strong background in **data governance, compliance, and security standards** within **fintech and banking**. Adept at delivering **production-ready pipelines** using **CI/CD, Terraform, and DevOps practices**. Collaborative team player with hands-on experience in **Agile/Scrum** environments.

SKILLS

Programming

Python, PySpark, SQL, PL/SQL, Shell Scripting

ETL & Orchestration

Apache Airflow, AWS Glue, dbt, Lambda, Kinesis

Data Modeling

Star/Snowflake Schema, Dimensional Modeling, CDC, Batch & Streaming Pipelines

Visualization & BI:

Tableau, Amazon QuickSight

Data Platforms & Warehousing

Snowflake (clustering, partitioning, RBAC, cost optimization), AWS Redshift, Databricks, PostgreSQL, Oracle, SQL Server

Cloud Platforms

AWS (S3, Glue, Lambda, Redshift, Kinesis, SNS, CloudWatch), Azure Data Factory, Synapse, Databricks, Terraform

DevOps & CI/CD

Git, Jenkins, Terraform, Docker, CodePipeline

Security & Compliance

RBAC, Data Masking, SOX/PCI/GDPR Compliance

PROFESSIONAL EXPERIENCE

Data Engineer

Jan 2023 – Present

JPMorgan Chase & Co.

- Partnered with business analysts and product owners to design **scalable data solutions** supporting fraud detection and regulatory reporting.
- Developed **ETL pipelines** using **Python, SQL, Airflow, and Snowflake**, automating ingestion from transactional systems into enterprise data warehouse.
- Implemented **Change Data Capture (CDC)** pipelines using **AWS Glue, Lambda, and S3** for near real-time ingestion from core banking APIs.
- Applied **Hugging Face NLP models** for classification and entity extraction of financial documents and call transcripts.
- Built reusable **PySpark modules** for validation and anomaly detection, improving pipeline consistency.
- Enhanced **Snowflake performance** with query optimization and resource monitors, reducing compute costs.

- Ensured **pipeline reliability** via **CI/CD (Git, Jenkins, Terraform)** and monitoring (**CloudWatch, Splunk**).
 - Collaborated with cross-functional **Agile teams**, participating in sprint planning, reviews, and code reviews.
- Environment: Python, PySpark, SQL, dbt, Apache Airflow, AWS (S3, Glue, Lambda), Databricks, Snowflake, Jenkins, Terraform, Hugging Face, Splunk, Agile/Scrum**

Data Engineer

Jan 2021 – Jun 2022

Cognizant

- Delivered **Snowflake data platform solutions** for U.S. healthcare and financial clients in a **consulting environment**.
- Designed **Snowflake schemas (star & snowflake models)**, data marts, and optimized queries using **clustering, partitioning, and warehouse sizing**.
- Built **ETL/ELT pipelines** with **Python, SQL, dbt, and Airflow**, orchestrating ingestion from multiple on-premise and cloud systems.
- Migrated **legacy data warehouses to Snowflake**, applying **RBAC, masking, encryption, and performance tuning** best practices.
- Automated deployment of **Snowflake objects, dbt models, and ETL jobs** using **CI/CD (Jenkins, Git, Terraform)**.
- Implemented **real-time ingestion pipelines** using **AWS Glue, Lambda, S3, and Kinesis streaming** for high-volume data.
- Developed **monitoring & reconciliation frameworks** with **CloudWatch & SNS** to alert stakeholders on data quality issues.
- Partnered with ML teams to **prepare training datasets** and integrate with **Snowflake model registry** for analytics.
- Created **dashboards in Tableau & QuickSight** to visualize real-time fraud detection and transaction metrics.

Environment: Snowflake, Python, SQL, dbt, Apache Airflow, AWS (Redshift, Glue, Lambda, Kinesis, S3, CloudWatch, SNS), Jenkins, Terraform, Tableau, QuickSight, Oracle, SQL Server, Agile/Scrum

EDUCATION

Master's in computer science

Aug 2022 – May 2024

Wichita State University

Bachelor of Technology in Computer Science

May 2017 – May 2021

GITAM University
