

Shivani Bogadamidi

📞 913-306-7449 ✉ shivani0829@gmail.com 📍 Kansas, MO

Summary

Motivated and results-oriented Master's student in Computer Science with around 5 years of professional experience in software development, cloud computing and scalable systems. Adept in designing and implementing complex software solutions, integrating APIs and optimizing web applications. Proven ability to work in fast-paced and collaborative environments. Seeking a full-time Software Engineer position to leverage my experience in building real-time, high-performance and scalable systems.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, C#

Frontend Frameworks: React.js, Next.js, Redux, HTML5, CSS3, TailwindCSS

Backend Frameworks: Node.js (Express, NestJS), Spring Boot, .NET

Databases: PostgreSQL, MongoDB, Firebase, Redis

Cloud Platforms: AWS (Lambda, S3, EC2, RDS), GCP (Firestore)

DevOps & CI/CD: Docker, Kubernetes, GitHub Actions, Jenkins

API & Microservices: REST, GraphQL, Postman, Swagger

Authentication & Security: OAuth2, JWT, SSO, OpenID Connect

Testing & QA: Jest, Mocha, Cypress, JUnit

Version Control & Collaboration: Git, GitHub, GitLab, Jira, Confluence

Architecture & Design: Microservices, MVC, Serverless, Event-Driven

Monitoring & Observability: Prometheus, Grafana, ELK Stack

Soft Skills & Practices: Agile/Scrum, TDD, Code Reviews, Documentation

Experience

Apptium Technologies

Software Developer

Virginia, US

Jan 2025 – Present

- Developed **real-time transaction dashboards** using **React.js** and **TypeScript**, improving operational visibility for subscription and billing workflows.
- Designed and implemented **RESTful microservices** with **Node.js** and **Spring Boot** to automate invoice processing and subscription management.
- Integrated **AWS Lambda** and **S3** for serverless invoice/report handling, reducing operational overhead by 30%.
- Optimized **PostgreSQL queries** for faster retrieval of billing and transaction data, improving system performance by 35%.
- Built **modular React components** and **micro frontends**, enhancing UI reusability and maintainability.
- Implemented secure authentication using **OAuth2** and **JWT** to comply with financial data security standards.
- Automated **CI/CD pipelines** with **GitHub Actions**, streamlining deployments and improving release reliability.
- Conducted **unit** and **integration testing** with **Jest** and **Cypress**, ensuring system stability and data integrity.
- Implemented **API caching** and **rate limiting** in **Node.js** to support high-volume financial transactions efficiently.
- Collaborated with front-end and back-end teams to integrate components, enhancing workflow for billing and reporting systems.

Tech Stack: React.js, TypeScript, Node.js, Spring Boot, PostgreSQL, AWS (Lambda, S3), GitHub Actions, OAuth2, Jest, Cypress

Wipro Limited

Software Developer

India

Nov 2021 – Dec 2023

- Built a **loan-approval web system** using **Next.js** and **Node.js**, reducing manual processing time by **25%**.
- Created **real-time analytics dashboards** with **MongoDB aggregations** for financial reporting.
- Developed **secure REST APIs** with **role-based access control (RBAC)** to protect customer data.

- Developed **centralized exception handling** in Node.js to standardize API error responses.
- Supported **containerization** of backend services using **Docker** to streamline deployment.
- Deployed and maintained applications on **GCP Firestore / App Engine**, ensuring **99.9% uptime**.
- Collaborated with QA to implement **end-to-end testing** using **Selenium** and **Postman**.
- Optimized **React** rendering with lazy loading and memoization, improving load speed by **35%**.

Tech Stack: Next.js, Node.js, MongoDB, GCP (Firestore, App Engine), REST APIs, RBAC, Selenium, Postman

Tech Mahindra

India

Software Developer

Dec 2019 – Nov 2021

- Developed dynamic web interfaces with **React.js** and **JavaScript**, supporting interactive dashboards for internal applications.
- Implemented responsive and accessible **UI components** using **HTML5**, **CSS3**, and **Bootstrap**, enhancing cross-device user experience.
- Collaborated with backend teams to integrate **REST APIs** and ensure seamless data flow.
- Participated in **UI testing / debugging**, resolving interface issues and improving usability.
- Built **data-driven tables** and **reports** using **React.js** and **jQuery** for visual data representation.
- Followed **Git-based version control** and coding standards, maintaining clean, modular code.
- Contributed to documentation of **frontend modules** and workflows for onboarding and knowledge sharing.
- Implemented client-side validation to improve **data accuracy** and **form reliability**.
- Optimized component rendering and **state management**, enhancing overall UI responsiveness.

Tech Stack: Java 8, React.js, HTML5, CSS3, JavaScript, jQuery, Bootstrap, SQL

Projects

University Application Management

Spring Boot, Java, React, Spring Security, REST API, Apache POI, SQL, Tomcat

- Developed a full-stack admission management system using React, Spring Boot, and JSP for student registration, program applications, and real-time status tracking.
- Implemented multi-role authentication with Spring Security (JWT) and built RESTful APIs with Spring Data JPA for secure and consistent data handling.
- Integrated Apache POI for bulk Excel uploads and deployed the application on Apache Tomcat, improving scalability and reducing manual data entry by 80%.

Hospital Management Database System Implementation

MySQL, SQL Server, ERwin Data Modeler, SQL, Java (JDBC)

- Designed a BCNF-normalized database in ERwin for managing Patients, Doctors, and Appointments with referential integrity and constraints.
- Implemented stored procedures, triggers, and SQL scripts in MySQL to automate billing and scheduling workflows.
- Developed a Java-JDBC interface to validate CRUD operations and ensure reliable backend integration.

Certifications

- AWS Certified Developer – Associate (DVA – CO2), Amazon Web Services
- Java & SQL Certified (JSpiders)

Education

University of Central Missouri

Masters in Computer Science and Engineering

Jan 2024 – May 2025

Coursework: Data Structures, Advanced Operating Systems, Artificial Intelligence, Information Retrieval, Data Mining, Web Development
