PROFILE

Cloud DevOps Engineer with **6 years** of expertise in the **IT** and **Banking/Financial Services** industries, specializing in **CI/CD pipelines**, **automation**, **cloud infrastructure**, and **containerization**. Strong background in **infrastructure automation**, **observability**, **incident handling**, tactical release planning and **system reliability engineering (SRE)**.

PROFESSIONAL EXPERIENCE

Veritas, Senior DevOps Engineer

10/2024 – Present

- Designed and implemented a robust **CI/CD platform** using Jenkins, Docker, Argo CD and Kubernetes, **reducing deployment time** and boosting developer productivity.
- Engineered **Python** and **Bash** scripts to automate log rotation, and system health checks, saving **5+ hours weekly**.
- Integrated **static code analysis**, **security scans**, and automated testing within CI/CD pipelines, ensuring compliance and reliability.
- Enhanced **observability** using **AWS CloudWatch** dashboards, alarms, and log insights for proactive monitoring.
- Implemented **Infrastructure-as-Code (IaC)** with **Terraform**, reducing infrastructure setup time by **50%** and improving consistency across environments.

HSBC, Senior Software Engineer - DevOps

03/2022 – 08/2024

- Spearheaded the **migration of SFTP processes** from **on-prem** legacy servers to **cloud-based** solutions, eliminating technical debt, and enhancing security and system performance.
- Implemented **agile** methodologies to oversee the entire **application lifecycle**, covering development, testing, deployment, monitoring, infrastructure support, and production support.
- Worked as part of **infrastructure upgrade** of an in-house trade booking application for global stock markets.
- Deployed and maintained **Dockerized applications**, optimizing resource utilization and improving system efficiency.
- Automated infrastructure provisioning with **Terraform** and **Ansible**, reducing manual effort and errors by **80%**.
- Implemented **blue-green** and **canary migration strategies**, ensuring near-zero downtime for critical applications.
- Contributed to project budgeting and modernization initiatives, preparing forecasts on infrastructure **cost optimization**.
- Managed the migration of **Message Queue (MQ)**-dependent feeds to the latest infrastructure, ensuring system stability and regulatory compliance.
- Administered **firewall rule development** and maintenance, optimizing security configurations and mitigating vulnerabilities.
- Monitored and optimized system performance using **Prometheus** and **Grafana**, identifying and resolving performance bottlenecks, improving average **incident response** time by **15%**.
- Consolidated **SQL scripts from 50 to 10**, effectively lowering technical debt, and improving operational efficiency.
- Implemented core **cloud security** capabilities such as enforcing **IAM policies**, secrets management (AWS Secrets Manager), and container security scanning, strengthening security posture and ensuring data protection.
- Contributed to **production support** by prioritizing and efficiently resolving **high-impact issues**, minimizing downtime, and ensuring seamless operations. Tracked and managed action items to resolution.
- Achieved a 30% reduction in downtime by overhauling **release management** and **disaster recovery** processes, acting as the single point of contact for **business continuity** from alternate locations.
- Mentored and **guided 6 junior engineers**, training them in **Python, SQL, Jenkins, and Control-M**, while promoting cross-team collaboration and knowledge sharing through pair programming, code reviews, and adherence to **Agile** and **Scrum** best practices.

HSBC, Software Engineer - DevOps

07/2019 – 02/2022

- Developed **Jenkins** based one-click automated **deployment pipelines**, streamlining deployment across multiple environments, reducing manual effort and cutting deployment time by **70%**.
- Automated **file handling** and **log error detection** using Python scripts, reducing manual operational tasks.

- Engaged with **stakeholders** and **product owners** in Equities and Derivatives, effectively addressing **business requirements** and resolving technical challenges.
- Collaborated with **cross-functional teams** to implement DevOps tools, CI/CD pipelines, and monitoring solutions (Grafana, Geneos), enhancing productivity and system reliability.
- Participated in a rotational **on-call** schedule, ensuring rapid incident response and **business continuity** around the clock through effective **cross-team collaboration** across geographically diverse teams in India, London, Hong Kong, China, and the USA.
- Authored **critical documentation** for Post Trade feeds, improving ownership clarity and accountability.
- Reduced **Mean Time to Resolution** (MTTR) through **proactive alerting** and incident response. Actively participated in **postmortem processes** to identify root causes and prevent future incidents.
- Led **incident triage** and resolution within SLAs, streamlining **stakeholder communication** to minimize friction from miscommunication and lack of context, and enhance overall satisfaction.
- Monitored and managed over **500 daily production job** schedules using **Control-M**, improving **on-time completion by 15%** and reducing critical job failures by **10%** through proactive issue resolution.
- Conducted rigorous code reviews and pair programming sessions, improving overall code quality and maintainability.

TCS, *Internship*

05/2018 – 07/2018

- Contributed to a **Robotic Process Automation** (RPA) project, **automating manual tasks**, improving efficiency and saving significant man-hours.

SKILLS

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, VPC, EKS, ELB, ECS, Route53, Cloud Watch), **GCP** (Compute Engine, Cloud Functions, GKE, DNS, Cloud Monitoring), **Azure** (Virtual Machines, Azure DevOps, Azure Monitor)

OS & Networking: Linux, Windows, TCP/IP, DNS, HTTP, Load Balancing, VPN, Firewalls

Version Control & SCM: Git, GitHub, GitLab, Bitbucket, Stash

DevOps Tools: Jenkins, ArgoCD, GitHub Actions, Helm Charts, SonarQube, Python, Bash, Shell, Java

Configuration Management & Infrastructure as Code (IaC): Ansible, Terraform, CloudFormation

Security & Compliance: IAM, RBAC, HashiCorp Vault, AWS Secrets Manager, Container Security (Snyk, Trivy)

Containers & Orchestration: Docker, Kubernetes (EKS, GKE)

Monitoring & Logging: Prometheus, Grafana, Geneos

Incident & Project Management: Jira, Confluence, ServiceNow, On-call, Runbooks, Postmortems, Triage, ITIL

Soft Skills: Problem-solving, attention-to-detail, communication, time management, critical thinking, self-starter

Databases: Oracle, MySQL

EDUCATION

Malaviya National Institute Of Technology

Bachelor's, Electronics and Communication Engineering

2015 – 2019

AWARDS

Pat on the back award, HSBC : Awarded twice for exceptional involvement and contribution to production support, and cross-team projects, concentrated on migration and upgradation.

Circle of Excellence Award, HSBC : Presented for successful execution of a critical business use case for in-house trade booking application. Achieved all project milestones.
