SUMMARY

Senior Developer with 5 years of experience in optimizing CRM systems and developing high-performance APIs. Proficient in leveraging AWS, Power BI, and Power Automate to streamline processes and improve performance, achieving significant reductions in manual effort and increases in system efficiency

EDUCATION

Master of Science in Information Systems

May 2024

Northeastern University

Relevant Coursework: Application Engineering and Development, Web Design and User Experience Engineering, Network Structures and Cloud Computing, Object Oriented Design, Database Management Systems

TECHNICAL SKILLS

Programming Languages: Java, C++, C#, Python, JavaScript, TypeScript, PHP

Web Technologies: Spring, Spring Boot, React, NodeJS, HTML, CSS, jQuery, Hibernate, JPA, Junit, Mockito, REST, SOAP

Cloud Technologies: Azure, Amazon Web Services, Terraform, Docker, Kubernetes, Jenkins

Databases: MSSQL, MySQL, PostgreSQL, MongoDB, Redis

Other Tools: Microsoft CRM, Power Apps, Power Automate, IntelliJ, Eclipse, Visual Studio, Postman, Jira, Git

Skillssets: Data Structures and Algorithms, Object Oriented Programming, System Design Patterns, API and Database Cloud Technologies, Microservices, Distributed systems, Backend & Frontend Development, Agile Development

WORK EXPERIENCE

Senior Developer, Close Up Foundation, Virginia, USA

December 2024 - Present

- Customized Dynamics 365 CE to streamline student enrollment, educator engagement, and program tracking, improving operational efficiency by 30%
- Developed Power Automate workflows to automate administrative tasks, reducing manual effort by 40%, and created Power BI dashboards for real-time insights on student participation and funding allocations
- Conducted regular audits and implemented system optimizations, leading to a 25% increase in CRM performance and ensuring compliance with data protection standards for student records

Software Engineer, Meal Manage LLC, Arizona, USA

January 2023 - September 2023

- Designed and developed high-performance Java-based Spring Boot RESTful APIs resulting in a 30% increase in user engagement
- Optimized backend performance and scalability, leveraging AWS services such as Lambda, API Gateway, and DynamoDB to handle variable workloads and ensure high availability
- Implemented OAuth 2.0 to enable SSO between different modules, streamlining the user experience by eliminating multiple login screens

Project Engineer, Wipro, Hyderabad, India

May 2019 - July 2022

- Designed and integrated custom plugins in C# and the .NET framework for Microsoft Dynamics 365.
- Developed solutions using JavaScript and the XRM model, including OData calls, plug-in development, custom workflows, and business process flows
- Monitored, built, and configured Dynamics 365 forms, views, and dashboards. Accomplished Business Rules, Workflows, Actions, Document Core Pack, Customizations and Configurations
- Developed and maintained CI/CD systems with Azure DevOps, supporting agile practices and actively participating in Scrum meetings for sprint planning and retrospectives
- Increased the application speed from 50% to 80% to reduce performance related Issues and enhancing user experience.
- Developed Canvas and Model-Driven apps using Data verse and custom connectors, applied UI design best practices, and created automated workflows with Power Automate
- Performed Embedded Canvas Apps and Power Automate Flows to replace individual and Parent-Child Dialogs, and devised a standalone Canvas App integrated with CDS, SharePoint, and Power Automate

PROJECTS

Application Deployment on Cloud Using CI/CD (AWS, Java, Spring Boot, REST API, MySQL)

January 2024 - April 2024

- Developed an application using Java, REST APIs and RDS MySQL as Database and S3 for scalable file storage
- Built a Packer template to create a custom AMI which included the application artefacts and the prerequisite necessary for the deployment of application on AWS
- Developed a terraform template to automate the deployment, configuration and monitoring of the web application on AWS using various services such as IAM, VPC, EC2, RDS, S3, Route53, CloudWatch, ELB, ASG, SES, SSL certificates

Find Stay Application (Java, Spring Boot, REST API, MySQL)

January 2024 - April 2024

- Developed a Spring Boot and Hibernate web application for property rentals, enabling tenants to browse properties, send booking requests, and interact with landlords, while providing landlords with tools to manage listings and bookings
- Built secure and scalable RESTful APIs, implementing role-based access controls, input validation, error handling, and session management to ensure seamless communication between clients and the server
