SUMMARY

Results-driven Software Developer with 4+ years of experience designing, developing, and deploying secure, high-performance healthcare and analytics applications. Proficient in **Java, C#, Angular, React.js, Spring Boot, SQL, and AWS Cloud** with strong expertise in building scalable APIs, microservices, and modern web interfaces. Skilled at modernizing legacy systems, enhancing performance, and leading full-cycle application development—from new builds to revisions and upgrades. Collaborative team player recognized for reducing infrastructure costs by 20% and improving response times by 30% through clean coding, automation, and cloud-native solutions.

SKILLS

Languages & Frameworks: Java 11/17, C#, Spring Boot 2/3, Angular, React.js, Redux, Hooks, Node.js, Express.js, REST

Databases: SQL, MySQL, PostgreSQL, MongoDB, Oracle

Cloud / DevOps: AWS (EC2, Lambda, API Gateway, S3, RDS, ECS/EKS, CloudWatch, IAM), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, Maven, CI/CD

Testing & Tools: JUnit, Mockito, Jest, Cypress, React Testing Library, Postman, Git, Agile/Scrum, TDD

Other: Apache Kafka, RabbitMQ, Terraform, GitHub Copilot, AI-assisted Development Tools

PROFESSIONAL EXPERIENCE

Software Developer | Tenet Health (Apr 2024 – Present)

- Designed and delivered enterprise-grade healthcare applications using **Java 17, C#, Spring Boot 3, Angular, React.js, and SQL**, improving patient engagement by 30%.
- Led development of new cloud-native modules and upgrades of existing systems, achieving 25% faster performance and better scalability.
- Integrated AWS services including Lambda, API Gateway, S3, and CloudWatch to automate workflows, cutting manual efforts by 50%.
- Developed reusable microservices and APIs for data synchronization and interoperability across clinical systems.
- Improved CI/CD pipelines using Jenkins, GitHub Actions, Docker, and Kubernetes to enable seamless deployments.
- Collaborated with cross-functional teams to enhance application stability and compliance in Agile sprints.
- Mentored junior developers in Angular, React, and clean architecture principles to ensure consistent code quality.
- Partnered with architects to implement modernization strategies using C#, SQL optimization, and cloud infrastructure best practices.

Software Engineer | LatentView Analytics (Jan 2020 – Feb 2023)

- Developed analytics dashboards and full-stack web applications using **Angular, React.js, C#, Java, and MongoDB** for real-time business intelligence.
- Built and optimized SQL queries and APIs that reduced data retrieval time by 20% and improved reporting efficiency.
- Delivered cloud-ready microservices on AWS and Azure, improving scalability and uptime for enterprise analytics solutions.
- Participated in both new feature development and modernization of legacy systems using Spring Boot and Angular.
- Collaborated with data scientists to integrate machine learning models into production environments, increasing forecast accuracy by 35%.
- Automated deployment workflows, integrated testing, and implemented CI/CD to accelerate release cycles.
- Provided leadership in Agile teams by conducting peer code reviews, improving overall code reliability and maintainability.
- Contributed to architectural discussions to ensure secure, high-performance solutions aligned with client goals.

EDUCATION

M.S. in Computer Science — Lindsey Wilson College, Aug 2024

B.S. in Computer Science & Engineering — Veltech University, May 2020
