

Professional Summary:

IT Professionals with 9+ years of experience as a **Python Developer**, proficient in multiple languages, with expertise in **Design, Development, and Implementation** of applications using **Python, Django, Flask, Scala, RESTful services, AWS, and SQL**.

- Strong experience in developing **web applications** using **Django, Flask**, and frameworks like **FastAPI, Angular, TypeScript, JavaScript, jQuery, and Node.js**.
- Hands-on experience with **MVC/MVT architectures**, including **Django ORM** and **SQLAlchemy** for database management.
- Skilled in **web development** using **HTML, CSS, JavaScript, AngularJS, and Node.js**, along with integration of **web services (SOAP, REST, GraphQL)**.
- Expertise in **WAMP (Windows, Apache, MySQL, Python/PHP)** and **LAMP (Linux, Apache, MySQL, Python/PHP)** architectures.
- Strong knowledge of **Cloud Platforms (AWS, Azure, Google Cloud)** with experience in services like **EC2, S3, ECS, Lambda, DynamoDB, and API Gateway**.
- Experience in **Service-Oriented Architecture (SOA)** and development of **SOAP-based web services** using **JAX-WS, WSDL, and UDDI**.
- Skilled in writing **unit tests** using **UnitTest/PyTest** and containerizing applications using **Docker, Kubernetes**.
- Proficient in **CI/CD pipelines**, version control tools (**GIT, SVN**), and automation frameworks (**Jenkins, Selenium, Postman**).
- Experience in **database management**, including **SQL (PostgreSQL, MySQL, Oracle, SQLite)** and **NoSQL (MongoDB, Cassandra, Redis, CouchDB)**.
- Familiarity with **Big Data technologies**, including **Talend Open Studio** for ETL jobs and **Apache Spark** for data processing.
- **Machine Learning & AI Experience** – Knowledge of **TensorFlow, PyTorch, Scikit-learn, and Pandas**, with experience in **building and optimizing ML models**.
- Expertise in **FastAPI** for developing high-performance, asynchronous APIs.
- Experience with **Security Best Practices**, including **OAuth, JWT authentication, penetration testing**, and securing APIs.
- Strong debugging, problem-solving, and **performance optimization** skills, with a track record of resolving **production issues** efficiently.
- Experienced in **Agile (Scrum), Waterfall** methodologies and **bug-tracking tools** like **JIRA, Bugzilla, and HP Quality Center**.
- Excellent **communication, collaboration, and analytical skills**, with the ability to work effectively in **fast-paced environments**.

Technical Skills:

- **Programming Languages:** C, C++, Java, Python (2.x - 3.x), R, Scala, PL/SQL, Shell, PHP, JavaScript, TypeScript, jQuery, AJAX, HTML, CSS.
- **Python Packages:** SQLAlchemy, Sphinx, Requests, Celery, FastAPI, pytest, Flask, Kafka-Python, lxml, Boto3, Flask-RESTful, Hug, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch.
- **Microservice Frameworks:** FastAPI, Flask, Hug, Tornado, Django, MapReduce, MVC, Cucumber, Selenium.
- **Cloud Platforms:** AWS (EC2, S3, Lambda, API Gateway, DynamoDB, SQS, SNS, ECS), Azure, Google Cloud, CI/CD, HashiCorp Nomad, Jenkins, Docker, Kubernetes.
- **Big Data & Streaming:** Apache Spark, PySpark, Hadoop, Kafka, Flink.
- **Web Technologies:** HTML, CSS, JavaScript, TypeScript, jQuery, XML, DOM, CSV, AJAX, AngularJS, JSON, RESTful APIs, SOAP, GraphQL.
- **Bug Tracking Tools:** Jira, Bugzilla, JUnit, HP Quality Center, Confluence.
- **IDE Tools:** PyCharm, Jupyter Notebook, Eclipse, WebLogic, Rational Rose, VS Code, LDAP.
- **Web Servers:** Apache Webserver, IIS, HTTP Server, WebLogic, JBoss, Nginx.
- **Integration & CI/CD Tools:** Jenkins, IBM Integration, Web Builder, GitHub Actions, Terraform, Ansible.
- **Project Management:** Jira, GitHub, Slack, Bugzilla, Version One.

- **DevOps & Infrastructure as Code (IaC):** Kubernetes, Terraform, Ansible, Docker Compose, Helm.
- **Testing & Automation:** PyTest, JUnit, Selenium, Postman, REST Assured, Cypress, Confluence/Jira, Bugzilla.
- **Databases:** SQL Server, PostgreSQL, Redis, Oracle 9i, MySQL, Apache Cassandra, MongoDB, Sqlite3, Snowflake, DB2 10.5, Elasticsearch.
- **Operating Systems:** Windows, Unix, Linux (CentOS, Ubuntu).
- **Other Tools:** Excel, MS Word, Visio, PowerPoint, Apache Airflow, SharePoint, Salesforce CRM, Salesforce SFA, Apex, SOQL, SOSL, Google Analytics.

Professional Experience:

Senior Python Developer/Full Stack Developer | Turabit AI LLC, Chantilly, VA, Remote | Jan'22 – Till Date

- Developed and maintained **Python applications** throughout the **Software Development Life Cycle (SDLC)**, including **requirement gathering, design, development, testing, and deployment**.
- Built and deployed **RESTful APIs** using **Django, Flask, and SQLAlchemy**, ensuring efficient database interactions.
- Implemented **AWS cloud solutions** using **EC2, S3, RDS, EBS, Elastic Load Balancer, and Auto Scaling Groups** for optimized resource management.
- Automated CI/CD pipelines using **Jenkins, Docker, Kubernetes, and Ansible**, improving deployment efficiency.
- Developed and managed **NoSQL databases** like **MongoDB, Cassandra, and Redis**, handling unstructured data efficiently.
- Implemented Test-Driven Development (**TDD**) using **PyTest, PyUnit, and Selenium** for robust software testing.
- **Designed data models, tables, stored procedures, and triggers** for **Oracle, MySQL, PostgreSQL, and MongoDB**.
- Developed front-end components using **HTML, CSS, JavaScript, AngularJS, jQuery, AJAX, and JSON**.
- Utilized cloud-based tools like **AWS Lambda, API Gateway, DynamoDB, and SQS** for serverless and event-driven architectures.
- Implemented Analytics Dashboard in Flask (Python) and for various Conversational AI Assistants Project
- Led a team in a Development team across India and USA for Requirement Analysis, Test case preparation & Execution
- Presented a seminar on Applications of Artificial Intelligence in Automated System and won an award for "Best Dev".
- Used asynchronous programming to reduce fetch latency by 75%.
- Built data pipelines with **Apache Spark, PySpark, and Kafka**, enhancing data processing and analytics capabilities.
- Implemented containerization using **Docker** and **orchestration** with **Kubernetes** to streamline application deployment.
- Managed version control with **Git, GitHub, and Bitbucket**, ensuring smooth collaboration across teams.
- Worked in Agile environments, utilizing tools like **JIRA, Confluence, and Slack** for task tracking and communication.
- Developed Service-Oriented Architecture (SOA) using **SOAP and RESTful APIs**, integrating with third-party services.
- Created GUI applications using PyQt and Tkinter, improving user experience.
- Handled cloud infrastructure automation with **Terraform** and **Ansible**, reducing manual deployment efforts.
- Optimized Python scripts for data processing using **NumPy, Pandas, and SciPy**.
- Configured and managed **Apache Web Server, IIS, and Nginx** for web hosting.
- Performed database migrations and **indexing optimization** for **PostgreSQL, MySQL, and MongoDB** to improve query performance.

Environment: Python 3.9, Salt Scripts, JavaScript, XML, JSON, PostgreSQL, Teradata, AS400, Oracle, DB2, Windows, Linux/Unix, Git, Bitbucket, Jenkins, SVN, Dockers, Control-M, Dockers, ArcGIS, Kubernetes, Bash, Redshift, Snowflake, AWS, PySpark, Linux, Pandas, NumPy.

Python Django Developer | Highmark Health, CA, Remote | Jan'20 – Dec'21

- Developed web applications using the **Django framework**, implementing **Model-View-Controller (MVC) architecture**.
- Designed and built APIs using **Django ORM** for database access and **CRUD operations**.
- Transformed and analyzed data using **PySpark**, including **distributed data pipeline processing**.
- Developed PySpark programs to create and process **DataFrames** and perform transformations.
- Optimized cost and supplier selection for **CRM applications** through Python-based analytics.
- Worked with AWS services, launching **EC2 instances** and managing cloud configurations (**Linux, Ubuntu, RHEL**).

- Developed and consumed RESTful APIs, integrating with front-end components using **jQuery, HTML, and CSS**.
 - Processed and loaded data from **XML, CSV, and text files** into **AWS S3** and integrated with **Tableau using AWS Athena**.
 - Implemented ETL pipelines using **PL/SQL, SQL, and Python**, working with **AWS Redshift and S3**.
 - Developed real-time data processing applications using **Scala, Kafka, and Spark APIs** in a **cloud environment**.
 - Managed database applications with **MySQL, PostgreSQL, and Cassandra**, using **Django ORM** for efficient data handling.
 - Performed data analysis and visualization using **Pandas, NumPy, and Matplotlib** for time-series and tabular data.
 - Designed and deployed APIs using **Fast HTTP servers and AWS architecture** for scalability.
 - Automated CI/CD pipelines using **Jenkins, ANT, and Maven**, ensuring seamless deployment across environments.
 - Developed and tested microservices for REST-based architecture using **Django, Flask, and Python modules (Requests, Urllib2)**.
 - **Debugged and troubleshooted applications**, optimizing performance and resolving critical issues.
 - Worked in an Agile environment, participating in the **Software Development Life Cycle (SDLC)** from design to deployment.
 - Expertise in Microsoft BI Studio for **ETL implementation** in **data extraction, transformation, and loading**.
 - **Built and deployed scalable web-based applications** for large dataset analysis using **OpenStack, Python, and Django**.
- Environment:** Python 2.7/2.6, Django1.4/1.3, Angular.js, VB, C++, XML, Scala, DHTML, JavaScript, SQL, PostgreSQL, Jira, REST API, Mongo DB, docker, git, AWS.

Python Developer | HSBC, NYC, NY | Jan'18 – Dec'19

- **Developed data transformations and PySpark algorithms** for efficient data aggregation.
- Created a **MATLAB algorithm** to determine object dimensions from digital images.
- **Optimized SQL queries** using **EXPLAIN PLAN, Collect Statistics, and Hints** in **Teradata and Oracle**.
- Evaluated **Snowflake design considerations** for application changes and enhancements.
- Migrated the **PySpark framework** into **AWS Glue** for improved data processing.
- **Automated data processing** on **AWS Glue** using custom scripts.
- Designed and implemented a **data warehouse model in Snowflake** for handling large datasets.
- Created **CloudFormation Templates** for automated resource provisioning.
- Implemented **ETL jobs** to read from **REST APIs** and load data into **HDFS using Java and Talend**.
- Developed **single-page applications** using **AngularJS and Angular 2**.
- Set up **MongoDB** environments with shards and replica sets for **Dev/Test and Production**.
- Worked on **AI-based project migration** from **Google Cloud Platform to AWS**.
- Built **AWS Lambda** functions for scheduling and automating data pipelines.
- Designed a **standalone UI tool using wxPython** for creating JSON templates for AWS Glue ETL processing.
- Created **reports and dashboards** for fast access to key business metrics.
- Set up **automated data loading** into **SQL databases using AWS Glue and Step Functions**.
- Integrated **AWS components like EC2, Lambda, and Athena** for seamless cloud processing.
- Developed an **integration testing system** for validating the entire framework with code check-ins.

Environment: Java, Python 2.6, Django, CVS, JavaScript, HTML/CSS, MYSQL, PL/SQL, JDBC, Unix Shell Scripting, Red Hat Linux, WebLogic Application Server.

Python Developer | Sunflowee Biz, India | Jan'16 – Oct'17

- Developed a test automation framework in **Linux/Python** and authored test plans.
- Built a **fully automated CI/CD system** using **Git, Gerrit, Jenkins, MySQL, and Python**.
- Designed and developed **dynamic web applications** using **Python, Django, and JavaScript** frameworks.
- **Created Django APIs** for database interactions and supported **Apache Server on Linux**.
- Used **PyTest** for writing test cases and automated **unit/regression testing**.
- Implemented **NLP libraries** for data segmentation and parsing.
- Developed **Django dashboards** with custom UI enhancements.
- Automated **data extraction and web scraping** using **urllib2, BeautifulSoup, and pandas**.
- Worked with **RESTful APIs** to process **JSON and XML** data.
- Developed **object-oriented Python applications** for product management.

- Used **NumPy, SciPy, and matplotlib** for performance calculations and data visualization.
- **Integrated Jenkins** for deployment and managed version control with **GIT**.
- Ensured **data integrity and high-quality collection processes**.
- Implemented client-side validation using **JavaScript**.

Environment: Python, Flask web framework, Java, MySQL, Linux, HTML, XHTML, CSS, AJAX, JavaScript, Apache Web Server, Spark, Pandas, NumPy, SciPy, Matplotlib, AWS.

Education Details:

Bachelors in Information Technology from Gujarat Technological University, India
