usama_csuet@hotmail.com | Ashburn, VA | +1-571-663-6784 | [LinkedIn](#) | [Github](#)

Experienced Mobile Application Engineer skilled in designing, developing and deploying native and cross-platform apps. Strong expertise in mobile architecture, agile methodologies and leading projects to enhance user experience & performance.

Skills

Languages & Technologies:

- Swift, SwiftUI, Combine, RxSwift, Objective-C
- Xcode, iOS SDK, Auto layout
- Mobile UI/UX / Core Animation
- Apple design principles
- Storyboards / Nibs / Programmatic UI
- Core Location / StoreKit / SQLite / CoreData / XCTest
- Version Control (Github, Gitlab, BitBucket)
- Dependency managers (CocoaPods, SPM)
- Declarative/Reactive programming
- Flutter, Dart, Bloc, State management

Programming Principles & Architectures:

- Protocol Oriented Programming
- SOLID Principles
- Object-Oriented Programming (OOP)
- Architectures (MVVM, MVVM-C, VIPER, MVI)
- Frameworks-Based / Modular Architecture
- Design Patterns (Factory, Repository, Singleton)

Development Practices & Tools:

- Offline-First Applications
- Local & Push Notifications
- Multi-threading (GCD, Dispatch Queues)
- Experience with payment gateways
- Databases (Firebase, Core Data, Sqlite)
- Web Services (Restful Apis), Socket.io
- TDD, Unit testing, Test Automation
- Agile/Scrum Methodology
- CI/CD pipelines
- Memory management tools
- Delegates/Notifications/KVO

Experience

Senior Software Engineer - Mobile Apps

Dubizzle Group

02/2023 - 01/2025

- Played a pivotal role in enhancing Dubizzle's performance and ensuring a consistent user experience. Significantly improved app responsiveness by 70% in scenarios of no or low network connectivity, making the app functional and user-friendly even under challenging conditions.
- Led the initiative to integrate Flutter into the Dubizzle native app, resulting in the revamp of crucial features across both platforms. The implementation of chat and favorites features notably contributed to a 40% increase in leads.
- Reduced technical debt by improving the coding standards which eventually increased code reusability & scalability
- Achieved a remarkable 30% reduction in build size by strategically optimizing third-party dependencies, eliminating extraneous assets, and streamlining code.

- Addressing crucial memory-related crashes led to a notable enhancement in our crash-free rate, now standing at an impressive 99.9% & created awareness among team for using profiling tools & right coding practices
- Implemented a modularization proof of concept (POC) to facilitate the reuse of essential modules across multiple products, fostering efficiency and scalability in development efforts.
- As a key member of the Core team, I oversee the management of CI/CD pipelines, ensuring their seamless operation to safeguard our feature and production releases from disruption.
- Boosted code coverage to 80% by diligently crafting and enforcing unit tests for both new features and core functionalities. This initiative played a pivotal role in ensuring stable app releases.
- Elevated the Quota & Credits purchase experience by introducing the Zameen Shop feature, resulting in heightened revenue generation and improved user retention on the platform.

Dubizzle (Buy & sell anything in UAE)

- Dubizzle is a leading online classifieds platform catering to the Middle East and North Africa (MENA) region
- 10 million user base in UAE, contributes a big part in dubizzle group revenue

Zameen: No.1 Property Portal

- Zameen.com is Pakistan's Largest Online Real Estate Portal Connecting Buyers with Sellers within & outside the country

Software Engineer II (Remote Contractor)

Wego.com

06/2021 - 02/2023

- Implemented Tabby integration for "Buy Now, Pay Later" functionality in the UAE and KSA regions, aimed at enhancing conversion rates and streamlining the checkout process.
- Enhanced the booking flow by introducing the room selection feature, empowering customers to make informed decisions by facilitating relevant room selections.
- Enhanced the app experience by transitioning core flows from web view to native functionality, ensuring smoother and more seamless user interactions.
- Promoted to lead the development of the hotels vertical, overseeing its progress from initial planning stages through to the completion of key features.
- Contributed in native booking checkout flow implementation as opposed to previous web view approach that increased the conversion for checkout by 40%.

Wego Flights & Hotels Booking

- Wego is an award winning meta-search engine. We're the largest online travel marketplace in the Middle East, North Africa & Asia Pacific.

Senior iOS Engineer

Digitify

07/2019 - 06/2021

- Led the end-to-end development of the Super App implementation for YAP in the UAE, Ghana, and Pakistan, from conceptualization to successful deployment.
- Conducted architecture discussions focused on connecting different regions with the Super App infrastructure, ensuring seamless integration and optimal performance across diverse geographical areas.
- Led the EDB app team and spearheaded the implementation of automated tests, resulting in feature delivery with an impressive code coverage of up to 80%.
- Writing well-structured, readable & decoupled code which is easy to maintain
- PR reviews and working on improvements

YAP

One app for all your digital banking needs. From payments and money transfers to secure virtual cards and spending analytics that keep an eye on you and your finances. It's all in the YAP app.

EDB Business Banking

Powered by YAP, EDB's business banking app will combine efficient set-up, transactional services & access to lending products, helping SMEs kick start their business.

Senior Software Engineer - iOS | Flutter

Square63

06/2017 - 07/2019

- Responsible for architecting and crafting innovative applications for the iOS/Android platforms, specializing in delivering exceptional user experiences
- Leverage expertise in performance optimization and quality assurance to ensure seamless operation across ListFixx, a pioneering meal planning and sharing tool on iOS, as well as Todo, an iOS-based task management app renowned for its offline-first capabilities
- Collaborate closely with cross-functional teams to conceptualize and implement cutting-edge features, driving the evolution of Streetwyze, a groundbreaking map navigator powered by local community insights, developed using Flutter
- Proactively identify and address performance bottlenecks and bugs, while upholding stringent code quality standards through thorough peer review processes

ListFixx (The meal planning and sharing tool) - iOS

Todo: (Tasks management app / Offline-first) - iOS

Streetwyze: (Map navigator powered by local community) - Flutter

Software Engineer - Mobile

Crewlogix Technologies

06/2015 - 05/2017

- Revamped BookMe iOS & Android apps and published them to respective stores
- Developed OneLifeDiet from scratch in Swift & made use of animations & graphs to make it user-friendly
- Provided support on Qatar living classifieds to fix the important bugs in their production app
- Requirements gathering and communication with clients in order to purify business ideas
- Develop new apps from scratch by applying best software practices
- Communication with the backend team about web-services and developing business ideas
- Worked on white label apps which were serving a number of restaurants in UAE

Bookme.pk - Online Ticketing

Bookme Is Pakistan's First and Largest Online Ticketing Platform That Supports Major Transport Services, Cinemas and Events.

Qatar Living

Qatar Living, the most comprehensive platform for buying, selling, and renting in Qatar

One Life Diet

The One Life Diet app will transform the way you track calories. Not only will its unique and innovative system speed up your weight loss, it will also dramatically simplify the process.

Education

BS Computer Science

University of Engineering & Technology, Lahore

06/2016
