## Summary

- Experienced Oracle Cloud Consultant- OIC and VBCS Developer with 5 years of experience in designing, developing, and implementing integration solutions and applications using Oracle Integration Cloud (OIC) and Oracle Visual Builder Cloud Service (VBCS)
- Successfully led, developed and deployed cloud-based integrations between Oracle Cloud SaaS Application (OFSC), ADW and third-party systems (TWILIO), enabling streamlined business processes and real-time data exchange.
- Built and maintained Visual Builder Cloud Service (VBCS) applications to provide front-end user interfaces with seamless data interaction with backend systems (OFSC, ADW).
- Developed a front-end VBCS app for work order tracking and management, which allowed users to check work order status, engineers assigned and appointments scheduling.

---

## Education

Bachelor of Technology in Computer Science

Jawaharlal Nehru Technological University, Hyderabad, India

---

## Technical Skills

**Programming Languages:** Java, Python, SQL, Java Script, HTML5, CSS3

**Visual Builder Cloud Service:** Application Development, User Interface Design (Redwood), Custom Component Development, Security and Access Control, Testing and Debugging

**Oracle Integration cloud:** Integration Development, Connectivity Adapters (like SOAP, REST, FTP, JDBC, OFSC), Data Transformation, Monitoring, Error Handling, Lifecycle Management

**Oracle Analytics Cloud:** Dashboard and Report Development

**Autonomous Data Warehouse:** SQL and PL/SQL Development

**Oracle Field Service Cloud:** Configuration, Routing, Plugins, Capacity, Quota, Rest APIs

---

## Professional Experience

Oracle Cloud Consultant- VBCS / OIC Developer at Vodafone/TCS-Hyderabad, India      October 2018– August 2023

- Developed and deployed cloud-based integrations between Oracle Cloud SaaS Application (OFSC,ADW) and third-party systems(TWILIO), enabling streamlined business processes and real-time data exchange.
- Utilized OIC's pre-built adapters(OFSC,ADW) and integration patterns(Event based, Scheduled based) to transform data and automate business processes, ensuring data consistency and workflow efficiency across applications.
- Developed and implemented end-to-end integration solutions using OIC connectors to automate business processes, improving data accuracy and reducing manual interventions by 25%.
- Utilized OIC's mapping tools to create custom data transformations and mappings between diverse data formats (XML, JSON, CSV), ensuring compatibility across integrated applications.
- Strong knowledge on Mappings, Lookups, Connections, XSLT, Agents, Packages, and all features of OIC.
- Have Knowledge on OIC components, including Adapters, Process Cloud, API Gateway, and B2B.
- Implemented logging and error-handling strategies to quickly identify and resolve integration failures, improving system reliability and uptime.
- Developed a front-end VBCS app for work order tracking and management, which allowed users to check work order status, engineers assigned and appointments scheduling.
- Developed and implemented custom business logic within VBCS using JavaScript, HTML, CSS and Oracle JET, allowing clients to automate workflows, manage data, and perform business operations effectively.
- Utilized Oracle JET (JavaScript Extension Toolkit) to enhance the user interface.
- Skilled in creating modern, user-friendly interfaces using VBCS's drag-and-drop interface, with custom branding, data-binding, and dynamic components to enhance user experience across web and mobile platforms.
- Managed the deployment of VBCS applications to Oracle Cloud, utilizing built-in version control for continuous updates and ensuring minimal downtime during deployment.

- Collaborated with cross-functional teams to integrate Oracle Field Service Cloud with Oracle Integration Cloud and Autonomous Data Warehouse and implement CI/CD pipelines for OIC and VBCS applications using Git.
- Provided ongoing support and training to end-users on Oracle Cloud functionalities and updates.
- Collaborated with Oracle Support Services and other technical teams to troubleshoot and resolve issues, ensuring the smooth operation of Oracle Integration Cloud, Oracle Field Service Cloud and Visual Builder Cloud Service.

---

### Certifications

- Microsoft Python Certification
- Oracle Field Service Cloud 2019 Certified Implementation Specialist
- Oracle Cloud Infrastructure Foundations Associate 2024
