

SPANDANA MUDHAPATI

Salesforce Developer

Location: North Carolina, USA | **E-mail:** mspandana1997@gmail.com | **Ph:** 940-220-9902 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Salesforce Developer with 6+ years of extensive experience in customizing and optimizing Salesforce Clouds, including Sales Cloud, Service Cloud, Health Cloud and Marketing Cloud. Proficient in integrating Salesforce with enterprise systems such as Veeva CRM, IQVIA, MedPro, SAP, Finacle, Ensono utilizing REST, SOAP and Bulk APIs. Expertise in automating business processes using Flow Builder, Process Builder, Approval Processes, Assignment Rules, Marketing Cloud Journeys and Pardot. Skilled in developing Lightning Web Components (LWC) to enhance user interfaces and implementing DevOps and CI/CD pipelines with SFDX, Git, Azure DevOps and Jenkins. Adept in data migration and ETL processes using MuleSoft, Informatica and Data Loader. Experienced in optimizing SOQL/SOSL queries and batch Apex jobs. Capable of creating advanced Tableau CRM (Einstein Analytics) and Power BI dashboards. Proficient in implementing security measures including two-factor authentication (2FA) and OAuth protocols. Experienced in utilizing Salesforce Einstein AI for predictive analytics. Skilled in performance tuning and debugging using Salesforce Debug Logs. Knowledgeable in adhering to regulatory requirements including GDPR and RBI guidelines. Familiar with blockchain technology and its application in developing innovative solutions.

TECHNICAL SKILLS

Salesforce Clouds:	Sales Cloud, Service Cloud, Health Cloud, Marketing Cloud
Programming Languages:	Apex, Visualforce, JavaScript, HTML, CSS
Salesforce Development:	Lightning Web Components (LWC), Aura Components, SOQL, SOSL
Integrations & APIs:	REST API, SOAP API, Bulk API, Salesforce Connect, OAuth
Middleware & ETL Tools:	MuleSoft, Informatica Cloud, Dell Boomi, Data Loader
DevOps & CI/CD:	SFDX, Git, Jenkins, Azure DevOps
Automation & Workflows:	Flow Builder, Process Builder, Approval Processes, Assignment Rules
Data Management:	Salesforce Data Model, Custom Objects, Reports & Dashboards, Tableau CRM (Einstein Analytics)
Security & Compliance:	Role Hierarchies, Permission Sets, Field-Level Security, Two-Factor Authentication (2FA), GDPR, HIPAA, FDA Compliance
Banking & Financial Integrations:	Finacle, TCS BaNCS, Ensono, Payment Gateways, Regulatory Compliance (RBI Guidelines)
Healthcare & Pharmaceutical Integrations:	Veeva CRM, IQVIA, MedPro, EHR Systems, Insurance Platforms
Artificial Intelligence & Analytics:	Salesforce Einstein AI, Power BI, Tableau, Predictive Analytics
Testing & Debugging:	Salesforce Debug Logs, Monitoring Tools, Performance Tuning
Authentication & Security:	OAuth, SAML, Single Sign-On (SSO), Encryption, Blockchain
Software Development Lifecycle (SDLC)	Agile, Scrum, Waterfall, JIRA, Confluence
Cloud Platforms & Services	Salesforce Lightning Experience, AWS, Azure

CERTIFICATIONS

1. Salesforce Certified Salesforce Administrator **(5879142)**
2. Salesforce Certified Platform Developer I **(5899434)**
3. Salesforce Certified Platform Developer II **(5917930)**
4. Salesforce Certified Agentforce Specialist **(5921776)**

PROFESSIONAL EXPERIENCE

IQVIA – NC | Salesforce Developer

Jun 2023 – Present

- Customized and optimized Salesforce Clouds including Sales Cloud, Service Cloud, Health Cloud and Marketing Cloud to improve patient-provider interactions and streamline healthcare workflows.
- Integrated Salesforce with pharmaceutical platforms like Veeva CRM, IQVIA, MedPro and SAP to enhance data accuracy, real-time insights and regulatory compliance.
- Developed and deployed REST and SOAP API integrations to facilitate secure, FDA & HIPAA-compliant data exchange with EHR (Electronic Health Records), insurance systems and third-party platforms.
- Automated pharmaceutical sales processes using Flow Builder, Process Builder, Approval Processes and Assignment Rules, improving operational efficiency by 40%.
- Automated patient outreach programs by implementing Marketing Cloud Journeys, Pardot and Einstein AI, improving patient engagement rates by 35%.

- Created advanced Tableau CRM (Einstein Analytics) dashboards providing real-time insights into pharmaceutical sales, drug distribution and HCP (Health Care Provider) performance metrics.
- Executed high-volume data migrations and ETL processes using MuleSoft, Informatica and Data Loader, improving data accuracy and system efficiency by 50%.
- Optimized SOQL/SOSL queries and batch Apex jobs for processing millions of clinical trial and prescription records, reducing data processing time by 60%.
- Developed and deployed custom Lightning Web Components (LWC) to enhance the Salesforce UI, improving user experience and accessibility.
- Implemented DevOps and CI/CD pipelines with SFDX, Git, Azure DevOps and Jenkins, enabling automated deployments and version-controlled releases.

Zensar Technologies – India | Salesforce Developer

Jul 2018 - Aug 2022

- Designed and implemented robust integrations between Salesforce and core banking platforms (Finacle, TCS BaNCS) using middleware tools like MuleSoft and Dell Boomi, ensuring real-time data synchronization and operational efficiency.
- Developed scalable Apex triggers, batch classes and Lightning Web Components (LWC) to automate business processes and enhance user interfaces, resulting in a 30% improvement in operational efficiency.
- Automated KYC verification and client onboarding workflows using Apex and Visualforce, reducing onboarding time by 40% and ensuring compliance with banking regulations.
- Designed and deployed interactive Power BI dashboards integrated with Salesforce for real-time portfolio tracking, regulatory reporting and actionable insights, enabling data-driven decision-making.
- Configured and optimized Salesforce APIs (REST, SOAP, Bulk) to facilitate seamless integration with payment gateways and external financial systems, enhancing transaction processing capabilities.
- Spearheaded the migration of legacy systems to Salesforce Lightning Experience, improving system performance by 25% and delivering a modern, intuitive user experience.
- Maintained secure, compliant integrations between Salesforce and core banking systems specific to Indian regulatory requirements (RBI guidelines), leveraging Ensono's managed services platform to ensure high availability and data integrity.
- Implemented Salesforce Einstein AI to enable predictive analytics, personalized customer experiences and targeted marketing campaigns, increasing customer engagement by 20%.
- Developed and maintained ETL processes using Informatica Cloud for seamless data migration, transformation and synchronization between Salesforce and external databases.
- Implemented two-factor authentication (2FA) and OAuth protocols to secure access to Salesforce applications, ensuring compliance with industry security standards and reducing risk of unauthorized access.
- Conducted performance tuning and debugging using Salesforce Debug Logs and monitoring tools, improving system response times by 15% and ensuring optimal application performance.
- Leveraged emerging technologies such as blockchain and AI to develop innovative banking solutions, enhancing operational efficiency and customer satisfaction.

Smart AI – India | Salesforce Admin

May 2017 - Jun 2018

- Achieved a 30% increase in project success rates by actively engaging in all phases of the Salesforce Development Lifecycle (SFDC), demonstrating a deep understanding of project management principles and a commitment to delivering high-quality outcomes.
- Designed and implemented custom applications, objects, tabs and fields with tailored functionalities to meet specific business needs, significantly enhancing operational efficiency and user experience.
- Spearheaded the customization of page layouts for Contacts and Accounts, meticulously aligning them with user profiles and implementing robust permission sets to ensure data security and compliance with organizational policies.
- Leveraged advanced Salesforce features, including Objects, Workflow Rules, Record Types and Validation Rules, to optimize business processes, resulting in streamlined operations and a measurable increase in team productivity.
- Developed and maintained comprehensive reports and dashboards, playing a critical role in ensuring data quality and integrity, thereby facilitating informed decision-making across the organization.
- Managed the implementation and ongoing maintenance of field-level security protocols, ensuring sensitive data was protected while maintaining necessary access for authorized users.
- Established and maintained a robust role hierarchy and user profiles, optimizing security settings to ensure appropriate system access and safeguarding sensitive organizational data.
- Defined and implemented lookup and master-detail relationships between objects, as well as created junction objects to facilitate complex data connectivity and enhance relational data management.
- Engineered custom workflow rules and assignment processes to streamline case escalation and resolution workflows.

EDUCATION

Masters in Data Science at University of North Texas, Denton, TX, USA.

Bachelors in Electronics and Communications Engineering at Gayatri Vidya Parishad College of Engineering, AP, India
