Professional Summary:

More than 5+ years of IT Experience in Design and Development of software Systems in the areas of Oracle eBusiness suite (Oracle EBS). Oracle Integration Cloud Consultant with extensive experience in designing, developing, and implementing Oracle-based solutions for diverse industries, including fintech, healthcare, and manufacturing. Proven expertise in Oracle Integration Cloud (OIC), Oracle Fusion Cloud, VBCS, and ATP databases, with a strong background in data migration, API development, and financial modules. Adept at managing large-scale data processing and analytics, ensuring regulatory compliance, and optimizing business processes.

Professional Experience:

Oracle Integration Cloud Technical Consultant

Kroger

Dec 22 – Present | Atlanta, GA

- Specializing in fintech, collaborated closely with fintech companies to design, develop, and integrate Oracle-based solutions for payments, lending, and personal finance management.
 - Utilized OIC to design and implement financial solutions tailored to fintech requirements.
 - Developed and integrated customized components to extend the functionality of applications using VBCS.
 - Created BI reports using OTBI to provide insights into financial data and trends.
 - Gathered and documented functional requirements for Oracle financial modules.
 - Implemented data migration using FBDI templates for seamless financial data transition.
 - Developed ETL processes to migrate data from various sources into Oracle Data Lake, optimizing performance and data integrity.
 - Leveraged Oracle Big Data technologies for large-scale data processing and analytics.
 - Applied patches and updates to ATP databases to enhance security and features.
 - Developed APIs using Oracle Integration Cloud API Management.
 - Implemented encryption and tokenization techniques to protect sensitive data.
 - Configured access controls and role-based permissions within OIC for secure data access.
-

Oracle Integration Cloud Consultant

Delta Airlines

Dec 21 - Nov 22 | Atlanta, GA

- Optimized Oracle solutions for the soap and lotion manufacturing sector, enhancing operational efficiency across manufacturing, inventory, supply chain, sales, and finance.
- Designed and developed applications using Oracle VBCS, integrating UIs with backend services.
- Conducted performance tuning for Oracle Data Lake components to enhance query performance.
- Skilled in Payables, India Tax Localization, and basic Purchasing, with strong configuration and functional analysis capabilities.
- Proficient in middleware tools like Boomi and Coupa, with expertise in PL/SQL for querying and mapping Oracle reports and tables.
- Worked on seamless integration between Oracle EBS and Coupa to streamline procurement processes and enhance operational efficiency.
- Configured and supported Coupa systems for invoice processing, procurement workflows, and supplier management.
- Collaborated with cross-functional teams to implement Coupa functionalities, ensuring compatibility with Oracle EBS modules like Payables and Purchasing.
- Experienced in aligning business requirements with Oracle EBS solutions and ensuring compliance with tax regulations.
- Managed end-to-end year-end financial reports for the general ledger.
- Performed ETL processes for data extraction and loading into ATP systems.
- Conducted Fit/Gap analysis for existing business requirements.
- Managed system configurations, security protocols, and user access within Oracle EBS 12.1.3.
- Developed and customized OTBI reports for data analysis.

Integration Developer

Cognizant

Aug 19 - Jul 21 | HYD

- Designed and implemented integrations with Oracle HCM Fusion Cloud using OIC, Oracle REST API, ATP Database, and SQL Developer.
 - Developed integrations to interface SAP Concur and Oracle ERP Cloud.
 - Created MD50 & MD70 design documents and upgraded OIC to Gen 3.
 - Developed integrations using Oracle ERP Cloud Adapter, SOAP & REST APIs, Object Storage, and ATP.
 - Managed vendor file integrations, covering journals, invoices, cost adjustments, and encumbrances.
 - Utilized Oracle HCM Adapter for HDL integrations and OIC for scheduling ERP jobs.
 - Mentored junior team members in OIC and provided support for modules such as AP, Procurement, General Ledger, and Project Accounting.
-

Java Developer

Cognizant

Apr 18 - Jul 19 | HYD

- Involved in design and development phases of Software Development Life Cycle (SDLC).
 - Developed the E-commerce site using JSP, Servlet, EJBs, JavaScript, JDBC.
 - Experience in creating EJBs that implemented business logic.
 - Developed stored procedures and triggers using PL/SQL in order to calculate and update the tables to implement business logic.
 - Design and develop XML processing components for dynamic menus on the application.
 - Developed business logic using Java Beans and Session Beans.
 - Implemented validation rules using Struts framework.
 - Developed user interface using JSP, HTML and Velocity template.
 - Persistence Layer operations are encapsulated in Data Access Objects (DAO) and used Hibernate for data retrieval from the database.
-

Technical Skills:

- Oracle Technologies: Oracle Integration Cloud (OIC), Oracle Fusion Cloud, VBCS, Oracle EBS, Oracle HCM, Oracle REST API, Oracle API Platform Cloud Service
 - Database Management: ATP Database, Oracle Data Lake, SQL Developer
 - Integration & Migration: OTBI, FBDI Templates, ETL Processes, MD50 & MD70 Design Documents
 - Programming & Scripting: JavaScript, SQL
 - Tools & Platforms: GitLab CI/CD, SmartBear ReadyAPI, Postman, CyberDuck, Kleopatra, Jira
-

Education:

Master of Computer Science

Eastern Illinois University- Specialized in Computer and Information Sciences
