

Name: SreeHarsha Madineni

Title: Java Developer

Email: harsham3927@gmail.com

Ph.no: +1 6196936299

LinkedIn: www.linkedin.com/in/harsha3927/

Professional Summary:

- Skilled and results-driven Java Developer with **5+ years** of experience in designing and developing robust, scalable, and secure enterprise applications using Java 17/21, Spring Boot, and Microservices.
- Proficient in the complete SDLC, including requirement analysis, design, implementation, testing, and production support in **Agile/Scrum** environments.
- Expertise in Spring ecosystem (**Spring Boot, Spring MVC, Spring Security, Spring Cloud**), **Hibernate/JPA**, and multithreaded application development.
- Strong experience in building **RESTful APIs** and integrating third-party services using **OAuth2, JWT**, and **GraphQL** for modern, secure web applications.
- Hands-on experience with **Docker, Kubernetes**, and **CI/CD pipelines** using Jenkins, GitHub Actions, and **Maven/Gradle** for automated build and deployment.
- Proficient in **database design** and optimization using **MySQL, PostgreSQL**, and **NoSQL databases** like **MongoDB** and **Redis**.
- Familiar with **cloud services** including **AWS (EC2, S3, Lambda, RDS)** and **Azure App Services** for deploying and managing cloud-native applications.
- Well-versed in unit testing **and** integration testing using **JUnit 5, Mockito**, and **Test containers**, ensuring code quality and test coverage.
- Experienced in implementing microservices, event-driven architecture, and message brokers such as **Apache Kafka** and **RabbitMQ**.
- Experience in provisioning available EC2 Instances by using **Terraform and cloud formation** and writing new plugins to support new functionality in Terraform.
- Experienced in using Version Control Tools such as **Git, Subversion, CVS**, and **Clear Case**.

Technical Skills:

Languages: Java 17/21, SQL, JavaScript, TypeScript

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA

Web Technologies: REST, GraphQL, JSON, XML, HTML5, CSS3

Frontend: React.js, Angular, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Azure, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform

Messaging: Apache Kafka, RabbitMQ

Tools: Git, Maven, Gradle, IntelliJ, Postman, JIRA

Testing: JUnit 5, Mockito

Professional Experience:

Client: City Bank, Tampa, FL

Jan 2024 to Till Date

Role: Java Developer

Responsibilities:

- Following **Agile (Scrum)** Methodology for developing application development.
- Developed modules using Core Java APIs, Collections, **Java 17/21** (Streams), Exception Handling, Generics, Enums, Java I/O and object-oriented designs patterns.

- Used Microservice architecture with Spring Boot-based services interacting through a combination of REST and **Apache Kafka** message brokers.
- Developed business components by using **Spring Boot, Spring IOC, Spring AOP**, Spring Annotations, Spring Cloud & Persistence layer by using Hibernate/JPA along with Web Services (RESTful).
- Having Good Experience in using Reactive API/programming while implementing the applications that are asynchronous and event-driven with the Spring based **Web-Flux** client.
- Implemented customized authentication in **Spring Security** to verify user-role and secure the user pages
- Integrated **OAUTH** with the application for Security.
- Used **JAX-RS** for creating Restful web service and implemented authentication by using OAuth2 Security Framework.
- Used **MySQL** database for **SQL, PL/SQL scripts, stored procedures, functions, triggers**.
- Experience in Terraform for creating stacks of VPCs, ELBs, Security groups, **SQS queues, S3** buckets in AWS and updating the Terraform Scripts based on the requirement on regular basis.
- Developed Test Cases and performed unit test using **JUnit** with Mockito Framework.
- Use **JIRA** tool for tracking new requirements, enhancements, bugs, and Git for version control.

Environment: Java 17/21, Spring, Hibernate, Spring batch, Spring Boot, JPA, JMS, HTML5, CSS3, Eclipse, SQL ServerLog4j, JIRA, Node JS, Kafka, Microservices, REST UI.

Client: SquareTrade, SFO CA

Feb 2023 - Dec 2023

Role: Java Developer

Responsibilities:

- Involved in understanding **SDLC** using agile methodology.
- Developed server-side application to interact with database using **Spring Boot** and **Hibernate ORM**.
- Designed, developed, and tested **HTML5, CSS3, Bootstrap, JavaScript, React.JS** that meet accessibility and web browser standards for websites.
- Deployed and monitored Spark applications on cloud platforms like **AWS EMR** leveraging infrastructure as code (IaC) tools like **Terraform or CloudFormation**.
- Proficiency with **Azure**, or **Google Cloud Platform (GCP)** for cloud-native application development.
- Changing the AWS infrastructure Elastic Beanstalk to **Docker** with **Kubernetes**.
- Created JSON request and validated the response using postman Interceptor and **Swagger UI**.
- Setup CI/CD pipeline process for the application using the **Jenkins**.
- Implemented **XML** documents for **web services** and tested services using **SOAP**.
- **Apache Maven** tool has been used for the build and deployment of the application.

Environment: Java 11. Spring, Hibernate, Spring batch, Spring Boot, JPA, JMS, ReactJS, HTML5, CSS3, Eclipse, Oracle 10g, Swagger UI, Log4j, JIRA, Pure XML, Web Services, Kafka, Node Js, Microservices, REST UI.

Client: N information Technologies, Hyderabad India

May 2020-June 2022

Role: Java Developer

Responsibilities:

- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using AGILE methodology (SCRUM) in a test-driven development (TDD) approach.
- Designed the user interface using **Spring MVC, JSP, JSTL, JavaScript, Ajax, Bootstrap, HTML5, and CSS3**.
- Implemented the backend layer with the **Spring framework, Hibernate, and XML**. Utilized **Eclipse** as the **IDE**.
- Implemented authentication and authorization for the application using **Spring Security and Oauth2**.
- Implemented SOAP based **JAX-WS** Web services interfaces for integrating multiple systems, code re-usability and consumed JMeter to test performance of SOAP protocol.
- Worked on creating, retrieving, updating, and deleting documents in **MongoDB**.
- Worked on Jenkins for continuous integration with **Gradle and GitHub**.

Environment: Java 1.8, HTML5, CSS3, JavaScript, jQuery, TypeScript, Bootstrap, Spring Boot, Spring IOC, Spring MVC, SOAP, RESTful, XML, AWS, Node JS, Mongo DB, CI/CD, Maven, IntelliJ IDE, JUnit, JMS, UNIX, Jenkins, JIRA, Log4j, Git.
