

Sree Nanduru

Senior Dot Net Developer/ Module Lead

Address Parlin, NJ, 08859

LinkedIn [linkedin.com/in/sree-lakshmi-nanduru/](https://www.linkedin.com/in/sree-lakshmi-nanduru/)

Phone 732-723-8752

E-mail sreenanduru.net@gmail.com

Enthusiastic Software Programmer/Lead highly skilled in Dot Net and Web Technologies. Over 15 years of experience in Software design, development, and testing of robust software applications. Motivated to learn, grow, and excel in the Technology industry. Excellent analytical logical skills and eager to contribute to team success through hard work.

Skills Summary

Web development	Extensively worked and Lead teams with Project development using ASP.Net Core, Restful API's, MicroServices, MVC, Web Services, WCF, Web Forms etc.
Front End	Great experience in building front-end application using Angular Typescript, Angular JS, React JS, Rxjs, Node JS, Ngrx, JavaScript, jQuery, CSS, HTML, DHTML
Entity Framework	Extensively worked with Entity Framework for mapping the Data to the Business objects and worked with LINQ queries.
MS Sql Server	Deeply Involved in DB design and developed Stored Procedures, Triggers, Functions, improving Query/SP Performance.
SSIS SSRS	Extensively Worked on SSIS to develop packages for data interaction on specific business rules and developed SSRS Reports to create customized reports.
Azure Cloud	Worked in Azure Functions and App services for migrating applications from on prem to Cloud. Experience with building Azure Devops pipelines.
Unit Testing	Extensively worked in Unit Testing backend code using NUnit and front-end code with Jasmine and Karma. Experience in Test Driven Development, using BDD, Playwright, Cucumber.
Agile Scrum	Greatly worked in Agile (Scrum) Software Development Model and Version Management platforms like MS Viso, JIRA, TFS, Azure Cloud, GITLAB, Bitbucket, Rally
Devops	Great experience in building CI/CD pipeline and using Azure Devops
Non-technical skills	Requirements gathering, analysis, effort estimation, technical writing, SDLC, Agile Methodologies, SCRUM, CI/CD pipeline, Jenkins, Splunk, Service Now, Change/Incident Management, MS Office, Postman. Familiar with the use of Splunk for monitoring, visualizing, and analyzing the real time data usage of the application.

Work History

Sep 2023 – Current

Senior Software Developer/Lead

LPL Financial, Remote

Project 11: ClientWorks (Trading Orders, Security Tracker), UTPAdmin

Description: ClientWorks is a legacy application where Advisors can process Equity and MF trades. The client Information, Account Information, Profile Management, Orders, Requests are some of the tabs. UTP Admin is a back-Office tool for monitoring and management of ClientWorks and related Applications.

- Actively involved in solving issues with Trading Orders and Equity/MF Orders Order management and Security Tracker in C# .net core and SQL server DB.
- Involved in development of new features in UTPAdmin, with Angular and Sql Server Backend.
- Worked in Github Actions for the build process for various projects.
- Participated in various Production deployments with continuous CICD in Octopus.
- Worked in Postman for debugging the Web Api requests

Technology: Visual Studio.NET 2022, Angular 12.1, Typescript 4.3, .NET Core, Entity Framework, SQL Server, LINQ, Micro Services, Restful Web API, Postman, Azure, JIRA, Octopus CICD Pipeline, Github Actions.

Mar 2022 – Sep 2023

Senior Software Developer/Lead
Bank of America, Jersey City, NJ

Project 10: Registration and Insurance Licensing System

Description: Registration and Insurance Licensing System (RAILS) offers a self-service capability and holds information on licensed and registered individuals and branches in Insurance, Mortgage, Registrations and Corporate Filings.

- Actively involved in design and implementation of the conversion of the project with CSP guidelines and migrating from Angular JS to Angular.
- Lead the Offshore team for specific development modules.
- Worked in Azure Functions and App services for hosting some of the api projects.
- Worked in Microservices Arch composed of independent modules which communicate with each other.
- Incorporated best practices and refactored the code following SOLID principles.
- Extensively worked on Angular Material and Kendo Telerik controls to develop the UI and restful api to build the backend services.
- Worked on Azure Cosmos DB for some of the projects.

Technology: Visual Studio.NET 2019, Angular 12.1, Typescript 4.3, RxJS, React JS, .NET Core, Entity Framework, MySQL, LINQ, Micro Services, Restful Web API, Azure, JIRA, Jenkins CICD Pipeline, Unit Test Jasmine/Karma.

Aug 2021 – Feb 2022

Senior Software Developer/ Lead
UHG (UnitedHealth Group), Remote

Project 9: HAD

Description: Health Assessment Dashboard, is the organizational source of truth for the comprehensive health of the application. It leverages data, prior performance, and expert analysis to identify and quantify potential risks to an application's stability and performance. It supports Peak Season Readiness and Planning along with a risk scoring tool. Architecture, Disaster Recovery, Change Management, Modernization is few in many metrics for the SLO's to identify.

- Actively Involved in Architecture/Design of application, Grooming and Sprint Planning the User Stories.
- Involved in team meetings and set up CI/CD automation and porting it to Azure Cloud.
- Implemented the Badging feature to issue new Badges like Newbie, Promoter, Explorer etc. which adds gamification to the site to encourage and entice the usage of the application.
- Participated in Analyzing the performance of the application and improving the performance by working on the dead code paths.
- Incorporated best practices and did a lot of refactoring following SOLID principles.
- Extensively worked in Unit Testing backend and front-end code and adding SonarQube to the pipeline for clean code.
- Developed various data migrations in the application which are required for the new features.
- Familiar with the use of Splunk for monitoring, visualizing, and analyzing the real time data usage of the application.
- Experience in (Behavior Driven Development (BDD) Testing Framework, using Playwright and Cucumber.

Technology: Visual Studio.NET 2019, Angular 12.1, Typescript 4.3, RxJS, NgRx, React JS, .NET Core, Entity Framework, MySQL, LINQ, Restful Web API, Azure Kubernetes Service (AKS), JIRA, Rally, Dbeaver, Jenkins CICD Pipeline, Unit Test Jasmine/Karma, BDD, Playwright and Cucumber, SPLUNK.

Dec 2012 – Jul 2021

Senior Software Developer/ Module Lead

NYC Department of Social Services, Brooklyn, NYC

Project 7: LMS

Description: Landlord Management System includes Landlord Portal LP and City Portal CP which is a solution to centralize Landlord Information and management in various applications in the DSS. LMS is a consolidation of functionality of 4 systems RAP, HAPS, LEDDS and HOME. LP provides Landlords a self-service channel to set up the accounts and the CP provides a centralized location to register and manage the landlord accounts and case process tracking information.

- Lead and Contributed towards Architecture/Design of application, Technical/Non-functional User Stories, Code and Sprint Planning. Involved in team meetings and setting up CI/CD automation.
- Collaboration with Management and Development team until Product Completion.
- Making sure the application's architecture adheres to the SOLID principles.
- Active involvement in UAT meetings with JIRA defect logs and troubleshooting with Extensive interaction with onshore and offshore support teams to get issues resolved.
- Deep Involvement in Design and Implementation of Code base using .Net core, MVC Framework, Angular, Type Script and SQL database.
- Worked extensively on Migrating the functionality of 4 applications into a Central Portal with updated Framework Microsoft Dot Net 4.5.
- Complete involvement leading in the design and development of Database in Microsoft SQL Server.
- Involved in build and deployment of the code using Azure DevOps pipeline.

Technology: Visual Studio.NET 2019, Angular 8.0, Typescript, React JS, Node JS, MVC framework, .NET Core, Entity Framework, Web Services, HTML, SQL Server, JavaScript, jQuery, LINQ, Restful Web API, TFS, Azure, JIRA

Project 6: RAP_Renewals

Description: Rental Assistance Program is NYC Federal Project to facilitate Housing assistance to low-income families. On a monthly basis, we need to generate a renewal file prior to the seventh month of the lease that have not been otherwise cancelled. The application facilitates the user to add or modify income, employment, composition, and aftercare info to the file and then merge it on to the renewal form for mailing. The same way other letters like Termination and Approval letters also need to be sent to the client and the landlords with a specific time frame before the lease end date automatically and manually.

- Worked on the Business Analysis and gathering the requirements, presenting mockups, and going through the whole project life cycle.
- Implemented the presentation layer in Angular JS MVC Framework and Business Layer in C#.
- Involved in DB design and developed Stored Procedures, Triggers, Functions, and other database objects to interact with Data in SQL server.
- Worked on Entity Framework for mapping the Data to the objects.
- Implemented Windows Services to schedule tasks and send the Termination and Approval letters to the production control.
- Developed SSIS Packages for other date import and export business requirements.
- Involved in developing test case scenarios, Unit Testing with Test driven development, and technical documentation of the project.

Technology: Visual Studio.NET 2012, AngularJS 1.3, MVC framework, Entity Framework, Web Services, HTML, MS SQL Server, JavaScript, jQuery, LINQ, WCF, Restful Web API, TFS.

Project 5: IVS

Description: FIA has requested MIS to create functionality to provide a single interaction point for third party data sources for all data matches within HRA. The Information Verification Service (IVS) system is being built as a part of the HRA reengineering initiative with the collaborative efforts between MIS, FIA, OQA and IREA to produce a centralized processing and research tool for all the data matches that currently exist throughout HRA.

- Implemented the presentation layer in Angular JS MVC Framework and Business Layer in C#.
- Developed Stored Procedures, Functions, and other database objects to interact with Data in Oracle.
- Consumed WCF Services in the Collateral Engine module so the data feeds into Oracle DB.
- Involved in developing test case scenarios and technical documentation of the project.

Technology: Visual Studio.NET 2012, Angular JS, LINQ, MVC framework, Web Services, HTML, Oracle, JavaScript, jQuery, WCF, TFS.

May 2008 – Dec 2012

Software Developer
NYC HRA, Brooklyn, NYC

Project 4: CCMS

Description: CCMS is a portal to support the current Interactive Voice Response System (IVRS) Call Center Environment where data and information captured over the IVRS is presented to relevant call centers. The call centers then have the flexibility to process IVR requests even after the caller has ended the call. It is a portal for many applications like HEAP, CBIC, CMR, Callback, and Nursing Home.

- Implemented the presentation layer in ASP.NET and C# by designing Web Pages in HTML, JavaScript, and jQuery for client-side effects/validations and Business Layer in C#.
- Worked on Role based Architecture with Roles and Privileges and designed the database accordingly for various applications in the portal.
- Worked on scheduling many Stored Procedures to automate many Business logics and worked on scheduling SQL jobs for them.
- Consumed WCF Services as the bridge between user interface layer and Business service layer to provide service-oriented architecture.
- Developed SSRS based reports for daily/monthly/date-range based details of appkits requested with information such as most requested toolkit, most requested language, request source, etc.
- Extensively Worked on SSIS to develop packages for specific business rules of BVIMA (Birth Verification System).

Technology: C#, ASP.NET, ADO.NET, Visual Studio.NET 2008/2010, Web Forms, XML, XSLT, Web Services, HTML, SQL Server 2008/2012, UML 2.0, JavaScript, jQuery, WCF, WinForms, VSS.

Project 3: ACE Call Recording

Description: The ACE Call Recording project creates a Functionality for FIA to record, monitor and review phone calls received by applicants and participants for Supplemental Nutrition Assistance Program. Calls will be stored for a period of 2 weeks and functionalities like play a call, search, archive are provided.

- Implemented the presentation layer in ASP.NET and VB.net by designing Web Pages in HTML, JavaScript, and jQuery.
- Employed Agile (Scrum) Software Development Model during the entire project life cycle.
- Developed Stored Procedures, Triggers, Functions, and other database objects to interact with Data in Oracle database back end.
- Implement LINQ techniques for querying XML.
- Worked on jQuery for validations and implementing business requirements.

Technology: C#, ASP.NET, ADO.NET, Visual Studio.NET 2008/2010, Web Forms, LINQ, Oracle 10g, UML 2.0, JavaScript, jQuery, JIRA (For ticketing and tracking), VSS; Development Methodology - Agile

Project 2: NYC Health Insurance Link

Description: The 'NYC Health Insurance Link' is for small businesses and individuals located and living in New York City. This tool allows the user to pre-screen for potential eligibility for five special options that have been developed by the government and non-profit sectors to offer additional choices beyond purchasing insurance through an agent or broker.

- Involved in requirement analysis by interacting with clients to gather requirements and technical documentation of the project with complete SDLC of the project.
- Implemented the presentation layer in HTML, JavaScript, jQuery and business logic in ASP.NET and C#
- Involved in development of the application in C# using the MVC framework.
- Developed Stored Procedures, Triggers, Functions, and other database objects to interact with Data in SQL Server.
- Extensively Worked on SSIS to develop packages for specific business rules and developed SSRS Reports.
- Used jQuery library to develop client-side effects, and utilized plugins like PsStrength and Bvalidator.
- Implemented XML Serializer for loading data to XML Files and transforming XML data.
- Used WCF services to create services to send and receive health insurance plans information.
- Effectively created .NET Reports and allowed the user the flexibility to view/print/save the report in the format they desired (Excel/PDF)
- Received **Excellence in Technology Award for the year 2011 in Government Technology Conference**, for best application serving the public: NYC Hlink – NYC Health Insurance Link
- Worked with Users to design multi-language websites. Developed many resource files and Database components to incorporate multiple languages for the website.

Technology: C#, ASP.NET, ADO.NET, Visual Studio.NET 2005/2008, Web Forms, XML, XSLT, Web Services, HTML, SQL Server 2005/2008, UML 2.0, JavaScript, jQuery, WCF, MVC 3.0 architecture, VSS.

Project 1: Admin Panel for NYC Health Insurance Link

Description: The Admin Panel is an intranet application used to reduce the maintenance of the NYC Health Insurance Link application. Apart from general data updates, the users can get the survey reports; log reports and other statistical reports using this application. The users can also update the News Alerts, glossary and manage the Subscribers for Newsletters.

- Involved in gathering Requirements, Analysis, Design, Development and Testing of the application.
- Designed and developed the front end (GUI Screens and interfaces) using ASP.NET and developed Business Layer in C#.
- Worked on Win forms and developed a Windows Application.
- Used JavaScript, jQuery for Client Validations.
- Created Business Intelligence reports using SSRS.

Technology: C#, ASP.NET, ADO.NET, Visual Studio 2005, SQL Server 2005/2008, SSRS, SSAS, HTML, JavaScript.

Education

Aug 2006 – Dec 2008

Master of Science: Computer Science

University of Kentucky, Lexington, KY GPA: 3.80

Jun 2002 – May 2006

Bachelor of Technology : Computer Science Engineering

Andhra University, Visakhapatnam, INDIA GPA: 3.90

Certifications

Microsoft: Microsoft .NET Framework 2.0 - **Web-Based Client Development.** (70-528)

Microsoft: Microsoft .NET Framework 2.0 - **Application Development Foundation.** (70-536)
