

Accomplished QA Lead, Project Manager, and Business Analyst with 9+ years of experience delivering complex technology projects across insurance, public sector, B2B, and D2C domains. Expertise in Agile methodologies, test automation (BDD, Karate, Selenium), and managing functional, E2E, and regression testing. Skilled in project planning, stakeholder management, risk mitigation, and driving operational excellence in onshore-offshore collaborations. Proven track record of defining business requirements, aligning technology outputs with commercial goals, and translating them into actionable solutions. Adept at facilitating communication between business and IT teams, recommending process improvements, and mentoring on best practices. Consistently delivers high-quality solutions on schedule and budget in fast-paced, matrixed environments.

Professional Experience

Birlasoft, Inc

Senior Test Engineer/ QA Lead / BA

May 2021 -Jan 2024

Agile Center of Excellence Support

- Facilitated Agile ceremonies, including sprint planning, retrospectives, and backlog grooming, to align with the Agile and Product Mindset maturity framework.
- Supported project lifecycles by proactively managing scope, risk, and communication, ensuring alignment with organizational objectives.
- Oversaw multiple workstreams, from small to complex, ensuring timely delivery of milestones while maintaining quality standards.

Azure DevOps Expertise

- Extensive experience in Azure DevOps for backlog management, dashboard creation, and tracking project metrics.
- Developed comprehensive dashboards to monitor team performance, track KPIs, and communicate project progress to stakeholders.

Project Management Skills

- Built prioritized roadmaps for D2C microsite and B2B initiatives, aligning enterprise and divisional requirements for sales transformation projects.
- Spearheaded the refinement of digital change intake and upgrade processes, improving delivery timelines for customer-focused solutions.
- Delivered product demos and progress reports to stakeholders, highlighting milestones and ensuring alignment with business goals.
- Identified and mitigated risks through proactive assessments, enhancing the success rate of high-impact initiatives.

Quality Assurance and Testing

- Proficient in designing and executing test cases for EDI document exchanges ANSI X12, EDIFACT, ensuring data accuracy, compliance with industry standards, seamless integration with ERP/CRM systems, and error handling for robust automated transaction processing.
- Skilled in using EDI tool IBM Sterling for mapping, validation, and troubleshooting; implementing automated test scripts for regression testing; and conducting load and stress testing to ensure system reliability under high transaction volumes.
- Delivered user acceptance testing (UAT) to identify and resolve issues using UKG Solution QA before UAT & Production, ensuring seamless customer experiences.

Collaboration and Communication

- Collaborated with product owners and solution architects to refine user experiences and provide accurate estimations for Statements of Work (SOW).
- Facilitated cross-functional team communication, ensuring clarity and alignment of objectives across Agile and Waterfall environments.
- Leveraged tools like Adobe Analytics and MS PowerPoint to create actionable insights and enhance decision-making processes.
- Continuously improved the business analysis function, mentoring junior staff and promoting the integration of best practices across teams.

UST BlueConch Technologies

QA Engineer

May 2019 -April 2021

Sree valli Golluru Bains

QA Manager | Program Lead | Program Manager | Business Analyst

Plantsville, CT

[Bains](#)

Business Skills:

Digital Transformation: Roadmap Development, Sales Transformation, Agile Project Management, Scope Definition, Vendor Management, Change Management, FIEXCUBE, BACKBASE,nCino

Analytics: Adobe Analytics, Data Mapping, SQL, Web Performance Optimization

Process Improvement: Change Management, Risk Mitigation, Contingency Planning

Technical Proficiency: Jira, Azure DevOps, Selenium, TestRail, HP ALM

Communication: Stakeholder Management, Digital Consulting, Documentation, Cross-Functional Collaboration, Regulatory Compliance, Executive Presentations

Leadership: Proven track record of leading QA teams, UAT coordination, and test planning. UKG Solution Implementation

Tools/Automation:

Selenium · Appium · Perfecto Mobile Automation · JIRA · CBT · UFT · OSS · BSS · Testrail · SFDC Testing · UFT · Avaloq · ACI Worldwide · FDR · IBM Sterling · EDI Validators

SDLC Tools:

HP ALM · SharePoint · JIRA · Azure DevOps

Databases:

SQL Server · PostgreSQL · DB2 · Mongo DB

Operating Systems:

Windows · iOS · Android · Mac · Unix · Linux

- Conducted GAP analysis to evaluate system changes, ensuring alignment with project objectives and regulatory requirements.
- Executed comprehensive testing cycles across QA, staging, and production environments using JIRA and TestRail utilizing parallel testing under UKG Solutions QA Methods.
- Agile facilitation, backlog management, and stakeholder communication.
- Strong organizational and analytical skills, with a focus on delivering high-quality results.
- Expertise in Azure DevOps, user experience enhancement, and process optimization.
- A keen ability to align with and advance Agile and Product Mindset maturity efforts.
- Collaborated with stakeholders to resolve defects, ensuring quality assurance in all deliverables.
- Spearheaded automation testing initiatives, including BDD frameworks and regression test suite automation.
- Directed a QA team to execute Functional, End-to-End (E2E), and Regression testing phases.

Virtusa

Sept 2016 -Nov 2017

Associate Consultant

- Interviewed business users to gather requirements and assessed feasibility in coordination with the Project Manager and technology lead.
- Conducted in-depth requirement analysis using MS Excel and drafted initial Functional Specification Document (FSD).
- Developed Use Cases to detail system interaction and functional requirements.
- Performed data mapping and executed complex SQL queries to extract data from the MS SQL database.
- Created test cases, scenarios, and traced them to requirements.
- Performed data mapping and executed complex SQL queries to extract data from the MS SQL database.
- Created test cases, scenarios, and traced them to requirements using QC and Excel for tracking.
- Collaborated with end users during UAT, documented bugs, and tracked defects.
- Led triage calls with the QA team to ensure defect resolution.
- Assigned issues to the appropriate development teams for fixes.

Programing Languages:

Java ▪ JavaScript

Education:

Bachelor's in Computers
Berhampur, Odisha, India

ISTQB Foundation Certification
India

Foundation on Project Management,
Coursera

AWS Fundamental: Building
Serverless Application, Coursera

Doshaheen Solution Pvt Ltd

Feb 2016 -Aug 2016

Associate Software Engineer

- Used Business Artifacts to analyze the Functional Non-Functional Requirements from previous years performance reports.
- Conducted a pre-planning meeting with the product owner to translate the requirements into an initial set of user stories.
- Coordinated and assisted the team through designing, coding, testing, deploying, maintaining, and supporting client initiatives, by running sprint cycles.
- Created Test cases, Test Plans and performed UAT.
- Created an error repository and managed the testing process with the QA team through logging and tracking defects using HP Quality Center, maintained Requirement Traceability Matrix.

Accenture

May 2014 – Nov 2015

Associate Software Engineer

- Direct interaction with client, Principal, Business Analysts and Solution Analysts, analyzing the business requirements, and identifying gaps in business requirements, test artefacts, etc.
- Documented the user stories to create the product backlog with the product owner's input.
- Utilized JIRA for change request management during requirement churns and conducted backlog refinement meetings for reprioritization and sprint planning.
- Identified the subject matter experts and project stakeholders before conducting a stakeholder analysis.
- Conducted scope review meeting followed by scope decomposition to be reviewed by the technical project stakeholders.
- Conducted requirements gathering sessions with the stakeholders Business Technical to create the high level requirements document BRD.
- Test scripting at various levels of testing like Configuration and Integration testing.

- Defect logging, tracking and triages running them to closure by liaising between test team, Vendor support and Business Analysts
- Support in creating Logging defects and UAT Change request using JIRA, creating, and executing the scripts, tracking the results, maintenance of scripts release wise.
- Identifying and analyzing new areas for automation by checking feasibility, modifying existing regression packs, and creating new functional scripts
- Test Reporting
