Objective:

Enthusiastic ServiceNow Developer with 3.5 years of experience in ServiceNow development, customization, and administration. Strong understanding of IT Service Management modules, scripting, and integrations. Strong understanding of agile methodologies and software development lifecycle. Eager to learn and expand expertise in ServiceNow development.

Work Experience:

ServiceNow Developer

Tata Consultancy Services

Client: Astellas Pharma

(June 2022– March 2024)

- Worked on Incident Management, Problem Management, Change Management and Knowledge Management, within the ServiceNow platform.
- Developed Client and Server-side scripts, including Client scripts, Business rules, Script Includes, and Ui actions, to address diverse scenarios and meet specific customer requirements.
- Created Access Control Lists (ACLs) to restrict and grant access to system personas, aligning with client access policies and security needs.
- Configured custom reports, notifications, and performance analytics dashboards to meet client requirements.
- Developed custom classes and maintained the integrity of the CMDB by implementing regular audits.
- Automated the creation and deletion of relationships between Applications and Application Services to ensure the accuracy and health of CMDB relations.
- Implemented and managed Client Scripts for enhanced platform functionality.
- Configured and managed Service Level Agreements (SLAs) to ensure compliance with business requirements.
- Developed and maintained Inbound Email Action Scripts to automate responses and workflows.
- Developed and configured Service Catalog Items and Content Items for streamlined service requests.
- Developed and maintained efficient workflows using Flow Designer, ensuring seamless integration.
- Worked on enhancements in integrating the ServiceNow using REST/SOAP integration processes.
- Imported data into ServiceNow using Import Sets, ensuring data accuracy and integrity.

ServiceNow Developer

Tata Consultancy Services

Client: Nordea Bank

(November 2020 – May 2022)

- Developed and customized UI Policies, UI Actions, and Catalog UI Policies, Client Scripts.
- Configured and managed Scheduled Jobs, ACLs, Reports, Notifications, Inbound Email Actions, Assignment Rules.
- Created and maintained Service Catalogs, leveraging Flow Designer to automate processes and streamline service requests.
- Built Business rules for events and notifications, performed platform upgrades, and managed application security.
- Data Management: Managed data with Import Sets, Export Sets, and Update Sets.
- Managed update set migration between instances to maintain consistency across environments.
- Imported data into ServiceNow using Import Sets, ensuring data accuracy and integrity.
- Service Administration: Created and managed Reports, Dashboards, and configured SLAs.
- Administered Knowledge Base, built and imported Knowledge Articles, and managed workflows for Service Catalog.
- Configured the multi-level approvals using flow designer.
- Worked on Automated Test Framework (ATF) scripts for ITSM modules.
- Engaged in regular client interactions for requirement gathering and clarification.
