PROFESSIONAL EXPERIENCE

SAP EWM CONSULTANT

August 2022 - July 2023

- Experienced in configuration and integration of SAP EWM enterprise structures, including defining **Plants**, **Storage Locations**, **Storage Sections**, **storage bins** and activity areas to improve warehouse functionalities.
- Configured warehouse structure elements and master data in **SAP EWM** by defining work centers, activity areas, packaging specifications, and warehouse products.
- Designed storage control processes in SAP EWM, including Process-oriented storage control(**POSC**) and Layout Oriented Storage control (**LOSC**) to simplify warehouse operations.
- Knowledgeable in **TM-EWM** integration within SAP S/4 HANA by integrating freight orders (**FO**) and Transportation Units (**TU**) to optimize logistics execution, improve transportation planning and involved in the embedded EWM and TM Integration outbound process flow.
- Leveraged in **Physical Inventory (PI)** Process and cycle counting within SAP EWM by checking the accurate stock reconciliation and compliance also implemented a comprehensive factory PI count (wall-to-wall).
- Oversaw the stock movements and executed stock placements and removals using optimized **put- away** and **picking strategies** along with the warehouse order creation rules (**WOCRS**) by achieving 15% improvement in inventory accuracy and 18% enhancement in warehouse operational efficiency.
- Leveraged **radio frequency (RF)** devices and the SAP console to execute real-time warehouse transactions, including handling unit management, inventory movements, and **PPF actions**, ensuring 18% increment in operational efficiency and accuracy on the warehouse floor.
- Handled cross-docking and value-added services (**VAS**) processes in SAP EWM and performed the configurations of executed slotting and replenishment strategies, improved picking efficiency by 10%.
- Well-versed in warehouse order creation rules (**WOCR**) and warehouse process types (**WPT**) to optimize inbound and outbound processes, enhancing order fulfillment speed and warehouse efficiency.
- Implemented strategies that increased processing velocity by 5%, ensuring seamless operations and improved customer satisfaction.

SAP CONSULTANT

July 2021 - August 2022

- Delivered extensive support for SAP EWM within S/4 HANA support project during various process improvement initiatives to enhance operational efficiency, optimize warehouse workflows, and increased the system performance by 10%.
- Implemented the SAP EWM structure, including **ERP** and **EWM** Warehouses, Supply Chain units and Availability groups ensuring the logical integration and optimized warehouse operations.
- Managed the creation of storage bins, storage location Mapping to EWM, **Storage Types, sections** and **Activity Areas (AAs)**, along with the put away Control Indicators, Put-away rules, Stock removal control Indicators and Stock removal rules to streamline inventory movements.
- Developed Warehouse order Creation rules (**WOCRS**), **Queues, Queue Determination, RF Menus, Physical Inventory processes** and printing functionalities by boosting the system performance and warehouse efficiency.
- Collaborated closely with the business team to gather, analyze, and document detailed business requirements and providing the flexible SAP EWM system process optimizations.
- Oversaw and Managed **Physical Inventory Processes** in SAP EWM, including inventory settings, **document creation**, difference posting, inventory sampling, and cycle counting by achieving 15% improvement in stock accuracy and ensuring 18% compliance with inventory management standards.
- Handled a full cycle delivery processing in EWM, which covers goods issue to manufacturing against process order, **STO process** for both (**Inter & Intra Company Transfers**), subcontracting process integration and goods issue through the SD process.

Programmer Analyst Trainee

Feb 2021 - July -2021

Intern, Cognizant Technology Solutions , Chennai, India

- Worked Closely with the functional team as an EWM Consultant with a robust background in designing and implementing system enhancements as well as providing end-to-end support for **SAP MM, EWM Embedded, SD, PP, and QM**.
- Configured Embedded EWM and improved the process flow for inbound and outbound deliveries to enhance the warehouse efficiency.
- Performed thorough analysis of project and business requirements by defining the project scope to perform the successful implementations.
- Successfully led the end-to-end SAP EWM implementations and cut-over by checking the timely completions within the defined timeline to avoid disruptions.
- Conducted the development of a global template project(internal), designing and implementing solutions for **O2C(Order - to- Cash)** and **P2P(Procure-to-Pay)** Processes to the industry by attaining 15% improvement in global operations.
- Directed the comprehensive testing activities, including the preparation of test data and defect resolution across various testing phases (**IT1,IT2,UAT and Hyper care**).
- Engaged in the client warehouse visit during the **IT1 & Go-Live** deployment and helped users during the testing of Inbound, Outbound, and Internal Processes.
- Designed **PPF actions** and developed smart forms for automated printing of warehouse order documents including the put away and picking lists during the final put away and picking processes.

INTERNSHIPS

ECIL(Electronics Corporation of India Limited)

Hyderabad, India 05/2020- 07/2020

- Led the creation of an Android Application Management for bank management system using HTML, CSS, JavaScript, and DBMS.
- Progressed SAP ABAP reports and updates, also designed various smart forms to meet the business requirements.

EDUCATION

University of Cincinnati, Cincinnati, OH

April 2025

Master of Engineering in Computer Engineering

KL University, Vijayawada, India

June 2021

Bachelor of Technology in Electronics and Computer Engineering
