EDUCATION

Masters in Computer Science: George Mason University, VA

Jan 2023-Dec 2024

Bachelors in Information Communication and Technology: SASTRA University, India

Jun 2017-May 2021

WORK EXPERIENCE

Software Engineer | Arthrex, Florida

Feb 2025- present

- Designed and developed **distributed microservices** using **Spring Boot** and **RESTful APIs**, enabling secure, scalable communication across enterprise systems.
- Improved system reliability and performance by optimizing **PostgreSQL** queries with **Spring Data JPA** and implementing **fault-tolerant service design**.
- Automated testing and deployment with **GitHub Actions**, **Jenkins**, and **Docker**, reducing release cycles by 60% and ensuring deployment consistency.
- Collaborated with cross-functional teams to enhance observability, scalability, and cloud-native performance in production environments.

Research Assistant | George Mason University, Virginia

Feb 2023-Dec 2024

- Contributed to GeoWeaver, an open-source data workflow platform, implementing frontend features with **Angular**, **TypeScript**, and **Tailwind**, optimizing UI responsiveness and page load times by **30%**.
- Developed backend services with **Node.js** and **Express**, creating **REST APIs** and integrating with **MongoDB** for secure and efficient data storage.
- Implemented unit and end-to-end testing with **Jest** and **Cypress**, conducted code reviews, and applied **CI/CD practices** to ensure seamless integration across frontend, backend, and database layers.

Associate Software Engineer | United Health Group, Hyderabad, India

Jun 2021-Dec 2022

- Developed an end-to-end Automation testing framework for the web application for testing using **Selenium**, **Cucumber**, **Java** which reduced **80%** manual work.
- Involved in the complete **software development life cycle**, from gathering user requirements and development to testing and deployment, following **Agile** methodology.
- Utilized **Spring Data JPA** to integrate with **MySQL** database, reducing data retrieval times by 30%. Implemented **CI/CD** pipelines using **Jenkins** and **Git**, streamlining deployment processes and improving release efficiency.
- Developed and maintained automated **unit** and **integration** tests using **JUnit**, **Selenium**, and **Cucumber**, enhancing test coverage and ensuring the reliability of key application features.
- Key Contributor in the migration of Internal Jobs, Online Portal & Microservices from On Premise to **Microsoft Azure Cloud**. It was a lift and shift of **DB2** to **PostgreSQL**, **Unix** to **Linux** server.

ACADEMIC PROJECTS

Cloud Mart

Mar 2025

- Built cloud-native e-commerce platform with **React**, **Node.js**, **Terraform**, **EKS**, **Lambda**, **Code Pipeline**, **DynamoDB**, **Amazon Bedrock**, serving 1000+ users.

Blog Platform with Security

Jan 2024

- Developed full-stack **blog platform** using **React**, **JavaScript**, **Spring Boot**, **Hibernate**, **Spring Security**, **JWT**, **PostgreSQL**, **Docker** and **REST APIs**, improving secure content management by **30%**.

Student Survey Application

Apr 2023

- Built a **full-stack survey management system** using **Angular**, **TypeScript**, **Spring Boot**, **MySQL (RDS)**, **Tailwind**, and **AWS**, handling **500+ survey responses** with responsive UI, REST APIs, and cloud deployment.

Human Activity Recognition

Dec 2020

- Implemented a **smartwatch-based Human Activity Recognition system** using **accelerometer data**, **GPS**, **SVM**, **Random Forest**, and **ANN**, achieving **95% classification accuracy** for daily physical activities.

Twitter Sentiment Analysis

May 2020

- Developed an **NLP-based sentiment analysis model** using **Python**, **scikit-learn**, and **NLTK** to classify tweets as racist/sexist vs. neutral, achieving **94% accuracy** and enhancing social media text analytics.

TECHNICAL SKILLS

Programming Languages and Databases: Java, C/C++, Python, JavaScript, Data Structures, MYSQL, MongoDB.

Cloud Technologies/Containerization: AWS (S3, EC2, Lambda, RDS), Microsoft Azure, Kubernetes, Docker.

Web Technologies: HTML, CSS, JavaScript, Typescript, Bootstrap, React JS, Tailwind, Spring Boot, Node.js, Junit, Mockito.

Tools/Frameworks: Selenium, Cucumber, MySQL, PostgreSQL, Git, VS Code, Postman, IntelliJ, Eclipse.

Web Services and Data Formats: SOAP, REST, XML, JSON.

Operating Systems, Networking: Linux, Windows, TCP/IP, DNS, HTTP/HTTPS.
