

STEVEN VALDEZ

Senior Full Stack Developer

San Antonio, TX 78245 | stevenvaldez010@gmail.com | +1 510 833 6981

SUMMARY

Results-oriented **Senior Full stack Developer** with 9 years of experience in employing **.Net, Angular, React, Java Spring Boot, to build scalable systems for E-Commerce and SaaS**. Experienced in creating **microservices**, reliable **RESTful APIs**, and responsive user interfaces while putting user engagement and performance first. Capable of **putting CI/CD pipelines, automated testing, and DevOps principles into practice to guarantee excellent code quality**. Strong in database optimisation, data visualization, and system integration. a demonstrated leader who mentors junior engineers in cross-functional teams and promotes agile approaches.

SKILLS

- **Languages:** C#, JavaScript, Typescript, PHP, C++, Python, Scala, Java, Ruby
- **Frameworks:** ASP.Net, .NET Core, .NET nuke, Blazor, VB.NET, React, Next.js, Node.js, Express, Nest.js, Django, Flask, Angular, Vue.js, Nuxt.js, Laravel, JSP, GraphQL, FastAPI, React Native, Swift, Ionic, Flutter
- **DevOps:** Git, Docker, Nginx, Jenkins, Firebase, Kafka, Apache, SVN, TFS, Github, Bitbucket, Gitlab
- **Testing:** Jest, Cypress, Pytest, Enzyme, Mocha, Unittest, Playwright, Selenium
- **Cloud Services:** Azure, GCP, AWS
- **Web Services:** REST, SOAP, Web API, WCF, Microservice, GraphQL
- **Databases:** MySQL, PostgreSQL, MongoDB, Cassandra, Oracle, Redis, Microsoft SQL, RabbitMQ, Elasticsearch
- **Others:** Entity, LINQ, Hadoop, Snowflake, Redshift, Ansible, Terraform, WebRTC, WebSocket, Docker, GA, GTM, Umbraco, Sitecore, Contentful, Web Accessibility, SEO, WCAG 2.0, IIS, Team City, AEM, HubSpot, Scrum, SOA, Sass, Ajax, Kubernetes, Jira, Clickup, Asana, Swagger, Figma, Adobe XD, MVC, MVVM, SDLC, LESS, jQuery, Jenkins, CircleCI, GitlabCI, Vercel, JSON, YAML, PyTorch, DevOps, Crystal Reports, Wireframing, SOAP, WCF, Mongoose, Octopus, SSO, SSIS, SAML, Visual Studio, Visual Code, Oauth, Open ID Connect, Microsoft Dynamics, WEB API, Jira/Confluence, WordPress, JMeter

WORK EXPERIENCE

LCG, Inc

Senior Full Stack Developer

Rockville, MD

SEPTEMBER 2021 – Present

- Developed an online eCommerce and SaaS platform with 10,000 active users monthly using Angular, NgRX, RxJS for the frontend, and C#, ASP.NET MVC, .NET Nuke, and PostgreSQL for the backend.
- Created UIs with **React 18+, Redux, HTML5, CSS3, TypeScript, and Bootstrap**, and built real estate and e-commerce platforms using Vue.js, Vuetify, Pinia, and Tailwind.

- Utilized LINQ and Entity Framework for data exchange in N-tier applications and implemented **ASP.NET MVC routing** and bundling for improved performance.
- Engineered Spring Boot microservices and worked with MVC architecture, Hibernate, and JSP to facilitate message processing in clustered environments.
- Designed UI solutions using Blazor's Razor syntax, integrating .NET backend and frontend, while implementing Epserver for comprehensive digital experiences.
- Integrated **CRM, ERP, and payment gateways**, delivering omnichannel solutions across web and mobile platforms, and developed hybrid Blazor **WebAssembly/Server apps with .NET MAUI**.
- Employed TDD practices with Jest, Selenium, and NUnit for automated testing, and integrated Apollo GraphQL Server to enhance API capabilities within **.NET Core**.
- Led compliance audits for web properties with Section 508 and WCAG 2.0 Level AA standards, integrating RESTful APIs and managing diverse data storage systems.
- Automated deployments with **Ansible, Terraform, and Kubernetes**, and maintained data pipelines using **Azure Data Factory and Azure PaaS services**.
- Configured Nginx and Apache Tomcat for web applications, implemented serverless architecture on AWS, and utilized GCP services for scalable cloud solutions.
- Worked with Kafka to set up clusters, manage message processing, and utilized **Spring Kafka** for seamless integration with .NET and SQL-based microservices.
- Managed CI/CD pipelines with Jenkins, CircleCI, and GitLab Actions, led transitions to Docker and Kubernetes for containerized applications, and mentored junior developers through the software development lifecycle.

TECHNICAL ASSENT
Full Stack Developer

Arlington, VA
AUGUST 2018 - AUGUST 2021

- Developed a responsive education web application using **ASP.NET, React, Next.js, and React Native**, focusing on user engagement and accessibility.
- Created a real-time trading application with **ASP.NET, C#, SQL Server, Vue 2, Nuxt 2, Vuex, and Vuetify**, enhancing performance and user experience.
- Engineered server-side rendering (SSR) with Angular Universal for a healthcare project, integrating FHIR APIs to standardize data across multiple applications.
- Optimized legacy applications using ColdFusion for seamless integration with .NET systems and FHIR interfaces, extending their lifecycle.
- Designed **ETL** pipelines and utilized **GraphQL** to streamline data transformations, reducing API requests by 30% across five projects.
- Integrated databases such as **MongoDB, Cassandra, PostgreSQL, and Cosmos DB** to enhance data storage and retrieval for healthcare transactions.
- Implemented CI/CD pipelines with **Jenkins, CircleCI, GitHub, and GitLab** actions to automate deployment processes.
- Built infrastructure using various database systems and technologies like RabbitMQ and Redis, employing data visualization tools like D3.js and Tableau.
- Managed **AWS services (Aurora, EC2, S3, DynamoDB)** and **Azure services (Data Factory, App Services)** for cloud deployment and data pipeline maintenance.
- Fostered a DevOps culture through collaboration with development, QA, and operations teams, while conducting code reviews and promoting best practices.

- Developed E-Commerce applications using **Python (Django, Flask) and Vue.js**, participated in real estate projects with **C#, ASP.NET, and React.js**, and contributed to healthcare apps using Java Spring Boot and Angular, as well as restaurant apps utilizing the **MERN** stack.
- Built high-performance APIs with **Python FastAPI** to efficiently handle large volumes of requests.
- Leveraged big data technologies, including Apache Spark, Hadoop, and Flink, for data processing and integrated with **TensorFlow** and **PyTorch** models.
- Employed Vertex AI and Generative AI for enhanced data visualization and reporting, while revamping contact center infrastructure and applying Regex for data validation.
- Created Power BI reports using **Tabular SSAS models** as data sources.
- Specialized in network automation with Ansible, managed cloud infrastructure with Terraform, and scaled containerized applications using **Docker and Kubernetes**.
- Developed efficient SQL queries for **MySQL, Microsoft SQL, and PostgreSQL**, achieving a 25% reduction in query response times, while working with message brokers like RabbitMQ, MQTT, and Redis.
- Configured **AWS services, including EC2, S3, DynamoDB, and RDS**, managing deployment through tools like **DMS, Glue Catalog, and Athena**.
- Assisted in deploying applications on GCP, gaining experience with various GCP services.

EDUCATION

THE UNIVERSITY OF TEXAS AT SAN ANTONIO

Bachelor of Science in Computer Science

San Antonio, TX

2011-2015
