Professional Summary

Accomplished software professional with over 10 years of experience in data extraction, data processing and data loading. Expertise in developing and managing enterprise-level applications on large-scale distributed systems. Proficient in a variety of technologies including Snowflake, Teradata, AWS, Oracle, Python.

- **Extensive experience with Snowflake and Teradata Database:**
 - Developed and optimized complex data pipelines and ETL processes using Snowflake's and Teradata advanced features.
 - Expertise in D2P (Development to Production) implementation of various projects including requirement gathering, designing, development, coding, implementation .
 - Designed and managed scalable Teradata and Snowflake data warehouses, improving data accessibility and performance.
- **Migration and Optimization:**
 - Led the seamless migration of Teradata data onprem warehouses to Snowflake, utilizing AWS services such as S3, SNS, SQS, Lambda, and CloudWatch to ensure minimal downtime and smooth data transfer.
 - Automated data transformation and orchestration using **AWS Lambda**, enhancing efficiency and reducing manual intervention during migration.
 - Achieved significant performance optimization in data processing and query execution on Snowflake.
 - Realized substantial cloud storage cost savings through effective use of Snowflake's data compression and tiered storage options.

Core Competencies

- Data Warehousing, Data Pipeline Development & ETL
- Cloud Platforms (AWS)
- Big Data Cloud Technologies (Snowflake)
- BI Tools (Tableau, ThoughtSpot)
- Programming Languages (Python, SQL)
- SDLC Management

Technical Skills

- **RDBMS/DBMS:** Snowflake, Teradata, Oracle, SQL Server, Postgres
- **Languages:** SQL, PL/SQL, Python
- **Scripting:** Unix Shell scripting, Python
- **Cloud Platforms:** AWS
- **ETL Tools:** Informatica
- **Big Data Tools:** Kafka, Airflow, Autosys
- **Operating Systems:** MAC OS, UNIX, Windows

Professional Experience

CBA India Pvt Ltd.

Sinor Data Engineer

Client: Commonwealth Bank

Jan 2023 – Present

- **Techno-Functional Analyst:** Acted as a key liaison between technical teams and business stakeholders, translating complex business requirements into robust technical solutions.
- **Cross-functional Collaboration:** Coordinated with cross-functional teams including data scientists, analysts, and business stakeholders to align data strategies with business goals.
- **AWS Aurora PostgreSQL and S3 for Data Transformation and Loading:** Designed and implemented a data pipeline to efficiently load data from Amazon S3 into AWS Aurora PostgreSQL. Utilized SQL queries and AWS services to transform raw data into structured formats for analytical purposes. Automated data ingestion processes for real-time or batch updates, improving operational efficiency.
- **ETL Process Improvement:** Extensively worked in data extraction, transformation and loading as per Business Intelligence reporting requirements. Streamlined ETL processes, reducing data processing times by 30% through automation and optimization techniques.
- **Performance Tuning:** Conducted performance tuning of complex SQL queries, improving query response times by 40%.
- **Data Quality Assurance:** Implemented rigorous data validation and quality assurance processes.

ITC Infotech

Lead Consultant

Client: Fidelity Investments

May 2021 – Jan 2023

- **Snowflake Data Warehouse Development & Event-Driven Data Ingestion with AWS:** Developed and managed Snowflake data warehouses for structured and unstructured data storage. Designed and implemented an event-driven data ingestion pipeline using AWS resources to automate data transfer. Created Lambda functions to load data from AWS S3 into Snowflake's landing tables, ensuring seamless and automated data processing.
- **Data Migration :** Led data migration from on-premises systems to Snowflake, ensuring smooth and efficient transition of large-scale datasets to the cloud. Worked with **Individual, Account, and Household** subject areas in Snowflake CWE, managing data for individuals, businesses, and legal entities interacting with Fidelity. Integrated customer account data, enabling investment and asset management. Built dynamic marketing households combining prospects, customers, and accounts for targeted campaigns. Developed and maintained efficient data models to support analytics and business intelligence for Fidelity's retail operations.

Capgemini

Sinor Consultant

Client: Nordea Bank

Sep 2018 – May 2021

- **Teradata Development:** Developed and optimized Teradata codes, ensuring high efficiency and performance in data processing. Analysed requirements as per the CDW architecture flow till SBSL(Shared business semantic layer).
- **Data Modeling:** Designed and implemented data models and database structures to support business intelligence and reporting needs.
- **Data Migration:** Led data migration projects to Snowflake cloud data platform, ensuring seamless transition and minimal downtime during the migration of large data sets.
- **Client Relationship Management:** Maintained strong client relationships, ensuring satisfaction and identifying opportunities for additional services.
- **Technical Documentation:** Created comprehensive technical documentation to support ongoing maintenance and knowledge transfer.

- **Teradata Development:** Designed and developed Teradata codes to support Apple Care's performance analysis, optimizing data processing workflows.
- **SQL Performance Tuning:** Improved the performance of SQL queries through rigorous tuning, reducing execution times and enhancing system efficiency.
- **Reporting Solutions:** Developed robust reporting solutions using Teradata and SQL, providing actionable insights for Apple Care's operational performance.
- **Data Validation and Support:** Ensured the accuracy and reliability of data through comprehensive validation processes and provided ongoing production support.
- **Automation:** Automated various data processing tasks using Ksh and Autosys, improving overall operational efficiency.
- **Technical Documentation:** Created detailed technical documentation for developed solutions to facilitate knowledge transfer and support maintenance.

Education

Bachelor of Engineering in Computer Science from Visvesvaraya Technological University, India.
