Trailblazer: trailblazer.me/id/salskan

- Certified Salesforce Administrator and Developer with 3+ years of experience creating and optimizing Salesforce CRM systems to enhance productivity, ensure data accuracy, and streamline business processes. Proficient in **Apex, Lightning Web Components (LWC), Flows, REST APIs, SOQL/SOSL**, and automation tools, with hands-on expertise in **Salesforce Communities, Unit Testing with Apex, SOQL Query Optimization, and Security & Access Management**. Skilled in integrating external systems, configuring custom objects, and implementing security protocols to drive scalable and efficient solutions. Passionate about leveraging Salesforce to deliver business value, I excel in **Agile environments**, collaborating cross-functionally to innovate and optimize CRM ecosystems.

Technical Skills

-
- Salesforce: Apex, Lightning Web Components (LWC), SOQL, SOSL, Flows, Process Builder, Validation Rules, Reports & Dashboards
 - Automation: Automated email responses and campaign notifications
 - Data Processing: Data Loader for seamless migration of largest datasets, SmartyStreets for address validation to ensure data accuracy
 - Integration: REST API, SOAP API for seamless third-party system integrations
 - Tools & Methods: VSCode, Jira, GitHub, Agile Methodology
-

Experience

Lightship / Salesforce Developer

December 2023 - December 2024, Remote

- Replaced legacy DLRS processes with Apex Triggers to automate Opportunity updates, improving task count and score accuracy by 30-40%.
- Configured Salesforce Person Accounts and developed a Campaign Management Lightning App, streamlining Campaign tracking and engagement.
- Designed automation flows for real-time email alerts on communication.
- Developed data-driven dashboards and reports for campaign tracking, enabling more informed decision-making.
- Built and deployed custom LWCs, including a Top Contributors component,

to enhance user engagement on Salesforce portals.
- Integrated Salesforce with external systems using REST APIs, ensuring real-time data synchronization and process efficiency.

Marriott Hotel / Salesforce Administrator Developer

September 2020 - December 2022, Remote

—
Experience

- Developed Lightning Components, optimizing operational efficiency by 30%.
- Implemented automated email notifications during campaign periods, improving customer engagement.
- Created Apex triggers to enforce single reservation entries, reducing errors.
- Integrated SmartyStreets for address validation, achieving 95% data accuracy.
- Migrated over 50,000 records using Data Loader, ensuring data consistency.
- Automated booking confirmation emails and post-stay surveys, ensuring timely communication and improving customer satisfaction rates by 15%.
- Created a custom dashboard to monitor hotel occupancy, revenue trends, and profitability over 5-10 years, enabling data-driven strategies.
- Implemented rules to enforce one booking per guest per session, reducing double bookings and unnecessary data by 20%.
- Designed advanced Lightning Flows to optimize reservation workflows, increasing operational efficiency by 25%.
- Developed and deployed a reporting system to analyze occupancy rates, peak seasons, and revenue, providing actionable insights for management.

Horizon Coal / Sales Representative

2010 - 2015, Turkey

- Sales Representative, focusing on customer relationship management and sales strategy.
- Provided recommendations for product and pricing strategies based on market trends
