PROFESSIONAL EXPERIENCE

Wells Fargo

Jul 2024 - Present

Workday Consultant

NJ

- Configured and optimized Workday HCM modules, including a strong focus on Compensation and Benefits to support HR operations and policy compliance.
- Led Workday integrations using EIBs and Core Connectors, reducing data errors by 50% and enhancing system interoperability.
- Built custom dashboards and reports with Prism and Calculated Fields to empower leadership with actionable HR insights.
- Designed and automated HR workflows for onboarding, offboarding, and talent review, reducing manual efforts and accelerating approval cycles.
- Managed the full data conversion lifecycle, ensuring complete data accuracy and adherence to regulatory standards.
- Provided comprehensive post-go-live support by resolving configuration and integration issues while optimizing security roles.
- Developed tailored integration solutions for third-party vendors, enhancing system compatibility and decreasing manual data entry by 50%.
- Implemented advanced Workday security protocols to ensure data privacy compliance and protect sensitive employee information.
- Developed and maintained Workday reports to monitor key HR metrics such as employee turnover, headcount, and performance trends to facilitate informed decision-making.
- Trained and mentored HR and IT teams on Workday best practices to drive improved adoption and effective utilization of system features.
- Optimized Workday Compensation and Benefits configurations by aligning them with regulatory requirements and streamlining compensation cycles.
- Facilitated cross-functional workshops to gather business requirements, ensuring Workday projects aligned with broader organizational goals.
- Monitored system performance and user feedback, implementing enhancements to improve overall user experience and streamline HR operations.
- Developed automated workflows to trigger notifications and approvals, expediting internal processes and reducing delays.
- Collaborated with HR and IT teams during system changes and releases, ensuring alignment with business requirements and mitigating future risks.
- Conducted comprehensive end-user testing to ensure strategic objectives were met and promptly addressed any system issues.
- Managed system security configurations to uphold system functionality and ensure compliance with data privacy regulations.
- Proactively identified and implemented process improvements, enhancing operational efficiencies and reducing manual interventions.

IBM

Feb 2021 - Nov 2022

Workday HCM Consultant

India

- Identified upstream and downstream systems, gathering documentation to initiate technical designs for Workday Studio integrations.
- Participated in the Workday data conversion lifecycle, including DGWs, unit testing, end-to-end testing, and dashboard development.
- Developed standard and custom reports using Report Writer, integrating security-enabled reports and segment groups for Benefits and Payroll.
- Built matrix reports to support Compensation, Benefits, Payroll, HRIS, and Finance teams.
- Delivered comprehensive HCM reports covering headcount, salary ranges, tax deductions, benefit plans, and work hours.
- Tested HCM, Time Tracking, and Absence business processes, including validation rules and calculated fields.
- Configured benefit plans, groups, and eligibility/enrollment rules based on client requirements, ensuring streamlined open enrollment and compliance.
- Built and deployed integrations using EIB, Document Transformation, and Core Connectors within the Workday tenant.

- Resolved Tier 2 HCM queries by researching system behavior and coordinating with HR Services.
- Analyzed HR/Payroll requirements through client workshops while providing day-to-day support on HCM, Security, Compensation, and Reporting issues.
- Supported Talent and Performance Calibration processes to ensure fair evaluations and identify top talent across the organization.
- Worked on BIRT layouts and packaged integrations, including Core and Cloud Connectors.
- Implemented Workday security roles and collaborated with SMEs to assign roles across HCM, Finance, and SCM.

DXC

Sep 2018 - Dec 2020

Workday HCM Consultant

India

- Analyzed and streamlined Workday HR workflows to enhance efficiency and ensure policy compliance.
- Configured Time Tracking and Absence modules to automate attendance and leave management processes.
- Created over 20 custom reports and dashboards to visualize real-time workforce metrics for improved decision-making.
- Automated business process workflows to reduce HR effort and elevate the employee experience.
- Conducted data audits to maintain Workday accuracy and system integrity.
- Integrated Workday with external systems to improve data consistency and operational flow.
- Built calculated fields to support advanced HR reporting and leadership analytics.
- Enhanced onboarding processes by customizing Workday business processes to match organizational requirements.
- Established robust Workday security roles to ensure internal control and data privacy compliance.
- Supported Workday updates and tested new releases, ensuring a seamless adoption process.
- Trained HR teams on Workday features, driving increased system adoption and self-sufficiency.
- Deployed self-service tools to boost employee engagement and reduce support tickets by 30%.
