

SVITLANA PASTUKH

Senior Test Automation Engineer

872-314-9691 • svitlanapastukh096@gmail.com • <https://www.linkedin.com/in/svitlana-pastukh-29a3ba199/> • Hamden, CT

Summary

A highly motivated employee with a desire to take on new challenges. Adept at quickly mastering new skills. Most of my work has been in Automation, but also, I have an extensive background in Manual Testing. Knowledge of OOP, and experience with testing API, Web, and Desktop applications. Understanding of software testing concepts and methodologies, including TDD, BDD, test case design, test execution, defect tracking, and reporting. Attention to detail and strong organizational skills. Result-oriented team player with experience in conducting knowledge transfers to new teammates. Ability to work effectively in a team environment and collaborate with cross-functional teams.

Experience

Healthcare.com	Connecticut, United States
QA Automation Engineer	09/2024 - Present
Developed and implemented a Behavior-Driven Development (BDD) framework using TypeScript, Cucumber, Playwright, and Axios to support robust integration testing across web applications and APIs.	

Healthcare.com	Connecticut, United States
QA Automation Engineer	09/2023 - 09/2024
- Project: AccuQuote - Insurance Producer - Established an automation process to enhance testing efficiency. - Created a Test Strategy document. - Developed a BDD automated test framework using Python, Selenium, Behave, and Allure. - Automated the manual regression and smoke test suites. - Mentored the QA team on the automation process and guided them in creating feature files. - Created comprehensive test cases for UI, API, and database testing. - Managed continuous integration using CircleCI.	

EPAM Systems	Ukraine
Software Engineering in Test	11/2021 - 07/2023
Developed, updated, and supported a framework for embedded testing. Worked closely with developers and product owners to understand requirements. Participated in Agile ceremonies such as sprint planning, daily standups, and sprint reviews. Developed integration and API tests. Created and updated tests, investigated failed automation tests, requirement analysis, and code review, and contribute to the CI process. - Develop a framework for embedded testing. - Develop integration/API tests. - Create, maintain, and update tests. - Investigation of the cause of failing automation tests. - Requirement analysis. - Code review. - Make a contribution to the CI process.	

UTECH	Ternopil, Ukraine
Automation QA Engineer at UTECH	10/2020 - 11/2021
Project: USA Transport management system, desktop application. - Created GUI automation tests for desktop application. - Participated in Agile ceremonies such as sprint planning, daily standups, and sprint reviews. - Experience in implementing TDD methodologies to design and develop test cases and ensure test coverage. - Development and maintenance of automation framework based on Squish Framework (Python) - Writing and supporting UI automation tests - Covering new functionality with automated tests - Manual QA activities (checklists, test cases), bug reporting and tracking, Regression testing, Sanity testing. - Code review - CI - Jenkins	

Experience

UTECH

Ternopil, Ukraine

Automation Quality Assurance Engineer

12/2019 - 10/2020

Project: USA Transport management system, Web application

Writing and supporting UI and API automation tests by using Selenium, Java programming language, and the JUnit framework. Participated in Agile ceremonies such as sprint planning, daily standups, and sprint reviews.

- Precise review of software functional requirements, specification, and design documents assessed an impact on the software and formulated test procedures
- Test Case creation
- Test Cases execution using various browsers
- Manual QA activities (checklists, test cases), bug reporting and tracking, Regression testing, and Sanity testing
- Document and analyze defects
- Test Report creation

ELEKS

Ukraine

Software Quality Assurance Intern

10/2019 - 12/2019

- Analyzation and correction of the requirements.
- Implementation and maintenance of test cases.
- Building of state transition diagrams.
- Learning of quality assurance best practices.
