

Swathi

Email: swathir2k25@gmail.com

Ph#: 470-851-6879

Professional Summary:

- Over **5+ years** of professional experience as a **Python Developer** and experience in Design, Development, Implementation of **Python, Django** and client - server technologies-based applications, **RESTful** and **AWS**
- Proficient in all phases of **software development life cycle (SDLC)** including requirement analysis, Debugging, Design, Development, Integration, Maintenance, Testing of **Python web applications**.
- Experience in developing Web-Applications implementing **Model View Control (MVC)** architecture using **Python, Django** web application frameworks.
- Experience in using design patterns such as **MVC**, singleton and frameworks such as **DJANGO**, ability in handling **Django ORM** (Object-Relational Mapper) and **SQLAlchemy**.
- Experience in performing dynamic **UI** designing with **HTML5, CSS3, Bootstrap JS, JavaScript, JQuery, JSON and AJAX**.
- Excellent Experience on various **Python** integrated **IDE's** such as **Sublime Text, PyCharm, Eclipse and NetBeans**.
- Experience with **Requests, Numpy, Scipy, Matplotlib, and Pandas** python libraries during development lifecycle. Maintain **Restful API's** and also consume the API's client side using **Angular.JS** data binding.
- Experience in **Amazon Web Services (AWS)** cloud platform like **EC2, Virtual private clouds (VPCs)**, Storage models (**EBS, S3**, instance storage), **Elastic Load Balancers (ELBs)**.
- Experienced in requirement gathering, Use case development, Business Process flow, Business Process Modeling: extensively used **UML** to develop various use cases, class diagrams and sequence diagrams.
- Experience in analyzing the **SQL** scripts and designed solutions to implement using **pyspark** . Created custom new columns depending up on the use case while ingesting the data using **pyspark**.
- Experience in **Python** OOD code for quality, logging, monitoring, and debugging code optimization.
- Experienced in developing web services with **Python** programming language – implementing **JSON** based **RESTful** and **XML** based **SOAP** webservice.
- Experienced in implementing **Object Oriented Python**, **Hash Tables (Dictionaries)** and **Multithreading, Django, MYSQL, Exception Handling** and **Collections** using **Python**.
- Experienced in **Agile** Methodologies, **Scrum** stories and sprints experience in a **Python** based environment, along with **data analytics, data wrangling** and **Excel data extracts**.
- Excellent interpersonal and communication skills, efficient time management and organization skills, ability to handle multiple tasks and work well in team environment.

Technical Skills:

Languages	Python 3.x/2.7, Java, Shell Script, SQL, PySpark
Python Framework	Django, Webapp2, Flask
Python Libraries	NumPy, MatPlotLib, Pandas,Scipy
IDE's	Eclipse, Pydev, PyCharm, Spyder
Web Technologies	AJAX, JavaScript, HTML5, CSS3, XML, JQuery
Versioning Tools	Subversion, GIT, SVN, CVS
Web servers	AWS, WebLogic, WebSphere
Databases	MySQL, SQL Server, Oracle
Operating systems	Linux/Unix, Windows Variants

Professional Experience:

Client: Jefferson Bank, San Antonio, TX.

Duration: Mar 2024 – Till Date

Role: Python Developer

Responsibilities:

- Responsible for gathering requirements, system analysis, design, development, testing, deployment and Implementation of various stand-alone, client-server enterprise applications.
- Responsible for analyzing various cross-functional, multi-platform applications systems enforcing **Python** best practices and provide guidance in making long term architectural design decisions.

- Designed, developed, and deployed engaging web applications using **Python**.
- Developed web applications in **Django** Framework's **model view control (MVC)** architecture.
- Developed and tested many features for dashboard using **Python, Django and JavaScript**.
- Implemented responsive user interface and standards throughout the development and maintenance of the website using the **HTML5, CSS3, JavaScript, Bootstrap, JQuery**.
- **Angular.JS** is used to build efficient backend for client web application.
- Worked on changes to open stack and **AWS** to accommodate large scale data center deployment.
- Used **Python** based **GUI** components for the front-end functionality such as selection criteria.
- Clean data and processed third party spending data into maneuverable deliverables within specific format with Excel macros and python libraries such as **NumPy, SQLAlchemy and Matplotlib**.
- Used **PyQt** for the functionality filtering of columns helping customers to effectively view their transactions and statements.
- Implemented navigation rules for the application and page outcomes, written controllers using annotations.
- Created **PyUnit** test scripts and used for unit testing.
- Used **PySpark** to expose Spark API to **Python**.
- Extensively performed large data read/writes to and from csv and excel files using **pandas**.
- Configured the Django admin site, dashboard and created a custom Django dashboard for end users with custom look and feel. Used **Django APIs** for database access.
- Using **Django** evolution and manual **SQL** modifications was able to modify Django models while retaining all data, while site was in production mode.
- Wrote **python** routines to log into the websites and fetch data for selected options.
- Wrote **Python** normalizations scripts to find duplicate data in different environments.
- Implemented **AJAX** for dynamic functionality of a webpages for front end applications.
- Used **JQuery** for selecting particular **DOM** elements when parsing **HTML**.
- Wrote scripts in **Python** for Extracting Data from **JSON** and **XML** files.
- Worked in an **agile** development environment.
- Excellent analytical and problem-solving skills and ability to work on own besides being valuable and contributing team player.

Environment: Python, Django, AWS, PyQt, PyUnit, PySpark, Numpy, Matplotlib, Pandas, AJAX, JQuery, JSON, DOM, XML, SQL, MVC, HTML5, CSS3, JavaScript, Angular.JS, Agile and Windows.

Client: CVS Health Care, Scottsdale, AZ.

Duration: Jan 2023 – Feb 2024

Role: Python Developer

Responsibilities:

- Participated in requirement gathering and analysis phase of the project in documenting the business requirements by conducting workshops/meetings with various business users.
- Designed and developed components using **Python**. Implemented code in **Python** to retrieve and manipulated data.
- Developed frontend and backend modules using **Python** on **Django** Web Framework with **GIT**.
- Designed and developed data management system using **MySQL**. Built application logic using **Python**.
- Developed automation scripts to test storage appliances in **Python**.
- Built application logic using **Python**.
- Development of **Python APIs** to dump the array structures in the Processor at the failure point for debugging.
- Created a **Python/Django** based web application using Python scripting for data processing, **MySQL** Workbench for the database, and **HTML5/CSS3/JQuery and HighCharts** for data visualization of the served pages.
- Developed **single page applications (SPAs)** using **Angular.JS** to improve page performance.
- Deployed and monitored scalable infrastructure on **Amazon web services (AWS)**.
- Generating various capacity planning reports (graphical) using **Python** packages like **Numpy, Matplotlib**.
- Provided **GUI** utilizing **PyQt** for the end user to create, modify and view reports based on client data.
- Used Test driven approach for developing the application and Implemented the unit tests using **Python Unit test framework**.
- Worked on **Python Openstack API's** used **Python** scripts to update content in the database and manipulate files.
- Used **GitHub** for version control.
- Involved in implementing customer data collection with **PySpark**.

- Used **Python** and **Pandas library**, built data analysis graph for documentation and record.
- Used **Python** and **Django** to interface with the **JQuery UI** and manage the storage and deletion of content.
- Involved in adding **AJAX, JavaScript** components to some of the JSP pages wherever needed.
- Used **JSON** for data exchange between application modules along with **XML**.
- Wrote and executed various **MYSQL** Workbench database queries from Python using **Python-MYSQL** connector and **MySQL db** package
- Performed efficient delivery of code based on principles of **Test Driven Development (TDD)** and continuous integration to keep in line with **Agile** Software Methodology principles.
- Utilized **Agile** process and **JIRA** issue management to track sprint cycles.
- Interfacing with supervisors, artists, systems administrators and production to ensure production deadlines are met.

Environment: Python, Django, MVC, AWS, PyQt, PyUnit, PySpark, Numpy, Matplotlib, Pandas, AJAX, JQuery, JSON, DOM, XML, GIT, HTML5, CSS3, JavaScript, Angular.JS, My-SQL, Agile and Windows.

Company: iConcept Software Services Pvt. Ltd., India.

Duration: Mar 2020 – Dec 2022

Role: Python Developer

Responsibilities:

- Gathered and analyzed the requirements and converted them into User Requirement Specifications and Functional Requirement Specifications for the designers and developers to understand them as per their perspective.
- Involved in **system design (Python Object Oriented Design)** approach, developing various modules/packages/utilities, Ex: Cryptography-Encryption/Hashing, Foundation Utilities, Persona management, error/exception management etc.)
- Involved in representation of the system in hierarchy form by defining the components, subcomponents using **Python** and developed set of library functions over the system based on the user needs.
- Developed **Python** batch processors to consume and produce various feeds.
- Developed the tools using **Python Django** and used **MongoDB** for databases. Parsers written in **Python** for extracting useful data from the design data base.
- Involved in development of data structures, **XML** parsing using **Python**.
- Used **Python** based GUI components for the front end functionality such as selection criteria.
- Developed **Python based API** (RESTful Web Services) to track the events and perform analysis using **Django**.
- Developed server-based web traffic statistical analysis tool using **Pandas**.
- Used **Django** configuration to manage **URLs** and application parameters.
- Used **PyQuery** for selecting Particular **DOM** elements when reading **HTML**.
- Used **Python's pandas** and **matplotlib** libraries to conduct data exploration and Developed **GUI** using **HTML5, AJAX, CSS3, JavaScript** and **JQuery**.
- Developed efficient **Angular.JS** for client web based application.
- Implemented **AWS** solutions using E2C, S3, RDS, EBS, Elastic Load Balancer, and Auto scaling groups, Optimized volumes and EC2 instances.
- Used several **Python** libraries like **NumPy, Pandas** and **Matplotlib**.
- Parsers written in **Python** for extracting useful data from the design data base.
- Involved in **Python OOP** code for quality, logging, monitoring, and debugging code optimization.
- Wrote **Python code** embedded with **JSON and XML** to produce **HTTP GET request**, parsing **HTML** data from websites.
- Implemented **AJAX** to update necessary section of webpages and hence, avoiding the need for reloading the entire web page.
- Involved in writing indexes, views, constraints, stored procedures, triggers, cursors and user defined functions or subroutines in **MySQL**.
- Used decorators, list comprehensions, functional programming, unit tests, multiple staging environments, and global team remote collaboration.

Environment: Python, Django, MongoDB, XML, DOM, AWS, Numpy, Pandas, Matplotlib, AJAX, HTML5, CSS3, JavaScript, Angular.JS, JQuery, JSON, MySQL and Windows.
