

Talia Hatfield: Front-End Web Developer in Tampa, FL

talia.j.degisi@gmail.com • www.taliadegisi.com • GitHub: talia-storymaker • (913) 575-3668

I'm keenly aware of good practices in maintainable code, UX, design, and accessibility. I quickly learn new skills, frameworks, and languages. I'm self-driven but work well in teams, usually using Agile (Scrum or Scrum-influenced).

Skills

- HTML5 & CSS3 (Flexbox & Grid)
- Sass/SCSS
- Pixel-perfect design-to-code (Figma, etc.)
- Responsive web design
- JavaScript
- TypeScript
- React.js
- Next.js
- Vue.js
- Unit tests (Jest & Testing Library)
- Tailwind CSS
- WordPress
- AEM
- Git (with GitHub & GitLab)
- Adobe Photoshop & Illustrator
- SEO
- Accessibility
- SQL (MySQL)
- GraphQL
- PHP

Experience

Web Developer for Minnesota Public Radio (MPR)

March 2023 – August 2025

- Contributed to development, redesigns, and maintenance of Next.js (a React.js framework) websites, improving the sites' visual appeal, usability, and features. These sites represent major brands like MPR News and Marketplace and have millions of combined users.
 - Wrote UI functionality in TypeScript (and sometimes JavaScript) with React, utilizing data from our CMS's GraphQL database. This involved creating functional components, using React Hooks, integrating libraries from NPM (via Yarn), fixing bugs, and implementing SEO improvements.
 - Implemented Figma-based visual designs using CSS (sometimes Tailwind CSS) with high attention to detail and a focus on responsive web design across devices and browsers. This included adding my own design enhancements (e.g. accounting for more screen sizes).
 - Wrote unit tests using Jest and React Testing Library, and conducted and received code reviews.
 - Made and often implemented accessibility recommendations based on WCAG standards, best practices, and my own screen reader testing.
 - Made graphic & SVG updates with Adobe Photoshop and Adobe Illustrator.
- Did development tasks for Ruby on Rails sites and their SCSS (Sass) styles.

Technology Specialist for VMLY&R (as a contractor via ECCO Select)

January 2022 – December 2022

- Participated in T-Mobile site redesign, focused on increasing loading speeds, by developing Adobe Experience Manager (AEM) components.
 - Developed the front-end and implemented visual designs using HTL (HTML template language), SCSS (Sass), TypeScript, & Alpine.js (a lightweight framework), and used Java to integrate with AEM.
 - Wrote unit tests for the components using Jest (TypeScript front-end) and JUnit (Java back-end), and conducted and received code reviews.

Junior Software Developer for MoodSpark

August 2020 – September 2021

- Developed UI for Android & iOS apps using NativeScript-Vue (a Vue.js framework for native apps), SCSS, Kotlin, and Jetpack Compose, and integrated the UI with data from RESTful APIs.
- Designed and developed the company website using WordPress and CSS.

Additional Information

Additional Experience

Web Designer for real.leads, inc.

May 2018 – July 2020

- Designed and wrote CSS for WordPress website templates.
- Redesigned and wrote CSS for a client-facing web app, which included implementing Google's Material Design system. This greatly improved its visual appeal and user experience.
- Performed maintenance tasks and updates for WordPress websites.
- Wrote copy and blog posts.
- Handled DNS and domain changes.
- Communicated with customers about site changes and SEO.

Freelance Web Developer and Designer

2019–2020 (intermittent)

- Designed & developed a WordPress website with a custom child theme made using SCSS and Bootstrap.
- Performed maintenance tasks for WordPress websites.

Education

Johnson County Community College: A.A. Web Development & Digital Media

Graduated May 2018

The typeface used in this resume is Gravity by Vincenzo Vuono.
