SUMMARY

AWS Developer with 5+ years of hands-on experience designing and deploying scalable cloud-native solutions using AWS services. Proven expertise in Amazon Connect, Amazon Lex, and Amazon Pinpoint for building conversational AI, chatbots, and omnichannel communication workflows. Strong background in serverless architecture using AWS Lambda, API Gateway, DynamoDB, SQS, and SNS. Proficient in Python development, infrastructure as code using AWS CDK and CloudFormation, and integrating AWS services with third-party APIs. Experienced in delivering solutions for healthcare, public sector, and customer portal applications with focus on security, monitoring, and best practices.

TECHNICAL SKILLS

- **AWS Services:** Amazon Connect, Amazon Lex, Amazon Pinpoint, Lambda, API Gateway, DynamoDB, S3, SQS, SNS, Step Functions, CloudWatch, EventBridge
- **Programming Languages:** Python, JavaScript, Node.js, TypeScript, SQL, Bash/Shell Scripting
- **Infrastructure as Code:** AWS CDK, CloudFormation, Terraform, Serverless Framework
- **AWS Security & Networking:** IAM, VPC, Security Groups, KMS, Secrets Manager, WAF, Cognito
- **Databases:** DynamoDB, RDS (PostgreSQL, MySQL), Aurora, ElastiCache (Redis)
- **DevOps & Monitoring:** CloudWatch, X-Ray, CloudTrail, AWS CodePipeline, CodeBuild, CodeDeploy, Git, CI/CD
- **Integration & APIs:** REST APIs, GraphQL, WebSocket APIs, Third-party integrations, Twilio, SendGrid
- **Conversational AI:** Chatbot development, IVR workflows, Natural Language Processing, Intent recognition, Slot filling

PROFESSIONAL EXPERIENCE

- **Alpha Software Technology** Oct 2024 - Present
Austin, TX (Remote)
 - **Amazon Connect & Lex Implementation:** Designed and deployed omnichannel contact center solution using Amazon Connect and Lex, building conversational AI chatbots with intent recognition and context management serving 100K+ customer interactions monthly
 - **Amazon Pinpoint Integration:** Implemented multi-channel messaging campaigns using Amazon Pinpoint for SMS, email, and push notifications, integrating with Lambda and API Gateway to deliver personalized customer communications with 95%+ delivery rates
 - **Serverless Architecture:** Developed scalable backend services using Python, AWS Lambda, API Gateway, and DynamoDB, implementing event-driven workflows with SQS and SNS for asynchronous processing of 1M+ daily transactions
 - **Infrastructure as Code:** Built and maintained AWS infrastructure using CDK (Python), automating deployment of 50+ resources including VPCs, IAM roles, Lambda functions, and API endpoints with version-controlled templates
 - **Monitoring & Security:** Implemented comprehensive monitoring using CloudWatch dashboards, alarms, and X-Ray tracing, enforcing IAM best practices and VPC security controls achieving 99.9% uptime
- **Intuit** Jan 2024 - Sep 2024
Mountain View, CA (Remote)
 - **Chatbot Development:** Built intelligent chatbots using Amazon Lex for customer support automation, implementing slot fulfillment, validation, and fallback intents handling 50K+ conversations with 85% resolution rate
 - **API Development & Integration:** Developed RESTful APIs using API Gateway and Lambda (Python) for third-party integrations including payment processors and tax services, implementing OAuth 2.0 authentication and rate limiting
 - **Event-Driven Architecture:** Architected event-driven workflows using EventBridge, SQS, and Lambda for processing financial transactions, implementing dead-letter queues and retry logic for fault tolerance
 - **CloudFormation Automation:** Created CloudFormation templates for automated infrastructure provisioning, implementing CI/CD pipelines with CodePipeline and CodeBuild for continuous deployment across multiple environments
 - **Performance Optimization:** Optimized Lambda functions and DynamoDB queries reducing API response times by 60%, implementing caching strategies with ElastiCache and API Gateway caching
- **Cognizant** Dec 2022 - Dec 2023
Hyderabad, India (Remote)
 - **IVR & Voice Solutions:** Developed Interactive Voice Response systems using Amazon Connect contact flows, integrating with Lex for voice-enabled customer service supporting 200K+ monthly calls with self-service capabilities
 - **Messaging Services:** Built SMS and email notification systems using Amazon Pinpoint and SNS, creating templated campaigns with dynamic content and A/B testing capabilities for healthcare appointment reminders
 - **Serverless Applications:** Developed Python-based Lambda functions for data processing, validation, and transformation, integrating with Step Functions for complex workflow orchestration and error handling
 - **Database Design:** Designed and optimized DynamoDB tables with GSIs and LSIs for high-throughput applications, implementing single-table design patterns and on-demand scaling for variable workloads
 - **Third-Party Integration:** Integrated AWS services with external APIs including Twilio, SendGrid, and Stripe, implementing webhook handlers and event processing with proper authentication and error handling
- **Tech Mahindra** Aug 2019 - Nov 2022
Hyderabad, India
 - **AWS Lambda Development:** Developed serverless Python applications using Lambda and API Gateway, implementing RESTful endpoints for mobile and web applications serving 500K+ users with auto-scaling capabilities

- **Cloud Migration:** Migrated legacy applications to AWS cloud, leveraging S3 for storage, RDS for databases, and CloudFront for content delivery, reducing infrastructure costs by 40% while improving performance
- **Automation & Scripting:** Created Python automation scripts using Boto3 SDK for AWS resource management, backup automation, and monitoring tasks, reducing manual operations time by 70%
- **Security Implementation:** Implemented IAM policies, security groups, and encryption using KMS and Secrets Manager, ensuring compliance with security best practices and conducting regular security audits
- **Monitoring Solutions:** Configured CloudWatch metrics, logs, and alarms for application monitoring, creating custom dashboards and implementing automated alerting via SNS for proactive issue resolution
- **Omega Degree College (ODC)** May 2018 - Jul 2019
Junior Python Developer Hyderabad, India
 - **Python Application Development:** Developed Python-based data processing applications using Flask and Django frameworks, implementing RESTful APIs and database integration with PostgreSQL
 - **AWS Learning Projects:** Built proof-of-concept applications on AWS using EC2, S3, and RDS, gaining hands-on experience with cloud services and serverless computing
 - **API Testing & Documentation:** Created API testing scripts using Python requests library and Postman, documenting endpoints and integration workflows for development teams
 - **Version Control:** Utilized Git for version control and collaborative development, participating in code reviews and following agile development practices

EDUCATION

- **Christian Brothers University** Aug 2023 - May 2025
Master of Science, Computer Information Systems Memphis, TN
 - **Relevant Coursework:** Cloud Computing, Distributed Systems, Database Systems, Software Engineering, Machine Learning
 - **Academic Achievement:** Graduate Research Assistant, Dean's List (GPA: 3.40/4.0)
- **Omega Degree College** Aug 2016 - May 2019
Bachelor of Science, Computer Science Hyderabad, India
 - **Achievements:** University Gold Medalist, Outstanding Student in Software Engineering

PROJECTS

- **Healthcare Chatbot Platform:** Built HIPAA-compliant conversational AI platform using Amazon Lex and Connect, enabling patients to schedule appointments, access medical records, and receive automated health reminders with 90% accuracy
- **Customer Portal with Omnichannel Support:** Developed serverless customer portal using AWS Lambda, API Gateway, and DynamoDB, integrating Amazon Pinpoint for multi-channel notifications and Amazon Connect for voice support serving 250K+ users
- **Public Sector Notification System:** Created scalable notification system for government services using Amazon Pinpoint and SNS, delivering SMS and email alerts for public health emergencies and community updates with 99%+ delivery rate
- **IVR Workflow Automation:** Designed and implemented automated IVR workflows using Amazon Connect and Lex for utility services, reducing call center volume by 45% through self-service capabilities and intelligent routing

CERTIFICATIONS

- **AWS Certifications:** AWS Certified Solutions Architect - Associate, AWS Certified Developer - Associate, AWS Certified Cloud Practitioner
- **Specialized Training:** Amazon Connect Bootcamp, Amazon Lex Conversational AI Workshop, AWS Serverless Application Development
