Professional Summary

Database & Systems professional with ~10 years of experience designing, optimizing, and maintaining enterprise database and system solutions. Skilled in SQL database administration, system infrastructure, application integration, and full-stack development. Recognized for translating business requirements into high-performance database solutions, ensuring data integrity, security, and high availability. Proven ability to collaborate with front-end developers and business stakeholders to drive key initiatives and operational efficiency.

Core Competencies

- Relational Database Design & Management
 - SQL / PL/SQL (Procedures, Functions, Triggers, Materialized Views)
 - Performance Tuning, Indexing & Query Optimization
 - Database Security, Access Controls & Data Integrity
 - Requirements Gathering & Cross-Functional Collaboration
 - Application Integration & API Development
 - Full-Stack Development Support (front + back)
 - Team Leadership, Mentorship & Technical Support
-

Technical Skills

Databases/Platforms: SQL Server, MySQL, Microsoft Access, IBM AS/400

Languages/Development: Java, Python, C#, PHP, VB.Net, HTML, VueJS

Processes/Techniques: Data Migration, Integration, ETL, Stored Procedures, Functions, Triggers, Views

Systems/Infrastructure: Network Configuration, IT Security, Systems Management, Automation (Robotics/HMI)

Tools & Practices: API Development, Schedule Automation, Production-System Reliability, Workflow Optimization

Professional Experience

IT Manager | Phoenix Medical Products Inc. – Mountain City, TN

Jun 2015 – Sep 2025

- Designed, developed and maintained database and application solutions to support production planning, material inventory and resource scheduling across production lines.
- Led full-stack development of internal tools, coordinated requirements with business units and delivered high-impact solutions that increased throughput and reduced manual intervention.
- Administered systems including databases, servers, network infrastructure, security, robotics integration, HMI design and automation — ensuring high availability and operational resilience.
- **Selected Achievements:**
 - Developed an automated scheduling system that increased production capacity by over **\$2M** by optimizing work-order assignments.
 - Modernized a legacy Microsoft Access ERP system by migrating to MySQL, building a real-time API bridge, streamlining workflows and reducing training time/errors.
 - Designed and deployed intuitive HMI tools enabling non-technical users to complete complex tasks reliably, reducing training time and user error rates.
 - Maintained robotic systems and ensured uptime and reliability, thereby improving operational efficiency and reducing failures.
- Provided mentoring and technical support to team members, delegated tasks aligned to skill sets, and fostered a culture of innovation and continuous improvement.

Database Administrator | Columbus McKinnon – Damascus, VA

Oct 2012 - May 2013

- Maintained and optimized SQL databases to support business operations, oversaw backups, user permissions, query performance improvements, and cross-departmental user-support.

Owner & Operator | Shark Technology – Edinburg, VA

Jan 2010 - Oct 2012

- Operated a technology services business delivering custom application development, database integrations and systems deployments. Built hands-on experience in database design, development and client support across multiple platforms.
-

Education

Associate of Science – Computer Engineering Technology

2008 ECPI University — Manassas, VA

Additional Highlights

- Strong analytical, problem-solving and organizational skills; adept at translating front-end user requirements into technical database solutions.
- Passionate about staying current with emerging database technologies, performance tuning and security best practices.
- Able to train and guide team members and internal users in database-related tools and practices.
