

Summary

Senior DevOps Engineer with 8+ years of experience architecting, automating, and optimizing cloud infrastructure across AWS, Azure, and GCP. Proven success in deploying 25+ CI/CD pipelines, reducing release times by up to 60%, and achieving 99.99% uptime for containerized systems. Adept in Infrastructure as Code (Terraform, Ansible), Kubernetes orchestration, and DevSecOps practices that reduced vulnerabilities by 40%. Delivered \$1.2M+ in annual cloud cost savings through strategic optimization. Strong communicator and mentor with deep expertise in observability, governance, and scalable system design.

Skills & Technologies

Cloud Platforms: AWS, Azure, GCP, OpenStack, VMware vSphere

DevOps Tools: Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, CircleCI, Argo CD, Bamboo, Spinnaker

Scripting Languages: Python, Bash, PowerShell, Go, Shell

Containers & Orchestration: Docker, Kubernetes (EKS, AKS, GKE), Helm, OpenShift, Podman

Infrastructure as Code (IaC): Terraform, CloudFormation, Ansible, ARM Templates, Pulumi, Terraform Sentinel

Monitoring & Observability: Prometheus, Grafana, ELK Stack, Datadog, New Relic, Dynatrace, AppDynamics, CloudWatch

Security & Governance: IAM, Vault, Snyk, Trivy, OWASP, Sentinel, Azure Security Center, AWS Inspector, SCPs

Collaboration Tools: Jira, Confluence, Slack, Trello, Microsoft Teams, Notion

Soft Skills: Leadership, Analytical Thinking, Stakeholder Communication, Time Management, Adaptability, Mentorship

Experience

VetEZ – Veterans Affairs, San Diego, CA

AWS DevOps Engineer | Jan 2022 – Present

- Architected highly available AWS environments with auto-scaling, reducing infrastructure bottlenecks by 35%.
- Automated infrastructure provisioning using Terraform and Ansible, reducing manual effort by 65%.
- Built 25+ CI/CD pipelines with Jenkins and GitLab CI, cutting release time by 55%.
- Integrated Prometheus, ELK, and Grafana for unified observability, improving incident resolution by 38%.
- Reduced AWS costs by 25% using Reserved Instances and Savings Plans.
- Conducted quarterly disaster recovery drills and automated failover processes.
- Mentored junior engineers on Terraform modules, observability, and cloud best practices.

Tech Stack: Jenkins, Terraform, GitLab CI, Kubernetes, Docker, Ansible, Prometheus, ELK, AWS, Azure

Dell Technologies – USA

DevOps Engineer | Jul 2019 – Dec 2021

- Designed scalable AWS infrastructure using Terraform and CloudFormation, reducing deployment time by 40%.
- Managed Kubernetes clusters (EKS) with Helm and Argo CD, achieving 99.99% uptime.
- Migrated legacy apps to Kubernetes (AKS), improving scalability and reliability.
- Embedded Snyk and Trivy into CI/CD pipelines for secure builds.
- Integrated Jenkins and GitHub Actions for streamlined application delivery across environments.
- Collaborated with development teams to optimize release workflows and improve cross-team communication.

Tech Stack: Azure, GCP, Terraform, Cluster API, Sentinel, Jenkins, Azure CLI, Python, Power BI, Ansible

Humana – USA

Cloud Services Engineer | Feb 2017 – Jun 2019

- Designed HIPAA-compliant multi-cloud architecture across AWS and Azure for healthcare applications.
- Automated provisioning using Terraform and CloudFormation, reducing infrastructure deployment time by 60%.
- Built CI/CD pipelines with Jenkins, GitHub Actions, and Argo CD for patient-facing apps.
- Deployed and managed Kubernetes clusters (EKS, AKS) for scalable analytics platforms.
- Integrated Prometheus, Grafana, and CloudWatch for proactive monitoring and alerting.
- Implemented CIS benchmarks, Vault, and Trivy for secure workloads.
- Mentored a team of 5 engineers on container orchestration, IaC, and DevSecOps practices.

Tech Stack: Azure Data Factory, Databricks, Jenkins, Grafana, Power BI, Dynatrace, Ansible

Education & Certification

American Intercontinental University, Houston, TX | Jan 2022

Master of Science in Information Assurance & Security

ESSF University Benin, Benin Republic | Jan 2015

Bachelor of Science in Computer Science

Key Highlights

- *Reduced cloud operational costs by \$1.2M annually via right-sizing and reserved instances.*
 - *Deployed 25+ CI/CD pipelines, improving release efficiency and reducing human errors by 60%.*
 - *Achieved 99.99% uptime with containerized and monitored Kubernetes clusters.*
 - *Strengthened cloud security with OWASP-based practices and Sentinel policy enforcement.*
 - *Mentored and trained 15+ engineers in DevOps best practices and automation tooling.*
-

Certifications

- *AWS Certified Solutions Architect – Associate & Professional*
- *AWS Certified DevOps Engineer – Professional*
- *AWS Certified Security – Specialty*
- *HashiCorp Certified – Terraform Associate*
- *Microsoft Certified – Azure DevOps Engineer Expert*
- *Certified Information Systems Auditor (CISA)*

-Closure-

I bring a results-focused, automation-first mindset to DevOps and cloud infrastructure challenges. Passionate about scalability, security, and mentoring, I aim to contribute to next-gen infrastructure initiatives while enabling operational excellence and engineering team growth.
