

TONY CARTER

Senior Software Engineer

San Antonio, TX | (919) 695-7564 | tonycartersoft55@outlook.com

SUMMARY

Seasoned Full-Stack Engineer with 10+ years of experience building and scaling cloud-native web and FinTech applications. Expert in JavaScript, TypeScript, React, Node.js, and AWS with deep knowledge of microservices, serverless design, and performance-driven architecture. Proven track record delivering enterprise-grade APIs and front-end experiences that serve millions of users worldwide while leading cross-functional teams from concept to launch.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Go, Java, C#, Ruby, PHP, SQL, GraphQL, Shell Scripting

Frontend: React, Next.js, Angular, Vue.js, Redux, React Query, React Native, Tailwind CSS, Material UI, webpack, Vite

Backend: Node.js (Express, NestJS, Fastify, Hapi), Django, Flask, FastAPI, Rails, ASP.NET Core, REST, GraphQL, gRPC, WebSocket

Databases: PostgreSQL, MySQL, MariaDB, SQL Server, MongoDB, DynamoDB, Redis, Elasticsearch, BigQuery

Cloud & DevOps: AWS (Lambda, S3, ECS, EKS, API Gateway), Azure Functions, GCP Cloud Run, Docker, Kubernetes, Terraform, Jenkins, GitLab CI/CD, CircleCI, GitHub Actions

Architecture: Microservices, Serverless, Event-Driven Systems (SQS, SNS, Kafka)

Testing & Monitoring: Jest, Mocha, Chai, Cypress, Playwright, React Testing Library, Datadog

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Stripe

September 2021 – Present

- Architected and delivered high-volume payment processing systems using Node.js, TypeScript, and AWS Lambda within a microservices and serverless environment.
- Designed and optimized a NestJS-based GraphQL API connected to PostgreSQL and Redis to handle millions of monthly transactions with sub-second latency.
- Led the development of a Next.js + TypeScript merchant dashboard featuring real-time WebSocket updates and interactive analytics.
- Implemented Terraform for automated infrastructure provisioning and GitLab CI pipelines, achieving zero-downtime deployments and 60% faster release cycles.
- Integrated third-party APIs (Plaid, Salesforce, Auth0) to enhance financial data interoperability and merchant onboarding flows.

- Improved observability with Datadog tracing and CloudWatch metrics for latency and error tracking across production systems.
- Mentored junior engineers on API design patterns, testing practices, and code review processes that raised release quality and team velocity.

Senior Full Stack Developer - Events.com

July 2016 – September 2021

- Developed scalable event management and ticketing services using Node.js, Express, PostgreSQL, and MongoDB.
- Built REST and GraphQL APIs for event creation, attendee tracking, and sales analytics supporting thousands of concurrent events.
- Modernized the frontend stack by migrating from AngularJS to React + Redux, reducing load times and maintenance costs.
- Implemented real-time attendee updates and dashboards via WebSockets and Redis Pub/Sub for seamless cross-device sync.
- Created data visualization dashboards with Recharts and D3.js to display revenue, capacity, and engagement metrics.
- Enhanced test automation and CI/CD integration (Jest + Cypress) to reduce regressions by 40%.
- Optimized database queries and indexes, improving API response times by 35% during high traffic events.

Frontend Developer - Thread

October 2014 – July 2016

- Developed high-performance, responsive interfaces for SaaS clients using React and modern ES6+ JavaScript.
- Converted Figma designs into reusable component libraries with consistent UI patterns and WCAG-compliant accessibility.
- Implemented OAuth2 and JWT authentication for secure integration with Node.js and Rails backends.
- Optimized build and deployment processes using Webpack and Gulp to reduce bundle sizes and improve page speed.
- Collaborated closely with design and QA teams to deliver pixel-perfect marketing sites and MVP dashboards on tight deadlines.

EDUCATION

Trinity University

Bachelor of Science in Computer Science 2010 - 2014
