

Trueman Atughonu

AWS Solutions Architect

Location: Phoenix, AZ | **Mobile:** +1(623) 295-9154 | **Email:** tatughonu@gmail.com

Summary:

- AWS Certified Solutions Architect with **7+** years of experience designing, deploying, and optimizing scalable, secure, and cost-effective cloud architectures.
- Proficient in leveraging AWS services (EC2, Lambda, RDS, and Kubernetes) to drive innovation and operational efficiency.
- Strong background in healthcare technology, cloud security, and infrastructure automation.
- Proven track record of aligning cloud strategies with business objectives and delivering robust solutions for diverse industries.

Experience:

Company: Humana, Phoenix, AZ

Oct 2022- Current

Role: AWS Solutions Architect

Responsibilities:

- Designed and implemented scalable, secure, and cost-optimized cloud architectures using AWS services, reducing Infrastructure costs by **85%**.
- Developed and enforced cloud security best practices, ensuring compliance with HIPAA and GDPR regulations.
- Designed and deployed multi-region, highly available architectures using AWS services like EC2, RDS, and S3.
- Collaborated with cross-functional teams to migrate on-premise applications to AWS, ensuring minimal downtime and Seamless integration.
- Optimized cloud infrastructure for performance and cost, leveraging AWS Cost Explorer and Trusted Advisor.

Company: Dell Technologies, Scottsdale, AZ

Aug 2020- Sep 2022

Role: - AWS Solutions Architect

Responsibilities:

- Architected and configured Dev/Stage/QA environments in AWS (VPC, subnets, security groups, EC2 instances, load Balancer, RDS, Redis, route53, etc.)
- Architected staging environment for migration.
- Used Auto-scaling, load balancers, and their components to equally distribute traffic throughout the environment
- Have used Dome to onboard assets of AWS, Azure, and GCP for security visibility, posture management, and IAM Management.
- Architected and created 3 tiers of architecture via Terraform for migrations.
- Created AMI for usage across the environment.
- Architected and designed the management of servers using System Manager and Ansible and capabilities to automate Configurations and ongoing management of systems at scale.
- Have architected and maintained a highly secure environment with the use of IAM, Cloud Trail, and Access server login.
- Architected and manages storage such as EC2 and EBS volumes.
- Architected and developed baseline and custom guardrails, policies, centralized policy enforcement, tagging policies, and a well-architected multi-account environment.
- Have used AWS Config and entrust at an enterprise level to enforce MFA across accounts, resources, and emails within our environment.
- Leverage AWS config to ensure compliance and remediations across multiple accounts within an AWS organization.

Company: BCBS, Phoenix, AZ

Jun 2017- Jul 2020

Role: - Cloud DevOps Engineer

Responsibilities:

- Designed a serverless CI/CD pipeline (AWS Code Pipeline, Lambda, S3) for Microservices architecture, cutting release cycles from 2 hours to 15 minutes.
- Automated backups and disaster recovery for RDS/Aurora databases using AWS Backup, achieving RPO of <1 minute.
- Reduced AWS costs by **80%** via rightsizing EC2 instances, S3 lifecycle policies, and Reserved Instance purchases.
- Deployed Ansible playbooks to automate configuration management for 100+ Linux servers, ensuring zero-config drift.
- Automated backups using AWS Backup and Lambda, reducing manual oversight by **80%**.

- Optimized DynamoDB throughput via auto-scaling and GSIs, lowering latency by **75%**.

Skills:

- **Cloud Platforms:** AWS (EC2, S3, Lambda, RDS, EKS, IAM, Cloud Watch, VPC, Route 53, SQS, KMS)
- **Infrastructure as Code:** Terraform, AWS CloudFormation, Ansible, AWS Systems Manager
- **Security & Compliance:** IAM, KMS, Guard Duty, AWS Config, HIPAA, GDPR, CIS Benchmarks
- **Networking:** VPC, Subnets, NACLs, VPN, Direct Connect, Transit Gateway
- **Database Management:** RDS, DynamoDB, Aurora, Redshift
- **DevOps & CI/CD:** Jenkins, GitHub Actions, AWS Code Pipeline, Docker, Kubernetes (EKS)
- **Analytics:** SPSS, Excel, NVIVO, Amazon Redshift, Amazon Athena, Amazon Kinesis, Microsoft 360, Quicksight
- **Programming/Scripting:** Python (Boto3), Bash, JSON/YAML
- **Containerization & Orchestration:** Docker, AWS Kubernetes (EKS)
- **Monitoring & Logging:** Cloud Watch, , AWS Config, Cloud Trail
- **AI/ML:** AWS Textract, Sage Maker, Transcribe, Translate, Poly, Rekognition, Comprehend

Educations:

- | | |
|---|-------------|
| • Doctor of Business Administration (Healthcare Administration), Walden University | 2023 |
| • Master of Healthcare Administration, Walden University | 2016 |
| • Bachelor of Science in Biochemistry (Chemistry), Wichita State University | 2011 |
| • Diploma in Electronics and Computer Engineering, Lagos State University | 2002 |

Certifications

- **AWS Certified Solutions Architect- Professional(SAP-C02)**
- **AWS Data Engineering**
