(646) 322- 2449

52 Fairfield Ave, Mineola, NY 11501

Senior Jira Specialist with over a decade of experience in managing, optimizing, and implementing Jira solutions across diverse industries. Recognized for delivering high-impact projects with precision, efficiency, and adherence to timelines and budgets. Possesses deep expertise in the Atlassian suite, including Jira, Confluence, and Jira Service Management. Proven success in leading complex migrations from Jira Data Center to Atlassian Cloud, ensuring seamless transitions and enhanced system performance.

PROFESSIONAL EXPERIENCE:

Microsoft, NYC, NY

March 2018 – Present

(InSight Global Consultant to FT)

Senior Software Engineer

- Proficient in comprehensive JIRA administration, encompassing screens, screen schemes, dashboards, and workflows. Skilled in configuring Automated & Groovy Conditions & Validators, managing add-ons, customizing projects, and handling Permission Schemes, among other critical aspects.
- Utilizing Script Runner and Groovy to develop custom fields and Behaviours, demonstrating expertise in creating over 200 smart custom fields and continuously expanding the repertoire.
- Creating dynamic reports for management utilizing JIRA Add-Ons such as Structure, Structure Gantt, EazyBI, Service Desk, Portfolio, Zephyr, and Project Automation, enabling data-driven decision-making and enhanced visibility.
- Collaborating with Agile coaches to develop roadmaps and establish clear Portfolio SAFe strategies, contributing to effective Agile implementation and alignment with organizational objectives.
- Facilitating training for a team of over 7500 users, conducting engaging demos, comprehensive training sessions, and personalized one-on-one support, ensuring 24/7 user assistance and continuous skill development.
- Ensuring seamless integration with Confluence, BitBucket, and FishEye, enabling smooth collaboration and full administration of Confluence features, including pages, spaces, and templates.
- Recognized as an expert in identifying pain points experienced by individuals and teams, adept at finding innovative solutions to address challenges and improve workflows.
- Actively participate as an engaged member in Atlassian Community discussions and forums, fostering knowledge sharing, collaborative problem-solving, and contributing to the growth and development of the community.
- Successfully executed the migration from server to Datacenter (clustered), ensuring a smooth transition and optimal performance in a high-availability environment.

Navan, NYC, NY

August 2020 – June 2023

Consultant to Senior Systems Engineer Applications

- Proficient in end-to-end JIRA Cloud administration, including mastery of screens, screen schemes, dashboards, and workflows. Skilled in configuring Automated & Groovy Conditions & Validators, managing add-ons, and customizing projects. Adept at handling Permission Schemes and various other aspects of JIRA administration.
- Utilizing Script Runner and Groovy for the development of custom fields, enabling tailored solutions to meet specific requirements.
- Acting as the subject matter expert (SME) on Jira service desk and possessing a deep understanding of all things Jira-related, providing expert guidance and support.
- Successfully integrate third-party tools with Jira, such as Structure, EazyBi, Zephr, and Salesforce, enhancing the functionality and efficiency of the system.
- Offering constant availability and support via Slack, providing user assistance, delivering engaging demos, conducting comprehensive training sessions, and offering personalized one-on-one guidance on JIRA-related matters, ensuring 24/7 support.
- Ensuring seamless integration with Confluence, BitBucket, and FishEye, enabling smooth collaboration and comprehensive administration of Confluence features, including pages, spaces, and templates.
- Facilitating complete bi-directional integration with Salesforce and PagerDuty, optimizing workflows and fostering efficient collaboration between systems.
- Recognized as an expert in identifying pain points faced by individuals and teams, adept at finding innovative solutions to overcome challenges.
- Proactively update and maintain add-ons and plugins as recommended, ensuring an optimized and up-to-date JIRA environment.
- Actively contributing as a valuable member of the Atlassian Community, participating in knowledge sharing and collaborative discussions to foster growth and development within the community.

eMovis, NYC, NY

Feb 2017 – Feb 2018

Release & Configuration Manager

Jira Administrator

- Proficiently administer Jira, encompassing various aspects such as workflow management, screen configuration, and Agile methodology implementation, including sprint planning.
- Successfully implemented Jira as the industry standard bug tracking and ticketing system within the company, streamlining processes and enhancing efficiency.
- Orchestrated the complete migration from the legacy ticketing system (Mantis) to Jira, ensuring a seamless transition and optimal utilization of Jira's capabilities.

- Utilize easyBI to create dynamic dashboards and reports, leveraging Jira data for effective visualization and data-driven decision-making.
- Employ TestRails integration with Jira for efficient test management, facilitating seamless collaboration and tracking of QA activities.
- Developed the Software Configuration Management (SCM) Plan for the organization and projects, ensuring effective management of software configurations throughout the SDLC process.
- Perform Configuration Management tasks as per the defined SDLC process, overseeing the configuration change management process and procedures.
- Administer TeamCity as the continuous integration build tool, ensuring smooth integration and automated build processes.
- Collect and report CM-related measurements, providing insights into process and product status to project managers.
- Effectively communicate key project plans, commitments, and changes, including requirements, QA plans, schedules, and scope changes.
- Deploy releases to the production environment and provide troubleshooting support to project teams, ensuring successful deployment and resolution of issues.
- Automate tools used for building, integrating, and deploying software releases to various platforms, leveraging cutting-edge technologies like TeamCity and Octopus.
- Actively participate in daily standups to discuss release scope and address any roadblocks.
- Efficiently administer Confluence, setting up teams and projects as a wiki, managing project-specific information, and ensuring appropriate permissions.
- Establish bidirectional communication between Jira and Confluence, fostering seamless integration and collaboration between the two platforms.

Barnes & Noble (SGMC), NYC, NY

Sept 2013- July 2016

Release Engineer (Consultant)

- Successfully led the complete rebuild of the Barnes & Noble website, overseeing the project from inception to completion, ensuring a seamless and successful launch.
- Collaborated closely with the QA team to provide upper management with comprehensive status updates on development activities, utilizing Agile Workflows in Jira. Customized Jira workflows were implemented to track edits for the Change Control Board, effectively managing change management processes.
- Proficiently administered JIRA and Confluence, handling all aspects of administration including configuring custom workflows, screens, screen schemes, permissions, and notifications, tailoring the platforms to meet specific team requirements.
- Effectively treated Confluence as the company's central wiki, managing a vast range of information including servers, HR details, IP addresses, software stacks, project specifics, and department-specific documentation.
- Conducted daily log scans to identify and resolve issues at their root cause, performing comprehensive root cause analysis for effective problem resolution.
- Configured, designed, and administered Apache Subversion (SVN), Jenkins/Hudson Continuous Integration Server, Jira, Confluence, Stash (Bitbucket), and Fisheye, facilitating seamless integration and streamlined development processes.

- Implemented ATG as the front-end solution, enabling consistent and engaging customer experiences across multiple channels such as web, mobile, kiosk, and stores.
- Utilized Manhattan Associates as the backend fulfillment clients, ensuring efficient order processing and fulfillment.
- Proficiently utilized Maven and Ant as build tools for Java development, managing the creation of build artifacts and working with pom.xml and build.xml files.
- Automated various aspects of code deployment, including EAR, WAR, JAR files, and configuration file deployment to Jboss servlets, leveraging personalized deployment scripts.
- Installed and configured defect-tracking tools such as Fisheye, Jira, Confluence, and AppDynamics, facilitating effective issue tracking and resolution.
- Provided technical administration of the continuous integration platform, including upgrades, release management, log file analysis, configuration changes, and technical issue resolution.
- Acted as the primary point of contact for developers and testers, addressing all software build-related matters, and ensuring smooth collaboration and efficient workflows.

Citigroup, NYC, NY

VP Data Asset Strategy

April 2012 – July 2013

- Evaluated and integrated new data asset capabilities and solutions to enhance account acquisition, drive revenue growth, and mitigate losses.
- Led the procurement, assessment, and implementation of external data assets to support CitiCards initiatives, ensuring the availability of high-quality data for decision-making processes.
- Collaborated closely with the decision management and Risk departments, leveraging data assets to develop applications and models that effectively drove business growth.
- Collaborated with Tri-Bureaus and external vendors to develop models aimed at increasing acquisition, reducing delinquency, and optimizing segmentation strategies.
- Conducted in-depth analysis and manipulation of data using SAS and SQL, providing valuable insights for internal analysis of existing card members and supporting data-driven decision-making processes.

Stylesight, NYC, NY

Financial Systems Analyst

November 2010 – March 2012

- Prepared comprehensive and dynamic reporting and analysis documents covering various financial metrics, such as Var, P&L, GAAP Summary, and more, providing valuable insights for informed decision-making.
- Conducted trend analysis within the HOST system and implemented Report Books to streamline and simplify reporting processes. Successfully facilitated the Excel to Host implementation for enhanced reporting capabilities.
- Customized and developed monthly dashboards, pivot tables, and reports, delivering actionable insights and further analysis to support financial analysis and decision-making.
- Tracked the complete life cycle of leads to accounts, utilizing custom monthly dashboards, graphs, and widgets to provide detailed analysis and insights into the sales and account management processes.

- Managed and oversaw the implementation of custom changes to the financial management system, Salesforce (CRM), and Host Analytics, ensuring seamless integration and optimal system performance.
- Utilized Hyperion for financial reporting and metric gathering, leveraging the platform's capabilities to generate accurate and insightful financial reports.
- Resolved issues and customized menus for financial management software programs, effectively troubleshooting programming and system problems associated with the applications in use.
- Developed and tested new or modified report formats, customized programs to manipulate data, and implemented changes to file structures, collaborating with lead users and developers to ensure successful testing and implementation.
- Reviewed edited reports and operator error messages, providing valuable application support to end users of the financial management system and related applications.
- Applied accounting and auditing principles and techniques to maintain data integrity, internal controls, and audit trails across all applications, ensuring compliance and accuracy in financial reporting.

Rauxa Direct, NYC, NY

Database Reporting Manager

October 2009 – Feb 2011

- Managed and led a team of 3 employees/consultants, overseeing in-depth campaign analysis for all campaigns, including cross-campaign analysis and summary level analysis. Provided strategic input and recommendations for future program enhancements based on insights gained from analysis.
- Conducted comprehensive campaign analysis, covering various metrics and performance indicators. Prepared in-depth reporting and analysis documents specifically focused on retention customers for Verizon.
- Generated and tested key metrics such as Churn, ARPU, ACSS, ESN, Decile breakout, and Statistical Significance, providing valuable insights into customer behavior and campaign effectiveness.
- Implemented core Email metrics, including bounce backs, click-to-view, opens, and opt-outs, to effectively target key audiences and measure campaign success.
- Programmed custom models in Report Builder to cater to specific client requirements and handle views that are of interest to clients.
- Successfully implemented and managed projects and initiatives, ensuring timely completion and delivery of results.
- Proactively developed solutions to address challenges and issues encountered with models, effectively resolving problems and optimizing performance.
- Provided leadership to clients in developing and executing data-driven marketing strategies, leveraging insights from analysis to drive effective and targeted campaigns.
- Collaborated closely with agency and client teams to deliver analytical and modeling insights on campaigns and strategies. Utilized customer data and program performance results to provide customer segmentation and targeting strategies.
- Developed strong relationships and fostered collaborative work with clients and agency leadership, further solidifying the agency's relationship with the client.
- Drove innovation in data-driven marketing and analytics, exploring opportunities to expand the use of data-driven approaches beyond current channels, driving continuous improvement and growth.

Citigroup, Long Island City, New York (Apex)

Data Analyst Programmer/ Data Specialist (Consultant) July 2008 - August 2009

Email and Balcon Channels

- Managed and coordinated 20-25 Email & Balcon Campaigns per deployment, ensuring critical deadlines were met by effectively collaborating with cross-functional external vendors and promptly escalating and resolving any issues that arose.
- Developed, manipulated, and implemented automated analytical tools such as PC SAS and Oracle SQL to audit reports, ensuring data integrity and validation.
- Ran distribution reports, including T-tests and Characteristics tests, to conduct further analysis on the data, extracting valuable insights for decision-making.
- Utilized SQL and SAS coding to develop complex campaigns targeting specific credit card holders, effectively maximizing campaign effectiveness and engagement.
- Compiled data into waterfall-structured report formats, facilitating easy depiction of suppressions and enabling clear understanding of key information.
- Pioneered the development of a critical reengineering process for email marketing campaign production, resulting in a reduction of 2 days in the processing cycle time without any increase in costs.
- Conducted statistical queries and analysis on target population data sets of 60MM ECM (Existing Card Members) monthly, ensuring secure and effective marketing through the email channel.
- Optimized volume for program managers by coding monthly MIS marketing reports for Decision Management and Risk Management analysis, providing key insights and recommendations for targeted marketing efforts.
- Created and presented ad-hoc analysis reports, explaining volume discrepancies and providing suppression estimates for actual card member-targeting populations.
- Examined internal functions and identified risks to enhance operational efficiency, implementing improvements to streamline business operations and mitigate potential issues.

Bear, Stearns & Co. Inc., New York, N.Y.

Research Assistant (Consultant + Full Time)

November 2002-April 2008 (Gaps in between as I was a consultant)

- Led and assisted on multiple time-sensitive projects within the equity research department, utilizing various software applications to ensure successful project completion.
- Collaborated closely with Analysts and Associates, actively contributing to the implementation of Equity Valuation models and compiling research for analysis.
- Trained Administrative Assistants on BSC intrinsic systems, such as Extensity and Relationship Manager, enhancing their proficiency and efficiency in managing key systems.
- Downloaded market data from Reuters and Bloomberg Terminals into Excel spreadsheets, ensuring research reports were updated with the latest information.
- Utilized SQL to retrieve relevant information for equity research reports, facilitating data analysis and report preparation.
- Provided valuable support to two Managing Directors in the Equity Research Biotech, Healthcare, and Medical Devices sector, assisting with various tasks and projects.

- Prepared financial and statistical reports specifically tailored for the Biotech sell-side industry, contributing to informed decision-making and market insights.
- Collaborated with Senior Managing Directors in the department on weekly postings for master reports, ensuring accurate and timely writing, editing, and preparation of final copy for distribution.
- Fostered effective communication and reporting practices by linking all impacted departments, facilitating smooth coordination and information sharing.
- Organized and managed details of special events, travel arrangements, corporate agendas, and itineraries, ensuring smooth operations and logistical support.
- Directed business relations and oversaw distribution of sector reports, stimulating client interest and sales through targeted communication.
- Processed monthly expense reports, supporting documents, and budget code indexes, ensuring accuracy and adherence to financial procedures.

EDUCATION:

NEW YORK UNIVERSITY, NEW YORK, N.Y. (NYU - POLY)

Masters of Science in Financial Engineering; June 2007

Major: Financial Engineering CUM GPA: 3.83

Certificate in Risk Management CUM GPA: 4.0

SUNY ALBANY June 2001

Major: Information Science & Policy

Minor: Business Administration
